During the period July-December, 1901, the number of volumes in circulation for home use was 956,139 (of which 4,816 were from the public school reading rooms); the total number of volumes in circulation was 1,047,814 (of which 11,857

were from the public school reading rooms); the number of new registrations was 15,136 (of which 625 were at the public school reading rooms); the number of readers (minors) was 98,930 (of which 23,904 were at the public school reading rooms), the total number of readers being 217,967 (of which 39,208 were at the public school reading rooms); and the number of volumes accessioned was 10,095 (of which 1,717 were at the public school reading rooms).

During the calendar year ending December 31, 1901, the number of volumes actually received in the Circulation Department was 22,458.

The total number of readers in the library reading rooms was 421,692, reference books in the halls being used by 195,816 readers.

There are now on the shelves of all circulation branches, available for readers, 212,802 volumes.

One of the important gifts of the calendar year was a portrait of Governor Samuel J. Tilden, presented to the Trustees by Mr. William O. McDowell at their meeting on April 10th. It is in oil, painted by Matthew Wilson, represents Mr. Tilden at about the age of fifty years, and is said to have been one of his favorite likenesses.

One of the important gifts of the month was from Leonard E. Opdycke, 31 volumes, being Domenichi's translation of Nocera's *Life of Consalvo Ferrando di Cordova* (Firenze: Lorenzo Torrentino, 1552); Machiavelli's "*Historie*" (Vinegia: Aldus, 1540), and 29 editions of Count Castiglione's "*Il Libro del Cortegiano*," the latter including six Florence editions from 1528 to 1892; nine of Venice, from 1541 to 1842 (1541 and 1545 being Aldus imprints); three of Lyons, 1537, 1550, and 1562; three of London, 1588, 1737, 1742; two of Paris, 1546, 1577; two of Milan, 1803 and 1890; and one each of Parma, 1530; Padova, 1766; Cologne, 1771; Madrid, 1873; and New York, 1901, the last translated and annotated by Mr. Opdycke.

Mr. Maitland presented six rare pieces of Americana, as follows: "By the Treasurer, Councill and Company for Virginia" [a Proclamation ordering each of the four boroughs in Virginia to build a house for reception of new immigrants, each borough to provide itself with a minister of the gospel, requesting assistance to be tendered new arrivals, recommending more diversified industry than tobacco planting alone] (London, 1620), broadside, folded to F°, three-quarters brown morocco; "Orders and Constitutions, Partly Collected out of his Maesties Letters Patents, and partly by authority, and in vertue of the said Letters Patents: Ordained upon mature deliberation by the Gouvernor and Company of the City of London, for the Plantation of the Summer-Islands: for the better gouerning of the actions and affaires of the said Company and Plantation, 6 Febr. 1621" (London: Felix Kyngston, 1622), 4°, red morocco, by Zaehnsdorf; "Advertisement, To all Trades-men, Husbandmen, Servants and others who are willing to Transport themselves unto the Province of New-East-Jersey in America, a great part of which belongs to Scots-men, Proprietors thereof" [Scotland? 1684], broadside, folded to 4°, brown morocco, by the Club Bindery; S. E.'s "*Further Quæries Upon the Present State of the New-English Affairs*" (Boston, 1689), 4°, red morocco, by Bedford; Samuel Penhallow's "*The History of the Wars of New England, With the*

Eastern Indians" (Boston, T. Fleet, 1726), sm. 8°, a perfect copy with good margins, bound in full red morocco, gilt, by David; and J[ohn] C[alef]'s "The Siege of Penobscot by the Rebels; containing a Journal of the Proceedings of His Majesty's Forces detached from the 74th and 82d Regiments, consisting of about 700 Rank and File, under the Command of Brigadier-General Francis McLean, and of Three of His Majesty's Sloops of War, of 16 Guns each, under the Command of Captain Henry Mowat . . . with a Chart of the Peninsula of Majabigwaduce, and of the Penobscot River" . . . (London: G. Kearsley, etc., 1781), 8°, uncut, blue crushed levant, by Bedford.

Other important gifts were:—From S. P. Avery, 10 volumes, 10 pamphlets, and 29 prints, the volumes including 2 volumes of Goya's etchings; from Samuel Lane Boardman, the Biography of Peter Edes, Pioneer Printer in Maine . . .; from Brooks Brothers, 26 directories of cities in the United States; from the City of Cleveland, 10 volumes, 1 pamphlet, and a chart, all relating to the City; from Mrs. Henry Draper, 2 volumes, 27 pamphlets and 1 print, chiefly relating to music; from Miss M. Drisler, 2 volumes and 2 pamphlets, including S. Woodworth's "Champions of Freedom;" from the Duc de Loubat, a copy of the recently-edited "Codex Fejérváry-Mayer" . . .; from the Peruvian Minister of Finance, 3 volumes of public documents; from the Rhode Island State Library, 20 volumes and 17 pamphlets, all State documents; from the Russian Minister of Finance, 5 volumes, "Description de la Corée;" from Charles Sedelmeyer, 5 volumes of "The complete work of Rembrandt," with the promise of volumes 6, 7, and 8, when published; from the Società Italiana per le Strade Ferrate Meridionali, Florence, 15 volumes and 26 pamphlets, being reports and other documents from 1888 to the present time; and from the K. u. K. Hof-Bibliothek, Vienna, 2 volumes and 2 pamphlets, all their own publications.

The Rembrandt exhibition was continued at the Lenox until December 27th, and on the 30th a display of lithographs of Fantin-Latour and of etchings of Egusquiza was placed on view. At the Astor the Artistic Portraits were on view.

The exhibition of maps at the Astor Building has been changed to show maps of current interest, such as the Nicaragua route, various sites proposed for the federal capital of the Australian Commonwealth, China, the Philippine Islands, Africa, and the United States.

LETTERS OF EDGAR ALLAN POE, 1845-49.

The following letters are printed from the original manuscripts in the Duyckinck collection in the New York Public Library.

MY DEAR DUYCKINCK,

I leave for you what I think the best of my Poems. They are *very* few—including those only which have not been published in volume form. If they can be made to fill a book, it will be better to publish them alone—but if not, I can hand you some "Dramatic Scenes" from the S. L. Messenger (2d Vol) and "Al Aaraaf" and "Tamerlane," two juvenile poems of some length.

Truly yours

POE.

Wednesday 10th [Sept. 1845?].

THURSDAY MORNING—13th [Nov. 1845].

85 Amity St.

MY DEAR MR DUYCKINCK,

For the first time during two months I find myself entirely myself—dreadfully sick and depressed, but still myself. I seem to have just awakened from some horrible dream, in which all was confusion, and suffering—relieved only by the constant sense of your kindness, and that of one or two other considerate friends. I really believe that I have been mad—but indeed I have had abundant reason to be so. I have made up my mind to a step which will preserve me, for the future, from at least the greater portion of the troubles which have beset me. In the meantime, I have need of the most active exertion to extricate myself from the embarrassments into which I have already fallen—and my object in writing you this note is, (once again) to beg your aid. Of course I need not say to you that my most urgent trouble is the want of ready money. I find that what I said to you about the prospects of the B. J. is strictly correct. The most trifling immediate relief would put it on an excellent footing. All that I want is time in which to look about me; and I think that it is your power to afford me this.

I have already drawn from Mr Wiley, first \$30—then 10 (from yourself)—then 50 (on account of the "Parnassus")—then 20 (when I went to Boston)—and finally 25—in all 135. Mr Wiley owes me, for the Poems, 75, and admitting that 1500 of the Tales have been sold, and that I am to receive 8 cts a copy—the amount which you named, if I remember—admitting this, he will owe me \$120. on them:—in all 195. Deducting what I have received there is a balance of 60 in my favor. If I understood you, a few days ago, Mr W. was to settle with me in February. Now, you will already have anticipated my request. It is that you would ask Mr W. to give me, to-day, in lieu of all farther claim, a certain sum whatever he may think

advisable. So dreadfully am I pressed, that I would willingly take even the \$60 actually due, (in lieu of all farther demand) than wait until February:—but I am sure that you will do the best for me that you can.

Please send your answer to 85 Amity St. and believe me—with the most sincere friendship and ardent gratitude

Yours

EDGAR A POE.

THURSDAY MORNING [Nov. 13? 1845].

MY DEAR MR DUYCKINCK,

I am still dreadfully unwell, and fear that I shall be very seriously ill. Some matters of domestic affliction have also happened which deprive me of what little energy I have left—and I have resolved to give up the B. Journal and retire to the country for six months, or perhaps a year, as the sole means of recruiting my health and spirits. Is it not possible that yourself or Mr Matthews might give me a trifle for my interest in the paper? Or, if this cannot be effected, might I venture to ask you for an advance of \$50 on the faith of the "American Parnassus"?—which I will finish as soon as possible. If you could oblige me in this manner I would feel myself under the deepest obligation. Will you be so kind as to reply by the bearer?

Most sincerely yours

E. A. DUYCKINCK Esq.

EDGAR A POE

Jan 8. 46.

DEAR MR. DUYCKINCK,

For "particular reasons" I am anxious to have another volume of my Tales published before the 1st of March. Do you not think it possible to accomplish it for me? Would not Mr Wiley give me, say \$50, in full for the copyright of the collection I now send. It is a far better one than the first—containing, for instance, "Lygeia," which is undoubtedly the best story I have written—besides "Scheherazade," "The Spectacles," "Tarr and Fether," etc.

May I beg of you to give me an early answer, by note, addressed 85 Amity St.

Truly yours

E. A. DUYCKINCK Esq.

EDGAR A. POE

April 28.

DEAR DUYCKINCK,

Mrs C. tells me that you had some conversation with her about Keese and myself—and I have thought it best to enclose you my letter to him. May I ask of you the favor to look it over and then seal it and send it to him?—unless you have anything to suggest—in which case please do not send it until you can communicate with me.

I enclose, also, a letter from the Lit. Societies of the Vermont University. My

object is to ask you to get inserted, editorially, in the "Morning News," or some other paper, a paragraph to this effect:—or something similar.

EDGAR A. POE.—By a concurrent vote of the Literary Societies of the University of Vermont, Mr Poe has been elected Poet for their ensuing Anniversary in August next—but we are sorry to hear that continued ill health, with a pressure of engagements, will force him to decline the office.

Please preserve the letter of the Societies.

It strikes me that, some time ago, Wiley & Putnam advertised for autographs of distinguished Amer. statesmen. Is it so? I have well-preserved letters from John Randolph, Chief Justice Marshall, Madison, Adams, Wirt, Duane, E. Everett, Clay, Cass, Calhoun and some others—and I would exchange them for books.

Truly yours

E. A. POE

Can either you or Mathews furnish me with autographs of any of the following persons? Cheever—Cary—Cranch—Francis—Mrs Stephens—Clark—Verplanck—Aldrich—Maroncelli—Wetmore—Fay—Greeley—Godwin—I. Willis—Maturin—Deming—Mrs Smith—Raymond—Headley—Brownlee—Kent—Ward—Tellkamp—S. Smith—Mrs Child—G. Spring—Jno. Stephens—Cooley—Mancur—King—T. Irving—Inman—Jones—Tuckerman—Mrs Godwin—Gallatin—Harring—I. Sargent—Prof. Robinson—Channing—Lewis—Schoolcraft—Dewey—Brisbane—Tasistro.

[Endorsed, "April 18, 1846."]

MONDAY 29 [June, 1846].

MY DEAR MR. DUYCKINCK,

I am about to send the "Reply to English" (accompanying this note) to Mr Godey—but feel anxious that some friend should read it before it goes. Will you be kind enough to look it over and show it to Mathews? Mrs C. will then take it to Harden. The *particulars* of the reply I would not wish mentioned to *any* one:—of course you see the necessity of this.

The no of Littell's Age cont^s the notice, is 106—so he writes me.

Most truly yours

POE

FORDHAM—Dec. 24. 46.

DEAR DUYCKINCK,

You remember showing me about a year ago, at your house, some English stanzas—by a lady I think—from the rhythm of which Longfellow had imitated the rhythm of the Proem to his "Waif." I wish very much to see the poem—do you think you could loan me the book, or (which will answer as well) give me the

title of the book in full, and copy me the 2 first stanzas? I will be greatly obliged if you can.

I am much in need, also, of Gilfillan's "Sketches of Modern Literature,"—2 vols.—published by Appleton. If you could loan me the work (or the vol. containing the sketch of Emerson) I would take it as a great favor.

I am taking great care of your Irving and Arcturus—but, unless you need them, I should like to keep them some time longer—as I have to make constant reference to them.

Truly yours,
E. A. POE.

Dec. 30. 46.

DEAR DUYCKINCK,

Mrs Clemm mentioned to me, this morning, that some of the Parisian papers had been speaking about my "Murders in the Rue Morgue." She could not give me the details—merely saying that you had told her. The "Murders in the R. M." was spoken of in the Paris "Charivari," soon after the first issue of the tale in Graham's Mag:—April 1841. By the enclosed letter from Stonehaven Scotland, you will see that the "Valdemar Case" still makes a talk, and that a pamphlet edition of it has been published by Short & Co. of London under the title of "Mesmerism in Articulo Mortis." It has fairly gone the rounds of the London Press, commencing with "The Morning Post." The Monthly Record of Science" &c gives it with the title "The Last Days of M. Valdemar. By the author of the Last Conversation of a Somnambule"—(Mesmeric Revelation).

My object in enclosing the Scotch letter and the one from Miss Barrett, is to ask you to do me a favor which (*just at this moment*) may be of great importance. It is, to make a paragraph or two for some one of the city papers, stating the facts here given, in connexion with what you know about the "Murders in the Rue Morgue." If this will not give you too much trouble, I will be deeply obliged. If you think it advisable, there is no objection to your copying any portion of Miss B's letter. Willis or Morris will put in anything you may be kind enough to write; but as "The Home Journal" has already said a good deal about me, some other paper would be preferable.

Truly yours
POE.

FORDHAM,

March 8 [1849].

DEAR SIR,

If you have looked over the Von Kempelen article which I left with your brother, you will have fully perceived its drift. I mean it as a kind of "exercise," or experiment, in the plausible or verisimilar style. Of course, there is *not one* word of truth in it from beginning to end. I thought that such a style, applied to the gold-excitement, could not fail of effect. My sincere opinion is that nine persons

out of ten (even among the best-informed) will *believe* the quiz (provided the design does not leak out before publication) and that thus, acting as a sudden, although of course a very temporary, *check* to the gold-fever, it will create a *stir* to some purpose.

I had prepared the hoax for a Boston weekly called "The Flag" where it will be quite thrown away. The proprietor will give me \$15 for it on presentation to his agent here; and my object in referring the article to you is simply to see if you could not venture to take it for the "World." If so, I am willing to take for it \$10—or, in fact, whatever you think you can afford.

I believe the quiz is the first deliberate literary attempt of the kind on record. In the story of Mrs Veal, we are permitted, now and then, to perceive a tone of *banter*. In "Robinson Crusoe" the design was far more to please, or excite, than to deceive by verisimilitude, in which particular merely, Sir Ed. Seaward's narrative is the more skilful book. In my "Valdemar Case" (which *was* credited by many) I had not the slightest idea that any person should credit it as anything more than a "Magazine-paper"—but here the whole strength is laid out in verisimilitude.

I am *very* much obliged to you for your reprint of "Ulalume."

Truly Yours,

EDGAR A. POE.

P.S. If you feel the least *shy* about the article, make no hesitation in returning it, of course:—for I willingly admit that it is not a paper which every editor would like to "take the responsibility" of printing—although merely as a contribution with a known name:—but if you decline the quiz, please *do not let out the secret*.

CALENDAR OF THE BARBOUR PAPERS, 1811-1841.

The Barbour Papers, purchased by the New York Public Library in 1897, consist mainly of letters to James Barbour (governor of Virginia, senator, secretary of war, and minister to England) from men prominent in American politics between 1811 and 1841. A few letters by Barbour have been added, from the Ford collection. The collection includes also family letters and other private papers, but only letters that relate to public affairs are included in this calendar. The arrangement is chronological, with an alphabetical list of writers at the end.

Johnson (Richard Mentor). Washington, Dec. 9, 1811. To James Barbour, Richmond, Va. He regrets the defeat of Barbour in the election for governor of Virginia, but reminds him of his growing popularity and advises him not to retire; the debate on war or submission is to begin this day; war spirit in the house; before they adjourn, war measures will be adopted, that is, letters of marque and taking the Canadas; they have found difficulty in fixing the ratio of representation, but will probably compromise on 33,000. A. L. S. 3 pp. 4°.

Jefferson (Thomas). Monticello, [Va.,] Jan. 22, 1812. To Gov. [James] Barbour. In answer to the question whether in case of a division of council the practise was for the governor to give the deciding vote, he answers that the governor is not a counsellor and his vote can make no part of an advice of council; however, when council is divided, the governor is free to act on his own responsibility; otherwise government would stand still, and delay in executive functions may be ruinous. A. L. S. 4 pp. 4°.

Printed in *Writings of Jefferson*, vol. 6 (N. Y., 1855) p. 38; and in Ford's *Writings of Jefferson*, vol. 9 (N. Y., 1898) p. 334.

Duane (William). Philadelphia, Feb. 24, 1813. To Gov. [James] Barbour. Recommends the use of the torpedo for the defence of Virginian waters; will forward Fulton's pamphlet with drawings on the subject; as the naval gentlemen are jealous of a professional rival, the experiment might be tried in their absence, with local craft and watermen; in the spring the British will probably pass up to their old ground at Yorktown; Fulton has some of the machines in preparation, and if the British do not blockade their own friends in New York and Boston, these might well be used in clearing the Chesapeake; the measure should be conducted without the knowledge of the general government, for fear of spies at Washington; the honor of the state would then be a glorious contrast with the traitorous course pursued eastward. A. L. S. Endorsed. 3 pp. 4°.

Duane (William). Philadelphia, Mar. 10, 1813. To James Barbour, Richmond, Va. Alludes to a former letter on the subject of torpedoes; he wrote to Fulton at the same time, and encloses the latter's reply; it is important to make a striking example of some one ship of the enemy; he recommends that a corps of watermen be formed in the Chesapeake, with a fleet of shallops, ostensibly for preventing smuggling and the supply of provisions to the enemy; the torpedo might then be introduced with-

out *délat* or warning; the U. S. government would contribute arms and ammunition, though perhaps it might not countenance the plan at first, because of the too prevalent state jealousies. A. L. S. Endorsed. 3 pp. 4°.

Madison (James). Washington, June 16, 1814. To Gov. [James] Barbour. In answer to a letter of the 13th inst. he says that late events in Europe put it in the power of Great Britain to direct a greater force against the United States; they cannot rely on her being restrained by an estimate of her own interest in making peace, or by respect for the sentiments of her allies; to meet the threatened invasion the regular troops will be used as far as they go, the deficiency must be supplied by militia; the strength and destination of the enemy being unknown, an immediate call for the militia would have certain disadvantages; those states that have military means of their own will use them as they think best. A. L. S. 3 pp. 4°.

Printed in *Letters and Writings of Madison*, vol. 2 (Phila., 1865) p. 583.

Monroe (James). Washington, Oct. 26, 1814. [To James Barbour.] Encloses a copy of his report to the committees of congress in order to show the views of the executive respecting the measures proper to be adopted for the defence of the seaboard, and for offensive operations elsewhere; it is a delicate question how far the number required in this plan might be lessened in expectation that a part of the force would be raised by the individual states; if one state were allowed to raise troops with that understanding, others and all might claim the privilege, and some states might fail in raising men, or might not even try; however, such forces would certainly be superior to the militia, and in case the invasion of a state made necessary a call for the militia, the offer of such a force as a substitute would gladly be accepted; the enclosed paper is communicated in confidence, but may be shown to proper friends. A. L. S. 2 pp., 1 l. 4°.

Giles (William Branch). Washington, Nov. 20, 1814. To James Barbour. He thanks Barbour for his aid in repelling the unmerited attacks of deluded partisans, and congratulates him on his election to the senate, wishing that they might have had his counsel there before, to avert some portion of the evils that have befallen the country; he purposes to resign after March 4, unless impelled to serve out the term by outrage and injustice. A. L. S. 2 pp. 4°.

Bernard (Simon), *Baron*. Paris, Nov. 10, 1815. To Henry Jackson, chargé d'affaires of the United States at Paris. Sends the letter written to the secretary of war of the United States, and adds a recommendation of himself by Gen. La Fayette; he regrets the absence from Paris of M. Carnot, who as governor of Antwerp in 1814 was in a situation to judge of the great works executed by him there; will arrange his affairs while awaiting the reply of the secretary. Translation in the handwriting of W. H. Crawford, signed by him. 2 pp. 4°.

Enclosed in Crawford's letter to Barbour of Apr. 9, 1816.

Barbour (James). Washington, Dec. 5, 1815. To James Barbour, Jr., Cambridge [Mass.]. Encloses the president's message; it is pronounced by all parties one of the happiest efforts of Madison's mind. A. L. S. 1 page, 1 leaf with address. 4°.

Roane (Spencer). Richmond, [Va.,] Jan. 4, 1815 [*i.e.* 1816]. To James Barbour, Washington. The legislature on the preceding day appointed Gen. [Armistead Thomson] Mason to be Barbour's colleague in the senate; the legislature is besieged by deputies from various unchartered banks in the upper country, praying for charters; dreadful state of the banks at Richmond; if congress had the power, a national bank or a national currency ought to be established; inquires as to the proposed naval depot in York River; Mr. Hay's speech on the mandate question is in the *Enquirer* of this day; public opinion, including that of Jefferson, favors the decision of the court; he thinks congress must act on the question, for the 25th section of the judicial act can never be enforced in Virginia. A. L. S. 2 pp. and 1 leaf with address and endorsement. 4°.

Swift (Joseph Gardner). Washington, Jan. 6, 1816. To William H. Crawford, Sec. of War. Recommends an increase in the number of officers of the engineer corps by the addition of one lieutenant colonel, two majors, six captains, and twenty lieutenants, the grade of second lieutenant to be abolished; such an increase necessary for the construction of proposed new fortifications, as well as for repair of old ones, coast survey, and other engineering work. A. L. S. Endorsed. 4 pp. 4°.

Enclosed in Crawford's letter to Barbour of Apr. 9, 1816.

Roberdeau (Isaac), and **Anderson** (James). Washington, Jan. 15, 1816. Memoir to the secretary of war, pointing out the value and usefulness of the topographical department; they presented to Gen. Swift partial reports on their own surveys of the Champlain frontier, the Cadaraqui, Lake Ontario, and Niagara during the past year; their field notes are ample, requiring only time for perfect arrangement; they recommend a complete survey of the frontiers of the United States, a work which, together with the survey of the sea-coast and the establishment of the Canadian boundary, could best be done by a corps of topographical engineers. Copy, in the handwriting of Roberdeau, signed by him. 7 pp. 4°.

Enclosed in Roberdeau's letter to Barbour of Feb. 2, 1816.

Roberdeau (Isaac). Washington, Feb. 2, 1816. To James Barbour, chairman of the committee of senate on military affairs. Encloses copy of a memoir lately presented to the secretary of war on the subject of the topographical department; detached drawings and separate reports on the most

important places on Champlain, Ontario, and Niagara had also been presented to the secretary; Maj. [John] Anderson and himself ask permission to exhibit these to Barbour. A. L. S. 1 page, 1 leaf with address. 4°.

Barbour (James), and *others*. Washington, Feb. 9, 1816. [To the Virginia Legislature.] On arriving here they supposed that Monroe would receive the undivided support of the republican party, but they find that serious dissensions are likely to ensue; Crawford's friends assert that he has a majority in congress; believing that the purpose of a caucus is to give concert to public opinion and not to attempt to influence it, and believing that the people desire to elect Monroe, they have resolved to refuse a caucus if Crawford is pressed; in a caucus, New York would throw her weight against them, though it is doubtful whether a single republican elector can be elected in that state; also, Vermont, New Hampshire, and Massachusetts are now represented by federalists who would be excluded from caucus, although all those states will probably choose republican electors; they therefore advise that the legislature recommend such persons for electors as will conform to the wishes of the state, postponing their action however until the close of the session; this letter is intended for republican friends only. A. L. S. Signed also, Armistead T. Mason, James Pleasants jr., Thos. Newton, Wm. H. Roane, Hugh Nelson. Endorsed. 3 pp. 4°.

Roane (Spencer). Richmond, [Va.,] Feb. 12, 1816. To James Barbour, Washington. Acknowledges letter enclosing Barbour's speech [on the act to regulate commerce according to the convention of 1815]; he has differed with Barbour on this subject ever since 1795, when the opposite doctrine was the one generally held by republicans; he considers it dangerous to expound the constitution in such a way as to extend the treaty-making power; as for confidence in the president and senate, Burr came near being president, and Gunn, Dayton & Co. were senators; the republicans in the legislature will have a caucus to nominate electors; the opinion here will prevail, to run Monroe, whatever is done at Washington, unless it would endanger the cause and bring in a federalist; he has just been approached on the subject of making Jefferson an elector. A. L. S. Endorsed. 3 pp. 4°.

Jefferson (Thomas). Monticello, [Va.,] Mar. 5, 1816. To James Barbour, Barboursville, Orange [Va.]. Sends certain seeds and plants, with directions and description. A. L. S. 1 page, 1 leaf with address. 4°.

Nicholas (Wilson Cary). Richmond, [Va.,] Mar. 16, 1816. To the Senators and Representatives from Virginia in Congress. In compliance with enclosed resolutions of the general assembly, he has asked the attention of the president and governors of states interested in the matter to the protection of Chesapeake Bay in time of war; it is now possible for a small hostile force to cut off commerce, and gain admission to the heart of the country, as was experienced in the late war; considering the bulk of produce involved, and the weight of population, there is no object more important to the United States; it would be most desirable to fortify the Capes of Virginia; if this be

impracticable, the lowest position on the bay that affords a good harbor should be fortified. L. S. 3 pp., and 1 leaf with copy of resolutions. 4°.

Crawford (William Harris). War Department, [Washington,] Apr. 9, 1816. To James Barbour, chairman of the military committee. Transmits papers, including a report by Gen. Swift of the corps of engineers; the General is anxious that provision be made for one or more of the able engineers now obtainable in France; Bernard, though a major general, would probably accept an appointment as brigadier; it would be taxing Gen. Swift's patriotism too highly to suppose that he would solicit the appointment of another over his own head; two brigadiers will therefore be necessary in the corps, in order to secure Gen. Swift's present rights, and at the same time obtain for the country the services desired in the important fortifications to be undertaken; the recommendation for abolishing the grade of second lieutenant in the corps is reasonable. A. L. S. 3 pp. 4°.

Lee (Roswell). U. States Armory, Springfield, Mass., Apr. 16, 1816. Report on the Springfield Arsenal, describing the buildings and machinery, and stating the number of men employed and the quantity of muskets manufactured. D. S. 2 pp. F°.

Jefferson (Thomas). Monticello, [Va.,] Jan. 19, 1817. To James Barbour, Washington. Having an intimate acquaintance with Col. Trumbull, he can bear witness to his worth as a man and a painter; in Europe, Trumbull was considered superior to West; Baron Grimm gave him the preference, and came often to Jefferson's house in Paris to see his works; in England, West was preferred by the king, and others followed suit; it is desirable that Trumbull's paintings should be retained in this country. A. L. S. 1 page, 1 leaf with address. 4°.

Barbour (James). Senate Chamber, [Washington,] Mar. 3, 1817. To [Henry] Clay, Speaker of the House of Reps. Concerning the proposed occupation of the chamber of the house by the senate in order to attend the inauguration of the president, and the view expressed by Clay, in conversation, that such occupation would be an assumption and any order of the senate for arrangement of the furniture inadmissible; the views of the senate committee are essentially different. L. S. 1 page. 4°.

Clay (Henry). House of Representatives, [Washington,] Mar. 3, 1817. To James Barbour. The senate has no right to regulate the hall of the house of representatives, or to arrange the furniture thereof, or introduce other furniture without the concurrence of the house; at the same time the house would be pleased to have the senate attend in the hall next day during the inauguration, when the furniture of the hall will be quite at their service. A. L. S. 1 page, 1 leaf with address. 4°.

Monroe (James). [Washington,] Mar. 3, 1817. To James Barbour. He hopes that the law respecting the claim of Georgia, on account of her land cession, may pass this night, as the continuance of Mr. C. [Crawford?] in the administration depends on it. A. L. S. 1 page, 1 leaf with address. 4°.

Barbour's reply is calendared as EM. 14998.

King (Rufus). Jamaica, L. I., Aug. 18, 1818. To James Barbour, Barboursville, Va. Public opinion in New York and the east will support the measures of the last session concerning navigation; the reunion of public opinion on this subject will have happy results for the country; they have little to hope from concessions by England; industry must be protected by cautious regulations, such as the navigation law, which closes the ports against Nova Scotia and New Brunswick in spite of England's device of a free port law respecting those colonies; it may become necessary to suspend trade with Bermuda and the Bahamas. A. L. S. 3 pp. 4°.

Preston (John). Richmond, [Va.,] Dec. 14, 1818. [To James Barbour?] Concerning the bill before the senate for erecting a judicial district on the western waters, the delegates from the western section in the Virginia legislature concur in recommending that the boundaries of the counties should be followed, rather than the natural boundaries proposed in the bill, as the summit of the Allegany is equivocal in many parts, with much interlocking of the heads of watercourses, whereas the county lines are well determined, either by actual running, or by strong natural features. A. L. S. 4 pp. 4°.

Ritchie (Thomas). Richmond, [Va.,] Jan. 4, 1819. To James Barbour, Washington. He had already put to press Madison's Report before it was ordered by the house of delegates; description of the work; they are all waiting with anxiety for the coming on of the Missouri question; asks if the Florida project is defunct; he has received a MS from one of the ablest heads of Virginia, a '98 man, entitled *Construction construed, and State Rights defended*; thus the spirit moves. A. L. S. 3 pp. 4°.

Brockenbrough (William). Richmond, [Va.,] Jan. 25, 1819. [To James Barbour, Washington.] Acknowledges copy of Barbour's speech on the new judiciary bill, and agrees with him in thinking that the judges of the supreme court ought to be exclusively judges of that court, and that the judges of the district courts of the U. S. ought to be and are able to perform all the duties of the present circuit courts; he does not see the necessity for additional judges, and this great increase of executive patronage ought to be avoided; he hopes they may not live to see all the powers of government converging to the executive vortex. A. L. S. 4 pp. 8°.

Roane (Spencer). Richmond, [Va.,] Jan. 30, 1819. To James Barbour, Washington. He agrees with Barbour's course on the judiciary bill and the proposed amendment to the constitution; while he would support the federal judiciary in all its legitimate objects, he would not set up a batch of courts strong enough to withdraw from the state courts their proper powers, nor would he reproduce the horde of judges which in the days of Adams was so abhorrent to the American people. A. L. S. 1 page, 1 leaf with address and endorsement. 4°.

Roane (Spencer). Richmond, [Va.,] Feb. 16, 1819. To James Barbour, Washington. Though he was one of those who did not see that congress possessed the power to establish the bank, he now concurs in the necessity of supporting it, as general distress would follow its arrest or even the too hasty winding up of its affairs; a memorial has been

drawn up here, on the subject, and will be forwarded; with respect to [Andrew] Jackson, while his conduct was violent and irregular to say the least, his enormities were perhaps inseparable from that boldness of character which had made him so useful. A. L. S. 2 pp., 1 leaf with address. 4°.

Crawford (William Harris). Washington, Sept. 18, 1819. To James Barbour. He regrets that owing to the state of finances and the absence of other heads of departments, his duties as secretary of the treasury will prevent him from visiting Barbour in Orange; he has no intention, as seems to be feared, of assailing the state banks; discusses at length the subject of the currency and the contest between the bullionists and the antibullionists; an inconvertible paper currency might be devised, more uniform in value than one convertible into coin; tendency of specie to appreciate, owing to growth of population; other factors in the case; discussion of the affairs of the Bank as affecting the country at large. A. L. S. 16 pp. 4°.

Monroe (James). [Washington,] Feb. 3, 1820. [To James Barbour.] He has reflected on Barbour's statement of the day before, that they would have a majority of only one vote on the question of making the admission of Maine dependent on the admission of Missouri without restriction; he thinks the best course for the Union and for the southern states would be to separate the two questions and admit Maine; this could be done with honor, and with advantage to the object desired, that is, the unqualified admission of Missouri; he advises the southern members to say that they had acted in self defense, to save the constitution and the peace of their country, but that they had now resolved on a different course, and, in view of the patriotism of Maine, and the distressing dilemma of those eastern members who, in order to save the constitution, had voted with them against their own constituents, they would admit Maine and leave the question of Missouri to rest on its own merits; this course would put the southern members on high ground, and would secure a better result in the end. A. L. S. Endorsed. 3 pp. 4°.

Tucker (Henry St. George). Battail's, 11 miles above Fredericksburg, [Va.,] Feb. 11, 1820. To James Barbour, Washington. He cannot describe the sensation in Richmond over the intelligence conveyed in Barbour's letter; a compromise that gives up the fairest portion of the western territory can never be grateful to them; if it is done to secure admission to Missouri, better that she should wait; if it is for fear that the president may lose his election, they are unwilling to purchase his services at the price of the rights of the south; the caucus adjourned accordingly; he trusts they will be able to find some man not committed to their foes, the northern politicians; asks whether [Langdon] Cheves might be looked to in such an event; Monroe must either retain his southern friends, or exchange them for those of the north. A. L. S. 2 pp. F°.

Madison (James). Montpelier, [Va.,] Feb. 14, 1820. [To James Barbour? Washington?] Acknowledges letter of the 10th, which states that there is a decided majority in one house against the unrestricted admission of Missouri, and a majority in both for applying the restriction to all

territories west of the Mississippi, but that in a spirit of compromise Missouri will be admitted without restriction, and the restriction as to territories will be confined to the space north of latitude 36° 30'; between these alternatives, he thinks the latter is preferable as a lesser evil, to those who regard both as evils; but since the advocates of restriction yield the principle by such a partition, he asks why in equity the partition should not correspond with the estimated proportions in which the common property was paid for by the two kinds of owners. A. L. S. 2 pp. 4°.

Crittenden (John Jordan). Frankfort, [Ky.,] Apr. 3, 1820. To James Barbour, Washington. He hopes to get a favorable decision for Barbour in his suit for lands in this state; regrets his own absence from congress during the debate on the Missouri question, when he would have wished to take his part in the great battle fought for the constitution; as soon as he can make \$50,000 he will again be a candidate for the senate. A. L. S. Endorsed. 3 pp. 4°.

United States.—Senate. Nov. 20, 1820. Order appointing [James] Barbour, [Nathaniel] Macon, [James] Brown, [William] Hunter, and [Rufus] King to be the committee on foreign relations. A. D. S., Charles Cutts secy. 1 page. F°.

Crawford (William Harris). Washington, July 25, 1821. To James Barbour. The French negotiation is not finally broken off, but it cannot succeed in any one point; he fears the development of a hostile spirit between the two countries; and some act of retaliation by France for the supposed indignity to her flag in the case of the *Apollo*. A. L. S. 4 pp. 4°.

Ritchie (Thomas). Richmond, [Va.,] May 21, 1823. To James Barbour, Barboursville, Orange [Va.]. He has been so much gorged with mere trash on the presidential election that he entreates Barbour to execute his design of addressing the people on the merits of W. H. C[rawford]. A. L. S. 1 page, 1 leaf with address. 4°.

Monroe (James). Washington, June 14, 1823. [To James Barbour.] Encloses a letter from S. Gouverneur written to ascertain the allegations made against the appointment of Mr. Prevost as chargé d'affaires to Peru; he has great difficulty in filling the vacancy occasioned in the supreme court by the death of [Henry Brockholst] Livingston; [Smith] Thompson declines it, for fear of injury to his health; objections to some of the other names proposed. A. L. S. 2 pp. 4°.

Duval (William P.) St. Augustine, [Fla.,] Aug. 12, 1823. To James Barbour, Barboursville, Orange, Va. Acknowledges letter of June 13 by E. Macon; the latter distinguished himself in a murder trial the day after his arrival, triumphing over an old and cunning lawyer; he will befriend Macon, whose principles are purely those of Virginia; he has had some trouble and abuse in this territory; the people have always been with him, but the Yankees, whom he cannot trust with small appointments, have slandered him; New York has sent her worst spawn to this territory; the northern men are much enraged at the influence of Virginia. A. L. S. 3 pp. 4°.

Van Buren (Martin). Albany, [N. Y.,] Oct. 9, 1823. To James Barbour, Barboursville, Va.

The delegation is so scattered that he cannot say what their feelings would probably be on the question of a clerk, but doubts whether they would be inclined for a change; he is gratified by the expectation that Barbour and himself will be on the same side in the coming contest. A. L. S. 2 pp., 1 leaf with address. 4°.

Hay (George). Washington, Nov. 22, 1823. To James Barbour, Orange Co., Va. He understands that at the close of the last session of the senate, the members were disposed to dismiss their secretary; a proposition directing a biennial election of secretary was brought forward; if the place becomes vacant, he should like to be appointed; the office is totally unconnected with the president, and he would have time during the recess to accomplish a purposed work on constitutional law. A. L. S. 2 pp., 1 leaf with address and endorsement. 4°.

Madison (James). Montpelier, [Va.,] Dec. 5, 1823. To James Barbour. The message of the president indicates the sentiments of the country with respect to cooperation with Great Britain against the resubjugation of South America by the allied powers; resolutions by Congress would also be of avail; they should move hand in hand with Great Britain in awing the powers into forbearance; failing in that, they must then use means which cannot fail; this hemisphere must be protected from the doctrines and despotisms of the other. A. L. S. 2 pp. 4°.

Printed in *Letters and Writings of Madison*, vol. 3 (Phila., 1865) p. 350.

Tyler (John). Richmond, [Va.,] Jan. 5, 1824. To James Barbour, Washington. He knows not how to account for the vote rejecting the resolutions recommending congress to hold a caucus for naming a presidential candidate; men whom he had trusted deserted him in the hour of trial, nor is [Thomas] Ritchie blameless; a caucus is to be held this night; he fears it will break up in confusion; writing later he says that they went into caucus and came out triumphantly with only four negatives; Virginia stands erect once more. A. L. S. 2 pp., 1 leaf with address. 4°.

Monroe (James). [Washington,] Mar. 14, 1824. [To James Barbour.] He is greatly surprised by the insulting and reproachful terms addressed to him in the paper from the senators and representatives of Georgia; the address to the Cherokee chiefs now here was drawn up by himself and read to [John] Elliot and [John] Forsyth, who seemed to approve it; their comments are therefore the more inconsistent; he has lost no opportunity of pressing cessions from the tribes within the state, and with good effect; he desires to have this paper shown to Crawford, who, as he thinks, knew nothing of the proceeding, with a view to having it withdrawn; if submitted to congress with the other papers, the sentiments relating to the Indians, urging the right and obligation of the United States to drive them from the country, would hurt the feelings of the whole Union. A. L. S. 3 pp. 4°.

Monroe (James). Washington, Mar. 16, 1824. To James Barbour. He will send a message to congress, in compliance with the wishes of the executive of Georgia, to bring under consideration that state's desire for a further cession from the

Creeks; he wishes Barbour to see Crawford on the subject of withdrawing the offensive letter of the Georgia representatives; if not withdrawn, he must submit it to congress with the other documents. A. L. S. 2 pp., 1 leaf with address. 4°.

Pleasants (James). Richmond, [Va.,] Mar. 25, 1824. To James Barbour and John Taylor, U. S. Senate, Washington. He forwards the required information respecting Virginia's claim for interest on money advanced to the general government during the late war; the auditor prepared the accounts; Chapman Johnson added thereto a statement presenting the case and recommending that it be adjusted without the passage of a law. A. L. S. 2 pp., 1 leaf with address. 4°.

The papers referred to are printed in *Calendar of Virginia State Papers*, vol. 10, p. 506.

Harrison (William Henry). Cincinnati, Apr. 18, 1824. To James Barbour. He deeply regrets the divisions in the democratic party; though opposed to caucus nominations, he has never ceased to vindicate the men who composed that recently held at Washington, as well as the nominee [Crawford], from the uproar raised against them; the people of Ohio are so strongly against Crawford, that if chosen an elector he could not rightly vote for the latter, even if his own favorite candidate, Clay, were to withdraw; however, if Clay withdrew before the election for electors, Harrison would be willing to offer himself as a Crawford candidate; he inquires what the course of Crawford's friends in Virginia will be if they find that the vote of New York will not be in his favor; if they persevere for Crawford, they run the risk of elevating Adams or Jackson; the latter has considerable strength in this state; his supporters appeal to the passions of the people, hence the difficulty of arresting their progress. A. L. S. Endorsed. 4 pp. 4°.

Jefferson (Thomas). Monticello, [Va.,] May 2, 1824. To James Barbour, Washington. The government could not take into its employ a man of more integrity than Cathcart; while consul on the Barbary coast immense sums passed through his hands; inquires what may be expected as to the \$50,000 for the University; if they get it, they can open splendidly Feb. 1; if not they must start without books or apparatus. A. L. S. 1 page, 1 leaf with address. 4°.

Gales (Joseph), and **Seaton** (William Winston). Washington, Oct. 17, 1824. To James Barbour. Gallatin has authorised them to withdraw his name from the contest for the vice presidency; this will be done as soon as they hear from Richmond as to a substitute; they suppose Clay will be named as more acceptable to the people than Gallatin or any other; he may decline to serve; if so, his refusal will be too late to affect the elections, and it will then be time enough to offer another candidate to the electors. L. S., Gales & Seaton. 1 page. 4°.

Barbour (James). Richmond, [Va.,] Dec. 1, 1824. To Gales and Seaton, Washington. The electoral college voted unanimously for Wm. H. Crawford for president and Nathaniel Macon for vice president; a vacancy having been made known to the legislature the day before, Col. Wyatt was elected as a Crawford man, with but three negatives. A. L. S. 1 page, 1 leaf with address and endorsement. 4°.

Hall (Bolling). Ellerslie, Montgomery Co., Ala., July 15, 1825. To James Barbour. In the matter of the unfortunate collision between the general government and the governors of South Carolina and Georgia, he thinks the citizens of those states would make any sacrifice for harmony, also that any invasion of their constitutional rights has been through inadvertence; the opinion of the attorney general on the law of South Carolina that prohibits the introduction of free persons of color, saps the foundation of state rights; he blames the Indian agent, Crowell, for insulting the people of Georgia in regard to their election of Gov. Troup, and for making no exertions to carry out the president's views and prepare the Indian chiefs to cede their lands; furthermore, he holds Crowell responsible for the murder of [William] McIntosh, the friendly chief. A. L. S. 3 pp. 4°.

Adams (John Quincy). Aug. 31, 1825. To James Barbour.

Calendared as EM. 1402.

Clay (Henry). Lexington, [Ky.], July 17, 1826. To [James] Barbour. Forwards a letter from Mr. Sloane respecting the survey of a proposed road; they have just heard of the death of Jefferson; all must be pleased that it happened on the day it did. A. L. S. 1 page, 1 leaf with endorsement. 4°.

Adams (John Quincy). Quincy, [Mass.], July 26, 1826. [To James Barbour.] Transmits a letter from R. H. Wilde and John Moore, with certain resolutions of the inhabitants of Summerville, near Augusta, Ga., and a remonstrance against the removal to their vicinity of the U. S. arsenal; respecting the subscription made at Washington July 4 for the benefit of [Thomas] Jefferson, he desires that his part may be transmitted to Jefferson's daughter, Mrs. Randolph, for her own use. A. L. S. 1 page, 1 leaf with endorsement. 4°.

Brown (Jacob). H. Q. Saratoga, [N. Y.], Aug. 13, 1827. To James Barbour [i.e. Barbour]. His tour was a happy one, and he found the army in all respects as well as he had expected; the threatened Indian trouble in Michigan cannot amount to much; from Maryland to Louisiana, public opinion is unfriendly to Adams, but it cannot be called friendly to Jackson; Kentucky is Clay's state; things are gratifying in New York; if the electoral college were chosen by a general ticket, all opposition would sink before the friends of Adams; even as it is, they have nothing to fear. A. L. S. 2 pp. 4°.

Adams (John Quincy). Quincy, [Mass.], Aug. 21, 1827. To James Barbour, Sec. of War, Washington. He learned with pleasure that the prospects of an extensive combination among the Indians of the northwest was not so menacing as had been apprehended, but waits with some anxiety to hear of the arrival of Gen. Atkinson's command at Prairie du Chien; the renewed complaint of the Creeks against Col. Crowell requires consideration; their pretensions, that they want no agent from a state south of Virginia, and that no part of their annuity should be paid to the Mackintosh party, are both inadmissible. A. L. S. 2 pp., 1 leaf with endorsement. 4°.

Johnson (Francis). Bowling Green, [Ky.], Aug. 31, 1827. To James Barbour, Washington.

The past election will be a salutary lesson to their friends in this district, who were so over confident that many did not vote; the opposite party dragged every one to the polls, including many Tennesseans; the border counties turned the election; the people there had been alarmed a few days before by being told that Adams was an Englishman and that he had written to the king to send over his armies and conquer the country; the pamphlets, handbills, etc., sent into this district must have cost \$2,000; he had rather be left out as an Adams man than elected as a Jackson man; Buchanan's letter created a great hubbub; Eaton, who was not in Nashville when the letter arrived there, was sent for post haste, presumably to mend up B.'s tale; let them fall out among themselves, and the people may be able to see the truth that they are the intriguers and the slanderers of the best men in the nation; when Jackson passed through here in 1825, he told the people that he would not have accepted the presidency on the terms on which Mr. Adams had taken it, of bargain and intrigue; he does not despair of Kentucky, now that their friends have been roused. A. L. S. Endorsed 3 pp. 4°.

Peters (Richard). Philadelphia, Sept. 1, 1827. To James Barbour. A new edition of the pamphlet, *The Law and the Facts*, exposing the case of the six militiamen, is called for; applications have been made from adjoining states for from 100 to 5,000 copies; the publication has done more in Pennsylvania than any individual effort; he reminds Barbour of the latter's confidential reply to a former letter on the case of the militiamen, on the authority of which reply the statements relative to the correspondence between Gov. Blount and President Madison were made; he wishes to obtain for future editions of the tract any documents that may be in the war department relating to the application by Gov. Blount to the president, the payment of the men under Col. Pipkin, and any correspondence of Jackson on the trial and execution of these men; it is said, on the unofficial authority of a gentleman in the war department, that there is a letter from Jackson in which the execution is admitted to have been a little beyond *summum jus*; everything indicates a change of opinion in Pennsylvania; they now have almost all the considerate members of the democratic party, as well as three fourths of the federals. A. L. S. Endorsed. 3 pp. 4°.

Powell (Alfred H.). Winchester, [Va.], Sept. 21, 1827. To James Barbour, Barboursville, Orange Co., Va. The general impression is that a majority of this county is for Jackson, as a result of the noisy course pursued by the latter's friends; he himself thinks differently; the friends of the administration will have a meeting and send delegates to Richmond; neighboring counties will follow a similar course. A. L. S. 1 page, 1 leaf with address and endorsement. 4°.

United States.—State Department. Washington, June 12, 1828. Instructions to James Barbour, Envoy Extraordinary and Minister Plenipotentiary to Great Britain, stating in detail the duties of his office. D. S., H. Clay. 34 pp., 1 leaf with endorsement. F°.

Adams (John Quincy). Washington, June 26, 1828. To James Barbour, Envoy Extraordinary and Minister Plenipotentiary to Great Britain. Barbour's instructions were prepared before the de-

parture of Mr. Clay for Kentucky on the 22d; he invites Barbour to take up his residence with him during the time in which he shall remain here. A. L. S. Endorsed. 1 page. 4°.

King (Charles), *and others*. New York, July 23, 1828. To James Barbour. The citizens of New York desire to give him a public dinner before he sails as minister to England. A. L. S. Signed also by nine others. 2 pp., 1 leaf with endorsement. 4°.

McKenney (Thomas Lorraine). July 24, 1828. To James Barbour. Sends his reply in pamphlet form to the attack made on him in the *Telegraph*; the newspapers refused to print his reply because of the remarks on [Richard] Cutts and the quotation from the [congressional] committee, both of which were necessary for his own defense and that of Barbour. A. L. S. 2 pp., 1 leaf with address and endorsement. 4°.

Cutts (Richard). Washington, July 26, 1828. To James Barbour. Barbour's letter of May 31, made public by Thomas L. McKenney, censures Cutts's official conduct in the settlement of McKenney's accounts; he explains his action in the matter; the accounts were in such form that the amount expended for presents to the Indians could not be distinguished from contingent expenses. L. S. Endorsed. 4 pp. 4°.

Cutts (Richard). Washington, July 27, 1828. To James Barbour, New York. As McKenney has intimated an intention of laying his papers before congress, Cutts desires an answer to his letter of the day before; explains further his course with regard to McKenney's accounts. A. L. S. Endorsed. 3 pp. 4°.

Lawrence (William Beach). London, Aug. 16, 1828. To James Barbour. Hearing that Barbour was to sail on the 1st inst. he made arrangements with the customs officers at Liverpool; news of the legation; the King of the Netherlands was selected as arbiter in conformity to the late convention; Great Britain refuses the demands as to jurisdiction on the northeastern frontier; excitement over the new tariff. A. L. S. Endorsed. 4 pp. 4°.

Hughes (Christopher). Brussels, Aug. 27, 1828. To James Barbour, London. Proffers his correspondence; though only a subaltern in the diplomatic corps, he is well versed in European habits; he hopes Barbour may not lose Lawrence, who showed great devotion and skill; recommends the new Swedish minister, Count de Björnstierna; the father of the countess served with Pulaski in America. A. L. S. 4 pp. 4°.

Brown (James). Paris, Aug. 28, 1828. To James Barbour [London]. Alludes to their long friendship and the mutual help they can render in diplomatic questions; France professes to be at peace with all the world, yet if the Porte should reject her plan for the pacification of Greece, the armament that sailed from Toulon may commence hostilities, or it may be employed against Russia in case the Porte submits to terms and Russia pushes her conquests too far; two American ships were freighted by French agents for the expedition from Toulon; the American consul did not consider himself authorised to prevent their sailing; asks advice as to similar cases in future. A. L. S. 3 pp. 4°.

Hughes (Christopher). Brussels, Sept. 16, 1828. To James Barbour, London. Discusses at length the intended marriage of the Princess to Prince Gustavus of Sweden, and the dissatisfaction of the nation as well as the reigning house of Sweden with the match; mentions his own friendship with the King of Sweden during his eight years residence at Stockholm, and the king's regret over the parsimonious policy that withheld from him an American minister of the first rank; he blames the vulgar ignorance of Chilton and the spleen of that parliamentary pedagogue, John Randolph, who consider all diplomatic expenditure useless. A. L. S. 9 pp. 8°.

Clay (Henry). Department of State, Washington, Oct. 16, 1828. To James Barbour [London]. Concerning the selection of the King of the Netherlands as arbiter of the disputed points in the settlement of the boundary line under the fifth article of the treaty of Ghent; [Christopher] Hughes is instructed to make application to the King simultaneously with the British minister. L. S. Endorsed. 3 pp. F°.

Gordon (George Hamilton), *4th Earl of Aberdeen*. Foreign Office, [London,] Oct. 31, 1828. To James Barbour [London]. Authenticated copies of the documents enumerated in Barbour's note will be furnished him, according to the terms of the convention of 1827, excepting two which do not come within the meaning of the treaty; other papers demanded must be individually specified. L. S. 4 pp. F°.

Mercer (Charles Fenton). Washington, Nov. 18, 1828. To James Barbour [London]. The [Chesapeake and Ohio] canal is making rapid strides westward; it will reach the mouth of the Shenandoah next year; beyond Cumberland, its progress will depend on the supply of labor; there are so many public works in America that laborers are difficult to be had even at the high price of ten or twelve dollars per month with board and whiskey; he desires Barbour to promote the effect of an enclosed notice designed chiefly for Ireland; it would be beneficial to England as well as to America to relieve the former country of a wretched and surplus population; after five years every laborer might rely on being able to till a farm of his own; the British ministry might even be willing to encourage the emigration of three thousand hands from Ireland; on [Charles] Carroll's estates are many catholics who have their churches and priests; the Marchioness of Wellesley might aid in the project; asks if Scotch laborers could be brought out from Glasgow. A. L. S. 4 pp. 4°.

Rush (Richard). Washington, Nov. 26, 1828. To [James] Barbour [London]. The [Chesapeake and Ohio] canal is going on beyond expectation; contractors have flocked in; if the corporations get their loans, there will be funds enough to complete the work to Cumberland; private subscriptions have been paid promptly, as have the installments of the United States and Maryland; they chiefly want laborers; he has nothing to say about politics, so badly have they been beaten. A. L. S. 3 pp. 4°.

In duplicate.

Lawrence (William Beach). Paris, Nov 28, 1828. To James Barbour, London. He regrets that Barbour should meet any inconvenience re-

specting the arbitration convention; the article on the subject of evidence was drafted with care and was a favorite with Gallatin, who conceived that as all the old documents relating to the disputed territory were in possession of the British, it would operate in favor of the United States; the English plenipotentiaries assented to it only after repeated refusals; he thanks Barbour for recommending him as chargé d'affaires to Prussia; the French claims are in the same state in which they have been since the restoration of the Bourbons. A. L. S. 4 pp. 4°.

Perkins (Jacob). London, Dec. 5, 1828. To [James] Barbour [London]. He wishes to inform the United States government that his steam artillery is now in tangible shape; a committee appointed by the French government has recommended its adoption; what else he has to communicate shall be in private. A. L. S. 2 pp., 1 leaf with endorsement. 4°.

Hughes (Christopher). Brussels, Dec. 9, 1828. To James Barbour, London. He has not yet received his instructions concerning the reference of disputed points to the King of the Netherlands, though he has seen Lord Aberdeen's instructions to Sir Charles Bagot and a copy of Clay's letter to himself; they are waiting for the arrival of his papers. A. L. S. 2 pp., 1 leaf with endorsement. 4°.

Monroe (James). Oak Hill, [Va.,] Dec. 18, 1828. [To James Barbour, London.] He would have written letters of introduction sooner, but was confined for two months by a wound in his leg with accompanying fever caused by a fall from his horse. A. L. S. 1 page. 4°.

Hughes (Christopher). Brussels, Dec. 19, 1828. To James Barbour, London. He is still without his despatches; it is extraordinary that the instructions for a government agent abroad should first come to him through the representatives of another, and adverse party; he blames the people at Washington, where nothing seems to have been attended to except the election; a prolongation of the presidential term might remedy this unprofitable state of things; regrets the loss of time in the present business; the king will be much pleased with the choice of him as arbiter; as for the presidency, he cannot agree with Barbour's sentiment "God save the Republic," for though Jackson is not as wise and competent a statesman as Adams, he believes him to be as true a friend of free institutions; alludes to an article in *The Age* on the president elect, showing the inveterate hatred of the British for America. A. L. S. Endorsed. 4 pp. 4°.

Hughes (Christopher). Brussels, Dec. 30, 1828. To James Barbour, London. Discusses the presidential election; he does not believe that the people were exclusively dazzled by Jackson's military glory; he cannot admit analogies between the people of the old and the new world in the matter of popular gullibility; the delay of his despatches may have been caused by the submission of the business to the senate. A. L. S. 4 pp. 4°.

Barbour (Philip Pendleton). Washington, Jan. 27, 1829. To James [Barbour, London]. He was interested by his brother's description of London; speculates as to Jackson's cabinet; he expects no offer for himself and would not accept one, pre-

ferring the independence of his estate and his private practise; changes in the senate; Adams is said to have written a letter supporting his charge against the federalists of the north; entertainments at Washington. A. L. S. Endorsed. 3 pp. 4°.

Brooke (Francis J.) Richmond, [Va.,] Jan. 27, 1829. [To James Barbour, London.] In the election, everything was lost except honor; it is probable that the tariff may be condemned as unconstitutional, notwithstanding Madison's vindication of it in two letters to Cabell; Barbour's situation is embarrassing, but he must consider himself the minister not of any cabinet but of the United States. A. L. S. 4 pp. 4°.

Taliaferro (John). Washington, Feb. 2, 1829. To James Barbour, London. The election closed in a Waterloo rout, with not a vote for Adams south of the Potomac or west of the Blue Ridge; the affected courtesy with which the victors bear their new dignity is amusing; as to official changes, a violent revolution is preparing, but all is uncertain until the hero of the drama arrives; his journey was delayed by the death of Mrs. Jackson; Major Eaton at the same time became entitled by marriage to the possession of Mrs. Timberlake, who it is supposed will do the honors of the White House; Calhoun, Van Buren, and John McLean will work the wires in the new show; jealousy is already apparent among them, and each will make a dreadful scuffle for his friends; he has consulted proper persons as to Barbour's position, and their opinion is that he had better make no move, but abide events; Barbour's colony for Florida arrived at St. Mark's with all well. A. L. S. 7 pp. 4°.

Skinner (John Stuart). Baltimore, [Md.,] Feb. 22, 1829. [To James Barbour, London.] He went to Washington to consult friends with regard to Barbour's position; it is unprecedented for a minister to be recalled without some special reason; as Barbour will probably wish to return in the autumn, it would be better for him to ask for his recall at that time, the next president being satisfied to wait until then to satisfy his partisans; probable composition of the cabinet; Tazewell is thought too anti-tariff for the treasury and will go as minister to England; severe winter; the mail coaches are travelling for more than a hundred miles on the Hudson river. A. L. S. Endorsed. 4 pp. 4°.

Smith (William). Washington, Mar. 17, 1829. To James Barbour [London]. Composition of the cabinet; the postmaster general is admitted to it for the first time; McLean, late postmaster, was appointed circuit judge; no change in the foreign ministers except for the recall of Gen. Harrison, who is succeeded by [Thomas P.] Moore; there is almost a total change in the collector's department, the auditors and chief clerks are quaking with fear; Clay, Calhoun, Van Buren, and perhaps McLean will all be in the field; the contest has evidently begun between them, and the country will be in a state of distraction for the next four years. A. L. S. Endorsed. 4 pp. 4°.

Adams (John Quincy). Washington, Apr. 10, 1829. To James Barbour, London. He received a valedictory address from the citizens of Essex and Middlesex counties in New Jersey, and as it was complimentary to all the members of the late administration, he took the occasion to testify pub-

licly to his own grateful sense of their services; he was glad to express thus his estimate of Barbour's share in the administration; the activity of the government is now chiefly perceptible by removals from office; rumors continue that Tazewell was offered the mission to Great Britain; there is a state of quietude except among the holders and the seekers of office. A. L. S. 1 page, 1 leaf with endorsement. 4°.

The signature has been cut away.

Lafayette (Marie Jean Paul Joseph Roch Yves Gilbert Motier de), *Marquis*. Paris, Apr. 12, 1829. To James Barbour, London. He invites Barbour to visit him at La Grange; Mrs. Brown's ill health determined the American minister to return home; news of the formation of Jackson's cabinet; the committee for the Bunker Hill monument sent him a drawing; it is a model of simplicity and grandeur; \$50,000 will complete the work; he asks if there is a subscription paper at London as at Paris. A. L. S. 2 pp., 1 leaf with address. 4°.

Gordon (George Hamilton), *4th Earl of Aberdeen*. Foreign Office, [London,] Apr. 15, 1829. To James Barbour [London]. In reply to Barbour's note expressing regret at the delay in furnishing documents in the British archives relating to the boundary, he says that copies were transmitted in February, except the copies of certain papers which will be sent to the United States government directly from New Brunswick. Contemporary copy. 3 pp. F°.

Van Buren (Martin). Department of State, Washington, May 12, 1829. To James Barbour [London]. The President appointed Louis McLane minister to Great Britain; Barbour may suit his own convenience as to waiting for the arrival of his successor; he is to assure the British government of the President's desire for friendly relations. L. S. Endorsed. 3 pp. F°.

Pleasants (John Hampden). Richmond, Va., May 30, 1829. [To James Barbour, London.] The newspapers do not give any idea of the horror and detestation caused by the President's proscription system and the despotic exercise of his power; it has produced in many cases an abandonment of Jacksonism, in others a silence and unwillingness to converse on the subject; unless the administration does something to recover favor it will go out at the end of four years; the fanaticism that prevailed when Barbour left is quite extinguished; the gentlemen partisans are on the defensive; the supplanting of Barbour by a federalist is not relished; he hopes Barbour will enter the assembly and be ready to take post under President Clay in 1833. A. L. S. 3 pp. 4°.

Barbour (James). London, July 10, 1829. [To Gales and Seaton, Washington?] He desires to have a correction made in certain remarks sent them for publication, the more so because his conduct is misrepresented at home; describes the conferring upon himself of the degree of Doctor in Civil Law by the University of Oxford, and the friendly feeling shown towards America; in mingling with the intelligent portion of the people he has endeavored to remove prejudice and hostility. A. L. S. Endorsed. 4 pp. 4°.

Clay (Henry). Ashland, (Ky.,) Nov. 21, 1829. To James Barbour, Barboursville, Orange Co., Va. Congratulates Barbour on his return from his foreign mission; being at leisure, he is improving his private affairs; he sees nothing in the condition of politics to discourage the hope of a speedy restoration of the reign of reason. A. L. S. 1 page, 1 leaf with address and endorsement. 4°.

Barbour (John S.) Richmond, [Va.,] Nov. 28, 1829. To James Barbour, Barboursville, Orange Co., Va. The [constitutional] convention cannot satisfy all parties; Monroe is frequently on the floor, too frequently for his reputation; [William Branch] Giles gave in a few words the most sensible remarks yet submitted; James Barbour has been mentioned for the chief magistracy. A. L. S. 2 pp., 1 leaf with address. 4°.

Barbour (Philip Pendleton). [Richmond, Va.,] Dec. 5, 1829. To James Barbour, Barboursville, Orange, Va. The [constitutional] convention this day decided the basis of representation by giving to the east and west such numbers as will allow the east a majority of six in the senate and twenty in the other house; there is a rumor that the western members mean to secede. A. L. S. 3 pp. 4°.

Southard (Samuel Lewis). Trenton, [N. J.,] Dec. 17, 1829. To James Barbour, Barboursville, Orange Co., Va. Absence from the bar did not diminish his ability; the present painful state of public affairs cannot last long; the delirium will subside; the impression seems to be that Clay would be the best man for the next election, though the Texas and land questions would weaken him in the west; Benton will rise to so much influence by those questions as to distract the west; he has been consulted from various quarters about the vice presidency, but thinks himself too poor and too young for the office; he would prefer Barbour to any other for that place. A. L. S. Endorsed. 3 pp. 4°.

Barbour (John S.) Washington, Mar. 1, 1830. To James Barbour, Barboursville, Orange Co., Va. It is well known that there is serious disagreement in the cabinet, largely on personal matters; Jackson is said to have told his ministers to quit their broils or quit his cabinet; four political parties are active; the first, which includes the "slugs and worms" that have crawled into office, desires the reelection of Jackson; Calhoun's party is powerful but not a majority; a third party is for Van Buren, and a fourth for Clay; each of these will fall into the ranks of the first as they grow feeble or despondent; Calhoun's friends invite an immediate trial of strength by wishing the old hero to withdraw; this would be very acceptable to Clay's friends, whose hope is in division and whose fear is a caucus that would settle the rival claims; he thinks Jackson will again be presented to the people; Eaton and Van Buren are the power behind the throne; Mrs. Eaton is not generally admitted into society, but the frown of power is felt by those who do not do her homage; narrates the case of Major Broadus a soldier of the revolution, who held an office at Harper's Ferry, and supported the late president; Eaton resolved to remove him and brought secret charges of partisanship; Barbour waited on the President, who said that they should not touch a hair of the old soldier's

head, yet Eaton prevailed; congress is greatly inferior to any he ever sat in; the house has a majority of new and young members; Webster is first in the senate, with Benton second; Grundy has the ear of the president; Barbour's brother is first in the house. A. L. S. 6 pp., 1 leaf with address. 4°.

Barbour (John S.) Washington, Apr. 2, 1830. [To James Barbour.] The President interfered and saved Major Broadus, notwithstanding Eaton's efforts; there is distrust and suspicion in the administration; Van Buren, Eaton, and Lewis are on one side and Ingham, Berrien, Branch, and Donnelson the private secretary on the other; there is jealousy between the President and Vice President; Van Buren acts through the President's partiality for Eaton, for his own benefit; Randolph refused the mission to Russia; changes in the senate. A. L. S. 3 pp. 4°.

Preston (James Patton). Richmond, [Va.] May 10, 1830. [To James Barbour.] He is gratified to learn that Barbour will be in the next legislature; the time is a crisis in the history of the state; to correct the principles of the new constitution by infusing all the practical republicanism which its unfortunate theory will admit, may defer those evils which the convention was meant to remove; the legislature may adopt some course to give more stability to the general government and inspire more confidence in the present administration; there are daily proofs of most objectionable appointments being made. A. L. S. 2 pp. 4°.

Webster (Daniel). Washington, May 24, 1830. To [James] Barbour. The session is breaking up with better prospects for the country; public opinion is turning strongly against the administration; the defeat of the Baltimore Railroad bill in the senate, and the expected veto of the Maysville Turnpike bill, will tell against Jackson in Maryland and the west, and with heaven's blessing may prevent the passage of the Indian bill. A. L. S. 2 pp. 4°.

Rush (Richard). Washington, Aug. 7, 1830. To James Barbour, Barboursville, Orange Co., Va. When he takes up his residence at York, Pa., he will try to secure the nomination of Clay by the Antimasonic convention at Philadelphia in September, even though Clay is a mason; the Jackson portion of that party wish to nominate McLean; it would be a mistake for Clay to go into the senate at this time, especially with Webster there; they do not need two suns in that orbit. A. L. S. 2 pp., 1 leaf with address. 4°.

Mercer (Charles Fenton). Washington, Sept. 20, 1830. [To James Barbour.] On the subject of Barbour's last letter, he is confident that at the time of the contested election when the house of representatives chose Adams over Crawford and Jackson, a large majority of the Virginia delegation, almost all of whom voted for Crawford, would have preferred Adams to Jackson; he was well pleased to see Barbour take the office of secretary of war under Adams; he will not state the denunciations of Jackson at that period; neither Jackson nor Crawford could have carried on the government then without doing as Adams did, calling to his aid the talents and patriotism of his opponents; the political intolerance at which the country has now arrived is appalling; there was some dignity in the distinction between federalists and democrats; now

they are divided only about men, and all principles are prostrated; even the value of the Union is weighed and found wanting by men who were once extra-federal in their principles. A. L. S. 4 pp. 4°.

Barbour (John S.) Washington, Jan. 11, 1831. To James Barbour, Ho. of Delegates, Richmond, Va. He asks Barbour to become reconciled to the President, who has already made the first step; he wishes to see Barbour in a position to render public service; all recent difficulties grew out of his hostile position towards Gen. Jackson; the old man is honest and frank, though in bad hands. A. L. S. 3 pp. F°.

Brooke (Francis J.) St. Julien, [Va.] July 2, 1831. To James Barbour, Barboursville, Orange Co. [Va.] The public mind is settling in favor of Clay, but any attempt to forestall opinion might excite the expiring preference for Jackson; he sees no prospect of compromise between nullification and the American system; Clay must be the next president; Calhoun would not do, in the present state of the great interests of the Union. A. L. S. Endorsed. 3 pp. 4°.

Barbour (John S.) Catalpha, [Va.] July 30, 1831. To [James] Barbour. Since he cannot go for Clay, and his correspondent seems unwilling to go for Calhoun, he asks if they could not unite on McLean of Ohio, who has negative popularity as to himself and positive popularity on account of his locality; yet, since their purpose is to defeat Jackson, he points out the advantage of supporting Calhoun; if Virginia goes for Calhoun, the election must go to the house, and then Jackson's die is cast; he wishes to see Barbour come out of his retirement, for at present he is like Prynne in the pillory, unable to reply to his assailants; his own election to congress is certain. A. L. S. 4 pp. 4°.

Barbour (John S.) Catalpha, [Va.] Nov. 22, 1831. To [James] Barbour. Gov. [John] Floyd communicated to him in confidence his message on the present administration, denouncing the tariff, internal improvements, the distribution of the surplus, the new missions, and the appointment of ministers without concurrence of the senate, and pointing out the mischievous tendency of the executive recommendations as enlargements of federal power which the states ought to suppress; these views are calculated to bring down the imprecations of the "Vatican;" and perhaps the denunciation of internal improvements and the tariff will withdraw from the Governor the support of the Clay party; as to the latter point he desires Barbour's opinion, and urges that they find a point of cohesion in resistance to the distribution of the surplus, and in the tendency of the message to weaken Jackson in Virginia; if the parasites of power assail the governor, the issue will be fairly made for and against the Virginia principles of '98, and if the friends of Clay take sides with the Governor he will have nothing to fear; Randolph has come out for Jackson, but it is Randolph the Pensioner, not the "great commoner" of Roanoke, and his siren song has its price; discusses the probable candidates for the senate. A. L. S. 3 pp. 4°.

Brooke (Francis J.) St. Julien, [Va.] Jan. 1, 1832. To James Barbour, Barboursville, Orange Co. [Va.] Affairs at Washington; there is a latent dissatisfaction with the men in power; he thinks

the Virginia legislature will show its disapprobation before it adjourns; the people of Virginia must see that they are not contending for the venerated principles of 1798, and that the man in office is opposed to those principles without having any of his own; a new edition of Madison's report in the form of resolutions explaining the same might make those principles better understood, and the South would understand that Virginia will not go to war for the tariff and that she will support the Union; he was disappointed in the address of the convention; other political matters. A. L. S. 4 pp. 4°.

Clay (Henry). Washington, Mar. 10, 1832. To James Barbour. Explains a part of his speech concerning the cause of the fall of prices of manufactured articles since the tariff of 1824; he believes that without injury to the policy of protection, some reduction of duties might be made, thereby tranquilizing some of the opponents of the present tariff; the decision of the supreme court [concerning the Cherokees] must have great consequences; if it be resisted, and the President refuse to enforce it, there is a virtual dissolution of the Union; the President is reported to have said to a Georgia member, that he hoped Georgia would defend her rights; describes a meeting held for the purpose of passing resolutions in behalf of Barbour's kinsman, Tecumseh [Richard M. Johnson]. A. L. S. 2 pp., 1 leaf with endorsement. 4°.

Pleasants (John Hampden). Richmond, [Va.,] Mar. 23 [1832]. To James Barbour, Barboursville, Orange [Va.]. It has been determined to nominate no ticket through the legislature, but to postpone action until summer, when the central committee will frame a ticket or call a convention to meet at Lynchburg; the object is to withdraw pressure from the Jackson party and so accelerate its tumbling to pieces, for the Clay party acts as a hoop to preserve the cohesion of Jackson's followers; unless Jackson should die, there is little chance in Virginia; he blames the majority-hunting policy of the caucus; Van Burenism will carry the day. A. L. S. Endorsed. 4 pp. 4°.

Barbour (John S.) Washington, Mar. 25, 1832. [To James Barbour.] Jackson will be re-elected, and probably Van Buren will be vice president; he laments the treachery of friends that placed Barbour's brother outside the pale of selection; the bank bill will pass and will be vetoed; old Root has stripped away the veil from the wickedness of New York politics, and has promised to publish his speech; conciliatory course of Adams on the tariff; Jackson is ready to crush South Carolina while he cheers Georgia to resistance; if Clay and Calhoun would both retire some man might be found who would restore the honor of the republic; neither of them have the slightest chance; Johnson will be pressed by the kitchen cabinet for vice president, if "Van" withdraws; if Barbour's brother had been nominated at Richmond he would have been elected. A. L. S. Endorsed. 3 pp. 4°.

Dearborn (Henry Alexander Scammell). Washington, May 8, 1832. To James Barbour. The friends of the chieftain are determined to make the affair of [Sam] Houston a party question, and acquit him; [Thomas D.] Arnold was threatened with a caning on the street for remarks against

Houston in debate; there is a most respectable collection of young men at the convention, over three hundred in number; they have cheering news from New York; Clay will be elected. A. L. S. 3 pp. 4°.

Green (Duff). Washington, Sept. 24, 1832. To James Barbour, Barboursville, Va. He urges Barbour to confer with the committee that is to meet at Charlottesville, and assures him of the support of the *Whig* and the *Times*; he has enlarged his edition of the extra *Telegraph* to 30,000, and will undertake to distribute from three to six thousand in Virginia at his own risk; if they could only force out the whole truth about Jackson's attempt to impeach the character of Monroe, there would scarce be a man in Virginia to do him reverence; neither New York, Pennsylvania, Vermont, or Rhode Island can possibly be carried for Clay, but if the Virginia Clay committee will support Wirt, the latter can get all those votes. A. L. S. 1 page, 1 leaf with address. F°.

Barbour (John S.) Catalpa, [Va.,] Oct. 2, 1832. To [James] Barbour. He differs from [Duff] Green's view of the situation; if Jackson is not elected by the popular vote, neither Wirt nor Clay can be; the election must then devolve on the house of representatives; explains at length why Wirt and the anti-masons could not succeed there, and calculates Clay's probable strength; the Charlottesville convention is but a farce; Jackson, if reelected, may not hold the office, as he is in a very decayed condition; it would be better if Van Buren administered the government in his own name, as all the checks of the constitution are broken by the present irresponsible agency; anti-masonry is but dust in the balance, yet in the division of spoils it demand's the lion's share; corruption of the present ministry; he has written to Green to publish Bidle's pamphlet containing a review of the veto. A. L. S. 5 pp. 4°.

Pleasants (John Hampden). Richmond, [Va.,] Oct. 7, 1832. To James Barbour, Barboursville, Orange, Va. He will write the address required, though not confident of his power to speak for a great party; he was disgusted with Barbour's brother [Philip Pendleton Barbour] for what seemed his demagogism, but hopes none the less to see him carry the vice presidency against Van Buren, if their own side cannot; this nomination of an independent ticket by the [P. P.] Barbour men at Charlottesville will give Clay a better chance in Virginia; in 1828 they stood to Jacksonism as 12 to 26; since then the extension of the suffrage, felt chiefly in the towns, which are almost all for Clay, has strengthened them; Providence seems to guide the matter, considering the consequences of Morgan's abduction, and the infatuated conduct of the Virginia caucus leading to the division of the Jackson ticket at Charlottesville; their friends in New York and Pennsylvania are confident; Green is honestly at work to repair the mischief he has done. A. L. S. 3 pp. 4°.

Barbour (John S.) Catalpa, [Va.,] Nov. 29, 1832. To [James] Barbour. The movements in South Carolina make it probable that the whole question of the power of the confederacy over one of its members will come before congress this session; his personal attachments are with the men of South Carolina, yet he denies the vagary of nullifi-

cation as well as the greater heresy of secession; if either were attempted, he is ready to show both Georgia and Carolina that there is strength in the federal arm to punish all offending citizens according to the law as expounded by the courts; his opinions have always been thus, but in the Virginia delegation, outside of that part that bears the brand of federalism, he stands alone; he has also stood alone against the numerous attempts to repeal the 25th section of the judiciary act of '89; he asks help in maintaining his opinions, many of which were derived from James Barbour. A. L. S. 3 pp. 4°.

Barbour (John S.) Washington, Dec. 13, 1832. To [James] Barbour. In the last session, the committee of manufactures was divided as five to two, the minority favoring reduction; now a similar majority is for bringing down the impost to the revenue principle; South Carolina will proceed in her course; Jackson is bent on mischief, if he can find popular favor for it; proceedings in the case of Col. Campbell's heirs; the new senator [William C. Rives] is said to be anti-tariff on constitutional grounds; but in 1829, when an effort was made to unite the Virginia delegation with

that of South Carolina in denouncing the tariff as unconstitutional, Rives and himself wrote an essay in the *Richmond Enquirer*, signed "A Jackson man of the school of '98," upholding Madison in his letters to Cabell. A. L. S. 4 pp. 4°.

Barbour (John S.) Washington, Feb. 24, 1833. To [James] Barbour. Proceedings in the senate; describes a visit to John Randolph, who admitted that the election of Jackson was an experiment that had failed, yet was reconciled to the President by Benton the same day. A. L. S. 4 pp. 4°.

Williams (Lewis). Washington, June 16, 1841. To James Barbour. There are indications in the house that Harrison's death will give rise to new parties; it is important for the whigs that the authority of Jefferson's name should not be used against the new bank, which will be but a rickety concern; he regrets that Tyler will not admit, like Madison, that a bank is necessary and proper; Barbour once informed him that Jefferson had expressed an opinion favorable to the bank in 1816; if this could be ascertained, it would take the ground from under the anti-bank party. A. L. S. 3 pp. 4°.

The more important gifts of the month were: From S. P. Avery, 53 volumes, 2 pamphlets and 228 prints, of which gift 33 volumes comprised a collection of over 1,600 etchings by Daniel Nicholas Chodowiecki, dating from the latter half of the 18th Century, including his illustrations for many books published during that period; in addition to their interest as engravings they are of great value as records of middle-class life and manners of the time. Also, from the Mayor of Bordeaux, 12 volumes of the reports presented to the Municipal Council of Bordeaux, 1889 to 1898, Procès-verbaux, 1900, Budget, 1901; from R. R. Bowker, a miscellaneous collection of fiction, theology, etc., amounting to 193 volumes and 135 pamphlets; from Paul Dana, 6 volumes and 302 pamphlets; from Dr. Robert L. Dickinson, the inkstand and scissors used by William Cullen Bryant when editor of the Evening Post; from the Evening Post, 204 volumes and 361 pamphlets; from George Fischer, a collection of German historical fiction, amounting to 278 volumes; from B. D. Grinchenko, of Chernigov, Russia, "Literatura Ukrainskavo Folkloru, 1777-1900"; from the Imperial Russian Geographical Society, 4 volumes of Russian folk songs; from the Japanese Government, 19 volumes of Formosan Government reports; from the Commissioner of the Province of North Brabant, Netherlands, 165 volumes and 8 pamphlets, all documents of the Province; from R. Hudson Riley, 25 volumes and 22 pamphlets, being journals of the Folk-lore Society, etc.; from E. Schernikow, Consul of the Republic of Salvador, a collection of Salvador documents, amounting to 36 volumes, 51 pamphlets, and 9 plans; from Mrs. E. M. Townsend, the first volume of "Chapter Sketches, Connecticut Daughters of the Revolution"; and from the City of Trieste, Austria, 5 volumes and 6 pamphlets, being documents of the City and Province of Trieste.

From the Jersey City Public Library was received, by exchange, an important file of documents relating to the water supply of New York City, covering the years 1840-48, and for those years completing the series of New York water reports; there were included also a few odd pieces for earlier years and many for Brooklyn in the 50's, which, together with those in the Ford Collection, make the literature in the Library relating to the water supply of New York and Brooklyn a large and valuable one.

At the Lenox Building there was opened on January 2d a collection of about 335 volumes illustrative of the literature of music, together with a selection of autograph letters of the great composers, music caricatures, etc. The exhibition of lithographs by Fantin-Latour and of etchings by Egusquiza has been continued; at the Astor Branch were exhibited plates from "Treasures and Masterpieces of Art at the Paris Exposition (1900)," presented by Mrs. Henry Draper, and five Chinese wood engravings (colored by hand) representing the defeat of the foreigners by the Boxers, presented by Dr. J. O. Skinner.

CHARLES DICKENS TO L. GAYLORD CLARK ON MARTIN
CHUZZLEWIT, IN 1843.

Printed from the original in the Theodorus Bailey Myers collection in the
New York Public Library.

LONDON. 1 DEVONSHIRE TERRACE
YORK GATE REGENTS PARK.
Second March 1843

MY DEAR CLARK

Let us lay a wager upon that copyright business. What impossible odds shall I set against some piece of property of yours, that we shall be in our graves and out of them again in particles of dust, impalpable, before those honest men at Washington, in their earthly riots, care one miserable damn for Mind?

You will not take it ill when I tell you that the last-sent Nicks* remain uncut. When I resolved on shipboard coming home, to write upon America, I solemnly determined with myself that I would never read an American criticism on the book. Innumerable newspapers have been sent to me across the Atlantic since its publication. If there were anything to pay, they have gone back to the Post Office; if nothing, they have gone, unopened, into the fire.

I have never once departed from my resolution in the least degree. And I feel the wisdom of it, in my good spirits and good humour.

I don't think you will like Chuzzlewit less, as it goes on. I particularly commend Mr Pinch, and a sister of his who will one day appear upon the scene, to your favorable consideration.

Ah! That unfulfilled promise! If I ever have a scene of Chuzzlewit written early enough to send to you—but I will not lay down any more pieces of stone in the Infernal Pavement. Nous verrons.

Mrs Dickens sends her best regards to yourself and Mrs Clark; in which I cordially join.—Last Thursday twelvemonth, we dined at your house.

Always faithfully yours
CHARLES DICKENS.

A LIST OF WORKS IN THE NEW YORK PUBLIC LIBRARY RELATING TO PRICES.

* * All works listed below are in the Astor branch unless otherwise stated. This list includes most of the important articles on the subject, but it is by no means exhaustive. The student should also consult Poole's *Index* for other magazine articles; the Belgian, British, French, consular reports, and the various official gazettes (such as *The London Gazette*), statistical abstracts, and trade journals. A list of statistical periodicals in the library was printed in the *Bulletin* for March, 1900, volume 4, number 3; and of technical and industrial periodicals in the same, November and December, 1898, volume 2, numbers 11 and 12. Reference should be made also to the Index Catalogue in the reading-room under the related headings of wages, corn laws, money, value, etc., etc., and to the lists on these subjects in following numbers of the *Bulletin*.

The arrangement is chronological, under the following main groups :

I. HISTORY AND STATISTICS (general and regional)	pp. 115 to 126
INDEX NUMBERS	pp. 126 to 129
MONEY AND PRICES	pp. 129 to 132
REGULATION OF PRICES	p. 132

THEORY OF PRICES	pp. 132 to 133
TRUSTS AND PRICES	p. 133
II. PRICES OF VARIOUS ARTICLES (alphabetical by names of articles, with chronological subarrangements by countries)	pp. 133 to 159

A number of large gifts were received this month, one from Messrs. H. V. & H. W. Poor, consisting of 1,516 volumes, 1,487 pamphlets, 45 scrapbooks, and 18 maps, the scrapbooks referring entirely to the transactions of the New York Stock Exchanges (38 volumes, 1873-1891), Boston (4 volumes, 1887-1888), and Philadelphia (3 volumes, 1886-1888). This gift added 971 pieces to the files of the Library, the larger proportion of them being auditors' and treasurers' reports of the several States, many of which filled gaps, and some, notably for Oklahoma, started new files.

A valuable collection of 511 volumes of newspapers, received from the Long Island Historical Society, made important additions to the files of New York newspapers and technological journals. This gift, together with the file of the Evening Post already in the library, makes the set of the Post complete from its beginning in 1801, with the exception of the years 1813, 1862, and 1863. It includes also a collection of all the newspapers and periodicals published in the United States during the Centennial year, 1876, bound in 70 volumes.

Other important gifts were from the Ministry of Foreign Affairs, Argentine Republic, 10 volumes, 7 pamphlets, an atlas, and 16 maps, all issued by the Republic; from S. P. Avery, 11 volumes and 4 pamphlets, relating to art, also 7 bookplates and a photograph after Rossetti; from the Century Association, 139 volumes, 353 pamphlets, 14 maps and charts, and 1 atlas; from the Century Company, 128 prints, being engravings by Timothy Cole and Henry Wolf; from William E. Dodge, 63 volumes and 104 pamphlets, including 51 volumes of the Penny Cyclopædia; from Mrs. Henry Draper, 46 volumes and 5 pamphlets; from Melatiah E. Dwight, one of an edition of fifty-two copies of his "Catalogue of

the Works of Elbridge Kingsley, the Engraver"; from Stuyvesant Fish, a photograph of a Bradford broadside proclamation of Governor Fletcher, dated 29 April, 1693, heretofore unknown; from the Colony of Jamaica, 26 volumes and 1 pamphlet, including the recent Blue Books and Census of the Island; from the keeper of the archives of the Municipality of Lisbon, 11 volumes of the municipal records; from four departments of the government of the Province of Nova Scotia, 27 volumes and 66 pamphlets; from John Robinson, 12 volumes of literary annuals; from the Società Ligure di Storia Patria of Genoa, 6 volumes of transactions and a map; from Miss C. P. Stokes, 2 volumes and 2 pamphlets, relating to the Dudley family; from Mrs. E. N. Vanderpoel, 15 maps, including some of the Civil War, 25 old lithographs and 1 photograph.

The exhibition of Rossetti prints at the Lenox was continued during the month, as was the display of Fantin-Latour lithographs at the Astor.

The exhibitions at the circulation branches have been as follows: BOND STREET, Arbor day; OTTENDORFER, Arbor day, Latest fiction, Books about Spain, Frank R. Stockton, Queen Wilhelmina; GEORGE BRUCE, Audrey, Frank R. Stockton, Cecil Rhodes; JACKSON SQUARE, Birds; HARLEM, Illustrations from children's books, Birds, Columbia College, Concord and Lexington, Arbor day, Frank R. Stockton; MUHLENBERG, Arbor day, Frank R. Stockton; BLOOMINGDALE, Arbor day, Frank R. Stockton; YORKVILLE, Tales of the sea, William Wordsworth, Arbor Day, Frank R. Stockton; THIRTY-FOURTH STREET, Arbor day; CHATHAM SQUARE, Washington Irving, New York old and new, South America, Frank R. Stockton, Arbor day; ST. AGNES, Arbor day, Boys' bulletin of games and sports; WASHINGTON HEIGHTS, Civics in the United States, especially in New York.

JOSEPH E. JOHNSTON ON THE GEORGIA CAMPAIGN OF 1864.

Printed from the original manuscript in the Emmet Collection, presented to the New York Public Library by Mr. John S. Kennedy.

MACON, GA, Aug. 13, 1864.

MY DEAR SIR.

I have had the pleasure to receive your friendly letter.

The reasons assigned for my removal are "failing to arrest the advance of the enemy to the vicinity of Atlanta, far in the interior of Georgia," & "not expressing confidence that I could defeat or repel him."

After the battle of the Wilderness, General Lee adopted precisely the course which I followed—& gained great glory by it. He fell back as far as I, & much more rapidly—or rather, less slowly. The enemy also penetrated much more deeply & extensively into Virginia than into Georgia.

I have never known sensible men to regard confident language as evidence of merit.

A few days before my removal, general Bragg assured me that he had maintained in Richmond, that Sherman's Army was stronger than Grant's. It is very certain that General Lee's was larger than mine. General Lee's course has satisfied the government & country—& added to his great glory.

The relative strength of Genl Sherman's army and mine, made the chances of Victory in his favor, if we attacked. At Dalton he had a fortified pass close in his rear, as a place of refuge in case of mishap. In moving southward he advanced fortifying—& therefore always had an intrenched position close behind him. Under such circumstances victory could not have been decisive for us, while defeat would have been ruinous. We therefore kept near him, to be ready to take advantage of any exposure of a detachment that he might make. He was too sagacious, however, to make any that would have justified battle. But we repelled his almost daily partial assaults with trifling loss. While he, on all such occasions, suffered heavily.

We fell back before the federal army, about 93 miles in 75 days, the sum of our losses was about 10000. We estimated that of the enemy at five times as much from the opinions of experienced officers—reports of prisoners taken daily—& statements of northern newspapers. The course, if continued with the same results, would soon have so reduced the disparity of number as to make the chances of battle at least equal. If we could have defeated the enemy on this [side] of the Chattahoochee his destruction was certain. I therefore thought, and still think my plan of operations correct.

Yours very truly

J. E. JOHNSTON

A CHECK LIST OF WORKS IN THE NEW YORK PUBLIC LIBRARY ON WAGES, ETC.

* * All works here noted are located in the Astor branch. This list is by no means exhaustive; national and state general statistical publications and publications of labor bureaus or departments all contain much material relating to the subject. Reference should be made, in the index catalogue in the reading room, to related headings, such as *Labor and Machinery*, *Profit*, *Profit sharing*, etc., etc. The arrangement here is alphabetical by subdivisions under the three groups of (I) General works, (II) Various kinds of wages, (III) Wages in various occupations, and chronological under the subdivisions in each group.

The most important gift received at the Library during the month came from Mr. Henry Baldwin, of New Haven, Connecticut, being a collection formed by him during the last eleven years and known as the "Library Americana." This collection includes about 1,000 bound volumes, 5,000 pamphlets, and a large quantity of odd numbers of magazines and of newspapers, also a series of scrap-books, neatly made, relating to such matters as the Chile-Peruvian War, the election of 1884, the Spanish-American War, etc. There is also a collection of slips mounted on cards and arranged in drawers and boxes, about sixty in number, containing records of miscellaneous information bearing on American history. The collection contains a large amount of data in the form of manuscript letters, pamphlets, clippings, etc., relating to the various secret orders which have from time to time been formed in this country, known as national American orders, patriotic societies, American and Protestant organizations, etc.; also data relating to such organizations as the Sons of the American Revolution, Daughters of the American Revolution, etc. The collection was formed as the result of a convention of the American Protestant and patriotic societies at Chicago in 1891, at which a national committee was appointed, which committee directed the formation of the "Library Americana," including in its scope the collection of all facts bearing on the history of America in its broadest sense, the whole to be for the use of the people of the United States. Mr. Baldwin was appointed custodian of this library and has worked practically single-handed without further instructions and without funds in bringing together and indexing the data of the kind desired. Finding himself unable, by reason of advancing age and lack of means, to carry on the work farther, he decided, after conference with his friends, to deposit the

collection in the New York Public Library as a contribution to the work in the same direction which is systematically carried on here.

The Library has also received from Mrs. Penfield, widow of Edward Z. Penfield, an officer of the Panama Railroad, a collection including 400 volumes and about 8,000 numbers of newspapers, among which there are many published in Central and South America and having special reference to the Panama Railroad and Isthmian Canal projects.

Other important gifts were : From the publisher of the American Agriculturist, 210 volumes and 440 pamphlets, chiefly agricultural experiment station reports; from Boulogne-sur-Mer, 119 volumes and 2 pamphlets, documents of the City, covering the period from 1865; from the British South Africa Company, 9 volumes and 16 pamphlets, reports on the administration of Rhodesia, mining, etc., since 1889, also 2 maps; from John L. Cadwalader, 21 volumes, chiefly sporting publications; from Alfred Fox, 26 volumes of the London Musical Times and 17 volumes of the London Tonic Sol Fa Reporter; from Richard Y. Greener, a copy of the first book printed in English in Siberia; from Mrs. Cadwalader Jones, 5 volumes, including "Las Galas del Amor," illustrations by Gavarni, in 2 volumes; from the Massachusetts Secretary of the Commonwealth, 76 volumes of State documents; from the South Africa Conciliation Committee, 1 volume and 36 pamphlets; from Alfred Stieglitz, 5 volumes of Camera Notes; from Paul Weir, 2 volumes of the Royal Bermuda Gazette; and from Barbados, the Gold Coast Colony, and Newfoundland, 14 volumes and 6 pamphlets.

The exhibition of Rossetti prints at the Lenox Branch was continued. At the Astor Branch a display of plates from Hirth's "Formenschatz" replaced the Fantin-Latour lithographs.

The exhibitions at the circulation branches have been as follows: BOND STREET, Alfonso XIII., Bret Harte, Martinique, Paul L. Ford, Mary Johnston, Kate Douglas Wiggin, Conan Doyle; OTTENDORFER, Bret Harte, Paul L. Ford, Martinique, Who's Who, Stories of delicate workmanship, Rochambeau, New books; BRUCE, Decoration-day, Nathan Hale, Folk and fairy tales, New books; JACKSON SQUARE, Bret Harte, Memorial-day; HARLEM, Spring, Bret Harte, Paul L. Ford, Coronation of Alfonso III., Lesser Antilles and volcanoes, Decoration-day, Birds; MUHLENBERG, Paul L. Ford, Bret Harte, Animal stories, Memorial-day; BLOOMINGDALE, Bret Harte, The Distressed islands and their neighbors, Paul L. Ford, Coronation of Alfonso XIII., Decoration-day; YORKVILLE, Coronation of Alfonso XIII., Paul L. Ford, Birds; THIRTY-FOURTH STREET, Martinique disaster, Paul L. Ford, Admiral Sampson, Bret Harte, Coronation of the King of Spain, Coronation of the King of England; CHATHAM SQUARE, Paul L. Ford, Bret Harte, Martinique, Decoration-day; ST. AGNES, Coronation of the King of Spain, Martinique, Decoration-day.

LETTERS OF JAMES MONROE.

PART 4, 1812-1817.

A continuation of the selections printed in the *Bulletin* for February, 1900, and September and November, 1901.

[1812.]

SIR

It is a very important question whether a considerable part of the militia force which has been collected for the defence of the principal cities along our coast may not at this time be discharged. It was assembled, on the menace of a formidable invasion from G Britain, with veteran troops, released by the peace in Europe, from employment there. It is a fact, which excites no little surprise, that to this day, we do not know, whether the boasted preparations for this invasion were sincere or intended, merely to excite alarm, & expose us to expense. The effect which they have produced is not regretted. The vast bodies of respectable citizens who have been so promptly moved, in defense of their rights, such distances, and exposed to many privations, must satisfy the enemy that he can make no impression on us. The evidences which it affords, of the competency of the people to self government, must give strength & stability to our republican institutions.

From New Hampshire to the Mississippi, one sentiment only exists, one voice alone is heard. The country must be defended. The enemy must be expelled. We must be reduc'd to the necessity of making an honorable peace.

TO GEORGE HAY.

WASHINGTON, JULY 9, 1812.

DEAR SIR

By a late letter from Eliza to her mother we were very sorry to hear that Hortensia had been much indisposed. We hope that she has recovered, tho' we feel very anxious for the whole family, on account of this warm spell of weather. When will you set out for the Springs? I wrote Mr. Alexander some time since that you would stay some days at my house in Albemarle, which I hope you will do. It will be of great service to you all to rest there sometime, & I shall be happy to receive some details from you respecting my affairs.

I have had some thought of undertaking to raise a volunteer force in Virg^a, to be led into Canada. If I could get 1500. or 2000. men from below the mountains & above it, composed of fine fellows, to be commanded by such officers as I could select, I think it would do credit to our country. Among others I should wish that Wirt, W. Leigh, F. Mercer, Ch: Johnston, perhaps Col: Daniel, Fr: Preston, would join. If such a force could be raised, & brought to bear on Canada, the first of

Octr., so as to take the van of the army we might do something. I have suggested it in a letter to day to the governor, & I wish you to confer with him on the subject.

To you I will mention certain considerations that will naturally be brought into view, in considering this question, the first, the propriety of resigning my present office to engage in the other duty, and in that case whether it should be permanently, or to leave it open to return, if publick opinion invited it. I want no place *simply as such*, and would hold none which my countrymen did not wish to see me in. I should therefore never be afraid of hasarding any thing, even if desirable to return. I have not time to enlarge. Simply hint this for your immediate consideration. our best regards attend you all. Y^r. friend

WASHINGTON, OCT^r. 16th 1812

DEAR SIR

I have yours of the 9th., and had before rec^d. those of the 5th. 6th. & 8th. instant.

The view which you have taken of the points suggested for consideration, in mine, to which your last is in reply, contains many just remarks: indeed some of them as conclusive. I think with you, for example, that if I was plac'd in the department of war, & Mr. Jefferson came into that of state, that the inference would be that I was put aside for his accommodation. The fact would be, that no change would be thought of, but for the superior importance of the dep^t. of war at this time, nor would any one think of removing me from my present station, except from a desire to place me in the other, on account of its importance, and a belief that I had some acquirements peculiarly adapted to it. In going from a superior to an inferior station, there would be merit, if the motive was well understood & justly appreciated. Altho' Mr. Jefferson would have due credit, for his patriotism, in coming into an inferior station, which would for a while absorb every other consideration, yet I think after sometime, that justice would be done me for a like step. No one would for a moment believe that I acted on other, than generous motives, and even the accommodation shown to so aged and distinguish'd a character would not lose its effect. The first impression however wo^d. be that which you state, and how soon it would be remov'd, quite uncertain. But I do not think that this arrangement is likely to take effect; the association of 3. members in the cabinet out of five, from Virginia or (including the attorney Gen^l.) six at most, cannot be done. If Mr. Jefⁿ. came in, it could only be, by my withdrawing, by going into the army. This would leave the dep^t. of war still to be disposed of, supposing any change in it necessary & if Gen^l. D. [Henry Dearborn] wo^d. come into the latter, that would leave the door open to the army, without wounding the feeling either of himself, or any one in that quarter.

My opinion however is that Mr. Jeffⁿ. will not come into office, without some great cause, which shall put the republican interest in eminent danger, & call for the services of all its able and distinguished advocates. This can only exist by

the manifestation of the decision of the British gov^t. to push the war with the utmost decision, rejecting our just & reasonable proposals, and that it will have the means, by success in the peninsula & elsewhere, to push it with effect. Altho' it may refuse to accomodate on just conditions, yet I do not think that its fortune will have reached to such a hight, as to inspire any doubt of our ultimate success, or excite that kind of alarm, alluded to.

It will merit great consideration whether such a state of things may not exist, and such a pressure be made on me, or rather such an appeal, as to make it impossible for me, without injuring my character, to refuse going into the dep^t. of war; and also, if I make any change, whether that may not be, all things consider'd, the preferable one.

If the nation is really disposed to put me at the head of the army, the Congress have only to open the door, by passing an act authorising the appointment of an officer of superior grade to any now in the service. If this were done, it would imply the sense of that body, that some person other than those now employed should be called on. In this case your reasoning is conclusive, that a new appointment, would be no cause of offence to Gen^l. D. or other officer. It is proper that you should know, that the idea of the gov^t. has long been even before the present admⁿ. that a higher grade than that of major gen^l. should not be conferred. The reason I presume to be this, that the appointment of a command^r. in chief, is an officer of such rank, and involves such high powers, as to be inexpedient under our gov^t., if to be avoided. Such an officer, would draw much of the attention, and even of the powers, from the executive itself. If he conducted a successful war, of any duration, and with a large army, he might become dangerous to the liberties of his country. It has been thought more safe, & perhaps as eligible, to confine the appointments to the grade of major gen., and to confer it on several to break the force of the power. There can be no doubt that a commander in chief, if he possessed talent of the first order, would manage the war with greater advantage, than it would be managed, by several of equal grade, because he would direct every operation, would combine the mov'ments, & make each, aid the other. Where there is no commander in ch.;, the secretary of war, supplies his place, which can not be done with advantage. The outline of a campaign may be given by the Secretary, but the executive must depend on the general, and much of that especially in the detail, as well as in the higher duties, of combination & co-operation, must be directed by him alone. A Secretary, at a great distance from the theatre of war, can give no orders, which are to be absolute. Something may occur with respect, to one corps, on which the mov'ment of another at one, two, or 300. miles distance, was made to depend, which should change the mov'ment of the latter. This may require an immediate order for the purpose, which the Secretary cannot give. In short it is evident that, for the war to be conducted with advantage, there ought to be an able secretary of war, & likewise an able commander in chief. Whether the danger incident to the latter character, is such as ought to make us decline the appointment, is the question to be decided. This will doubtless in great measure depend, on the contingencies above alluded to.

If Gen^l. Dearborn came into the dep^t. of war, and I was appointed major gen^l. in his stead, to command all the forces against Canada, this might answer

the object, provided it is thought that the translation of me to the army will be for the public interest.

Among those (as I am informed) who think that I ought to go into the dep^t. of war, at this time, there are some who advise the translation of Mr. Eustis, temporarily, to the dep^t. of State. If I leave this dep^t., who ought to be brought into it, is a distinct question. It is not believed that Mr. Jeffⁿ., however desirable it may be, would act on it, for the reasons which you give.

Supposing a commander in chief not to be appointed, which would you prefer, that I should go into the dep^t. of war, under the opinion evidently pronounc'd, of

[The remainder of the MS. is missing.]

[TO GEORGE HAY.]

WASHINGTON OCT^R. 17. 1813

DEAR SIR

We have not heard from you since we parted which gives us some concern, but hope that it is imputable to the pressing duties professional & private which engaged you both on your return home. We hope soon to be reliev'd from all anxiety on that head. We have nothing from Albemarle since we left it, nor have we heard of our servants who were to follow in a day or two after us.

I should be glad to have your opinion respecting the report to be made in compliance with Mr. Eppes's resolution concerning the acc^{ts}. of our foreign ministers; whether any part should be curtailed, & what part? The only part in which any one takes an interest in that relating to my expences at Paris on my way to Madrid, and in that only from the opportunity it is supposed to afford to injure me & family. I mean by this, that any other part may be withheld without affording a handle to my enemies. This therefore is the only one, that I am bound to report untouched. My opinion is that I ought to withhold, the letter of Talleyrand to Livingston, & that of the latter to me, shewing the good effect of the Spanish mission. To send those letters in, as the report will be made in conformity to the views of this dep^t., would I think be unworthy of me. It would be the more so, even in point of discretion, because in relation to the object to be answer'd by it, the papers being accessible to any one, the object might be answered in another mode, on the call of any one.

The part about which there is much doubt on my mind, is in the commencement concerning the outfit to France. That outfit was allowed; all the introductory reasoning may suggest a doubt on a point where there is none. Besides it bears hard on Mr. Jefferson, which, if there is no necessity for it, had better be avoided.

On the subject of a different character, on which we were speaking, I have heard little since we were together. On returning here, a recollection of my past services, the fidelity, & in some instances, utility of them, beyond all question, restores in a certain degree at least the feelings which I indulged when we last met. The jealousy of Virg^a. is a theme that will be dwelt on, and with no little effect, especially as it will be aided by the cabals and intrigues of a party in our

own state. Nothing is more certain than that if my pretensions are regarded, it must be by the opinions entertain'd of them, in other states by the national character which my services have gain'd me; by my ceasing to be considered in other states as a Virginian. Hence, the less Virg^a. says, or does, in the business, to promote the object, the better. A distinction may perhaps be fairly taken between detecting cabals to injure me, especially if the discussion does not get into the papers, and efforts to produce an effect in my favor. The line must be drawn by the discretion of my friends, if I have any, and the thing goes on. An effort will be made in favor of some one in N. York & in some western state, probably Kentuckey as the secondary character. I have no doubt that the arrangement which I suggested to you, has been made, and that efforts are making to give effect to it. Such too is the feeling in regard to Virg^a., that if a man can be brought forward in New Y^k., enjoying the public confidence, connected with one in Kentuckey, the prospect of its success will be very favorable. Mr. Jefferson has said nothing to any one to induce a belief that he thinks that I ought to be look'd to, & his immediate connections are decisive on the other side. If he continues silent, his weight will operate against me. To lessen its effect, the fact of his hostility may be denied, on the authority of our long friendship, the fact of my remaining steady to it, unchanged by the special mission &c &c., his own declaration that Mr. Madison & I were the friends on whom he most relied &c. If the nation can place its trust in other hands with safety, it will be done. All the enemies of the admⁿ. of the war &c., foreign & domestic will be enemies to me. A friend who pass'd sometime since thro' Albemarle, was at Wilson Nicholas's who interrogated him, as to the disposition here, and westward, relative to the successor of Mr. Madison. That gentleman answer'd, that Armstrong, Tompkins, Clinton, Gerry, & myself were spoken of. He was pressed to state his own opinion, on which he declared it to be in my favor, as having been abroad, long in the publick service, there, & at home &c. The other party spoke disrespectfully of my pretensions. Peter Carr was at hand & appealed to by Nicholas, as to the temper of people at Winchester, who replied that he had never heard the idea of bringing a man forward from Virg^a. spoken of but with ridicule. T. Ringgold informs me that it is understood here that Mr. Madison is friendly to me—that such is the general impression—but from what circumstance I know not. The political harmony, the support I give him, are doubtless among them. Your friend

TO [GEORGE HAY].

WASHINGTON, FEBY. 25. 1814

DEAR SIR,

You will receive with this your paper on impressment. The President has read it. In returning it to me, he remarked that it was a very able argument, pushed too far on some few points, particularly in the analogy between a merchant vessel, & the territory of any power. He seemed to fear that it might embarrass the gov^t. on the question "of free ships making free goods" by exciting expecta-

tions that may not be verified, and a consequent disappointment. He supposed that the ideas might be so modified, as to say every thing you might desire, in favor of the principle, but still to distinguish betwe[e]n land and water, as on the land there is no concurrent jurisdiction, and on the ocean there is an exception to the absolute jurisdiction of a neutral, even in its own vessels, as in the case of enemies on board, contraband &c. I merely suggest the idea for your consideration.

Might it not be well to notice Croker's (a ministerial member in the h. of commons) distinction, that the person naturalized has two distinct characters, which are recognized in England, 1st. his new obligations voluntarily entered into with the British gov^t. 2^d. those, applicable to his former sovereign which are not impaired—that the British government claimed of him only his individual engagements, leaving in full force his obligations by birth. This distinction is delusive & absurd. It will be easy to shew that, that if the British gov^t. exacts, the performance of his new obligations, he must violate under certain circumstances the old, and that in naturalizing at all, the act is nothing, or it abrogates, every former duty. The President supposed that this point might be brought in, at the end of the present paper. On this, I may add, something more he[re]after.

I have made a few notes, on certain points, as you will see on looking it over.

TO GEORGE HAY.

MARCH 11. 1814.

DEAR SIR

A doubt in my own mind, of the most correct course, with a view to the public interest, and some doubt of the safety of the conveyance, prevented my sending you the enclosed papers, at the times they were written. You will perceive that they are in unison with a plan I had formed, before I had left this place last summer, as I explained to you in Albemarle in Sept., when we met there.

At this time there is not less difficulty in deciding on the course which I ought to take. The failure of the campaign in its most important object, the demolition of the British power in Canada, with the waste of public money, owing as I presume, to the want of œconomy system & talent in the management of the war; the little prospect which present arrangements afford of better success or order in that dep^t., Wilkinson & Hampton to be tried by C^t. of Enquiry, Dearborn having asked one, and no one plac'd before the country to take command, in whom it has confidence, for Izard is to preside in the trial of Wilkinson; the probability that the loan will fail, and that its failure may affect the negotiations at Gottenburg, are facts which cannot but penetrate reflecting minds with much anxiety for the future. As soon as we heard that Newark was burnt & Fort George taken, I told the President that the Secr^y. at war ought to be removed, instantaneously. That I had no personal quarrel with him, or ever had, but that his removal was due to the public feeling & hope. This as you have seen was not done.

When I saw you last, you thought, and the facts which you stated, made much impression on my mind, that a notification of the kind contained in the enclosed paper (which is I think a copy of one which I shewed you) would be imputed to a belief, that the cabals against me in Virg^a., of which till then I had never heard, would sink me, and that the measure would be consider'd an act of pusillanimity. In Feb^y., and at an earlier period, some close friends here, whom I consulted on the subject, opposed it, in the expectation that I might render service without any such proof of disinterestedness, and that as my withdrawing all pretention &c, did not proceed from a desire to retire altogether, I ought (as all others had done) to leave the public to take their own course. At the present moment, such a step might be imputed, to a belief, that I had lost all confidence in the success of our affairs, and wished to escape the wreck, which is not true. I still think that we may save every thing, and terminate the war with honor, provided proper measures be adopted. What those measures ought to be at this time, and whether I ought, in connection with them to take any other station, is not clear as at former epochs. Some of our friends here think that I ought neither to retire, or quit my present station, for any other, but remain *tranquilly* where I am. You will of course conclude that, tho two, or three, whom I have communicated on the subject, were spoken to separately, in profound confidence, and are men of tried integrity & prudence. These friends think that having done my duty to the satisfaction of the public, where I am, I am not, and will not be held responsible, for what is done out of my dept., and that I may be more useful in it, than I could be in any other, to my country, & to the republican cause. You will give me your opinion on the subject.

The sentiments expressed in favor of the President have never undergone any change. In his personal friendship I have the utmost confidence. For all branches of the admⁿ., the military excepted, he has great talents, and no man is more virtuous, laborious, or devoted to his country.

You will of course not speak with any one living, except Eliza, on the subjects touched in this letter. Altho' I have no fear on that head, I doubt, from the danger, the very remote, incident to the conveyance, whether I ought to trust these sentiments by it. Let me hear from you on the rest of it.

Your friend
JAS. MONROE

TO GEORGE HAY.

WASHINGTON, SEP^R. 7TH. 1814

DEAR SIR.

I wrote you a short note the other day, to inform you, of the situation of my family in Loudoun, and of my own health. Since then I have heard from M^{rs}. Monroe, & Maria, & am happy to be able to report the acc^t. of their good health. Retir'd however, and separated as they are from us all, they feel much pain in their situation. When I shall be able to relieve them is uncertain, as my present duties, more burthensome than ever, keep me continually employed, and seem to open no prospect of an interval to justify my absence from this place even for a day.

Some of my friends have complained, that I put myself in advance on the lines, on the debarkation of the enemy at Benedict, and connected myself with the military movement afterwards. They intimate that the preference thereby shewn, for military employment, may injure me, while my exposure to danger, in an inferior station cannot well be reconciled to the higher duties which the public claim of me. I think I can easily justify the part I have acted.

When the enemy landed at Benedict, the contemplated preparations for repelling the invasion, were in a very immature state. The necessary measures for defense had been delayed too long, before Gen^l. Winder was plac'd in command of this district. They ought to have been made on a more enlarged scale 18 months past. I had most earnestly advised it; the President had approved the advice, but yet nothing had been done, untill just before my visit to Richmond, when it was decided, at the suggestion of the President, by the whole cabinet, that certain measures should be adopted for that purpose. These measures had not been carried fully into effect. In truth, Gen^l. Armstrong had adopted it as a maxim that the enemy would not come here, & he invariably treated with scorn every suggestion of an opposite nature. Gen^l. Winder tho a public man, a good patriot, brave, and active, wants military experience. I thought that by going forward I might aid him in all his measures. I knew that by being near the enemy, I might ascertain facts, & communicate views, which could not well fail to have the weight to which they ought to be entitled. My hope was to rescue the country from the reproach impending over it, and I trusted, if I faild to do it, that I should at least, place my own conduct, in its just light, before the nation. I had a horror, at remaining inactive here, to be involved indiscriminately in the censure, which would attach to others, and which so eminently belongd to the Secry. of war. On these principles I went forward & acted, and I am persuaded, that my calculation of the consequences, was not made in vain.

Had I not counted in some degree on my resources, under such circumstances, & in such difficult conjunctures, I should not have pursued this course. I knew, also the comparative means of others. By advancing I hoped to place myself most distinctly on my own ground, not only, as to the part I had acted, in regard to the defence of this city, but certain traits of character, on which I set some value, and which it required some exertion on my part to bri[n]g into view. It is a strange fact, that in the dearth of talent, and other sound qualities, which has existed, been made manifest, & done so much injury, to our country, since the war, that there should have been any difficulty in obtaining, any military station that I might have been willing to accept. I had supposed that considering my past stations, services, & principles, with the probable aid I might give, the desire wo^d. have been strong to have brought me into command. I have thought that if the President, had any objection to it, it was founded in a desire to keep me here. That other views have animated others, and especially a party in Virg^a., I have well known. To render the efforts of that party, and of its confederates elsewhere, harmless, by useful services to my country, & a fair & honorable course of conduct, scorning the idea of personal attacks, on, or altercations with them or any of them, has been my steady endeavour.

After the defeat at Bladensburg, where I had form'd the line, and made the

disposition of our troops (which I mention in particular confidence, for I wish nothing to be said about me in the affair) and with whom I remain'd in the early part of the action, and untill the President came up with the Secry at war, who after exposing himself sometime to the fire of the enemy's rockets & cannon, remarked that the further direction of officers being entirely military, & Gen^l. Winder present, he wish'd us, to leave it to him, & to take a position less exposed, which we, that is, the Presid^t. the Secry, and I did. I aided twice in attempts to rally them. In short I did every thing in my power, to prevent the disaster of the day, without uselessly exposing myself, and to mitigating its evils afterwards. After the defeat, the occupancy of the city &c. by the enemy, on our return here, there was an universal wish that the entire direction of military affairs should be committed to me. The President, Mr. Rush, & I, returned to the city on the Saturday after the action, which was on Wednesday. The Secry of the navy on Sunday, & the Secry at war a day or two afterwards. On the President's arrival, Gen^l. Winder was also absent, being at Baltimore. Alex^a., had capitulated, and this city was on the point of doing it, to the Squadron ascending the Potom^k., and it was understood that Georgetown would follow the example, and that Baltimore would most probably do it. Relative to the conduct of certain men at the latter place, much may appear hereafter, as is believed, to their dishonor. The prompt return of the President here, was intended to anticipate & prevent these evils, & it had the desired effect. As he Mr. Rush and I rode next morning to the navy yard, we were follow'd by Dr. Thornton, who stated to the President that the people of the city, were disposed, to capitulate. The President forbade it. He press'd the idea, as a right in the people, notwithstanding the presence of the gov^t. I turned to him, and declared, that, waving the military command, if I saw any of them, proceeding to the enemy, I would bayonet them. This put an end to the project. The doctor retired, & afterwards changed his tone.

In this state, the duties of Secry at war, and military commander vested in me. On the arrival of Gen^l. Armstrong there was an universal remonstrance of all the military collected here against acting under him, & the same sentiment prevailed equally with the citizens. The President requested me to continue to act. I replied that on our arrival, when the Secry was absent, it became me, to render any and every service in my power, but now that he had return'd, the official relation between us claimed attention from me; that it would be improper for me to take any step, within the limit of his dep^t. not known to and sanctioned by him. The President approved the sentiment, and had an interview & conference with him, the result of which, was, his departure from town the next morning, to leave the door open for my agency. Deputations had been sent to the President by all descriptions of persons, disclaiming confidence in, and expressing a desire for his removal, and in the exasperation of the moment, some had threatened to rid the country of him in a more efficacious way, with which it is believed he was acquainted. The Secry. has now resigned, and the question will be whether I will take the dep^t. of war, on which I shall be glad to hear from you.

The Secry at war has published a statement of the causes of his resignation &c. at Baltimore, which I have not yet read. I am told that he speaks unkindly

of the President, & imputes his resignation to intrigue, meaning I suppose that I have had an agency in it. This is beneath my notice.

These details may be interesting to you and Eliza. I may add others hereafter.

WASHINGTON, DEC^R. 2^d. 1814.

DEAR SIR

I had intended to write you fully my sentiments on the suggested amalgamation of parties in the admⁿ., but I have not time to say more than a few words.

With whom would the treaty be formed? men of merit who had signalized themselves by their patriotism, in defending the rights of their country, in a contest which put everything at issue, or who, after having formerly, asserted those rights in public stations, had given them up, in the present war, denied the justice of the cause, and done everything in their power to prevent success, short of joining the standard of the enemy and bearing arms against their country? Your knowledge of our aff^{rs}. will point at once, to whom the latter description applies, & with whom the compact would be formed. Could such a compact be made in good faith on their part? One which bound them to change their policy, to wheel completely round, for a price? Would their associates, who got nothing, go with them? I think not. They would support those who got into the cabinet, only, on the principle, that a breach had been made in the wall, which would open it to the whole party, and they would support the vanguard, only, while they saw they were not betrayed. As soon as these new admⁿ. men adopted a system of policy, which they had before opposed, they would be abandoned, and if they adhered to the former policy, they would paralyze every effort, and either producing an change, overthrow the repubⁿ., and party, or force on it and the party, new struggles, to extricate themselves from new dangers.

The republican admⁿ. act under a charter not to be violated. It is no justification to it, to say that it [was] thrown into great difficulties by a virtuous struggle with a foreign power, which have been greatly augmented by the unprincipled conduct of an internal party, to bargain with the latter, to lessen its difficulties, to save itself, under a pretext of saving the country. Such a bargain would ruin the admⁿ., the party, & perhaps the cause of free gov^t.

There can be no change of admⁿ. but by the people. That must be by change of party. Compacts may be made in Engl^d., where the ministry takes its power from the King. But it proceeds from the people. A compact by the admⁿ. to admit into the cabinet, (not to act under it, in the army, or a foreign mission) in a participation of power, could not be justified in my judgment, on any correct view of the subject. The theory & motive, as suggested by you, is important & patriotic, but would be ruinous in practice.

I have this moment rec^d. your letter of the 27th., which excites my surprise, at finding mine, in reply to your first hint, on the subject have not reached you.

Your friend

TO GEORGE HAY.

WASHINGTON, JAN. 12th, 1815.

DEAR SIR

I lately receivd your letter relative to your essay on impressment, and a day or two afterwards, the work itself from M^r Rush, whose indisposition, which still continues, render'd it impossible for him to attend to your wishes respecting the publication of it. I put it into the hands of M^r T. Ringgold, who is employed in the dep^t of war, & who will see the printers to morrow if in his power, and make the arrangements you propose.

I shall send you two papers, one with this, & the other by the next mail, which may amuse you and Eliza, & which I wish you to retain. The larger packet is a copy of the proceedings of Congress, in 1785-6-7. on Mr. Jay's project for shutting the mouth of the Mississippi for 25. years. You have heard much of this project. The principal papers in it are the speech of M^r Jay, in Congress, as Secr^y. of foreign affairs, and a reply to it, in introductory remarks, to several resolutions presented by the delegates of Virg^a, the object of which was to take the negotiation essentially out of his hands. I drew the latter paper. The other proceedings, exhibit the details of that extraordinary transaction being an effort on the one side to carry the project, & on the other to defeat it. The object of the party was to separate the country, westward of the allegheny mountain from the union, an object which has been often attempted since, and is still cherished, by the same party. The copy is badly taken; many grammatical inaccuracies are apparent, in the part I have read, which, with the errors in punctuation, I wish you to correct in perusing it. The other paper contains a copy of my correspondence with M^r. Pickering on my return from France in 1797. preparatory to the publication of my views &c., which shortly afterwards took place. I regret now that I did not publish that correspondence in that book, as it is intimately connected with the whole subject, and interesting to me at least.

M^{rs} Monroe has had a bad cold near a week, accompanied some days with fever, but she is now so much better as to dine at table. D^r. Ellzey attended her a few days. I enjoy good health as does Maria. We have so far been peculiarly fortunate, as much sickness prevails, & some have died here. Tell Eliza that Maria talks much of her & Hortensia; that she is a most excellent child, without fault that we discover, and with the best qualities. She is apt at school, and getting forward in reading, writing & drawing.

The business at Congress gets on slowly. I fear that a bank will be instituted that will get into the hands of the Essex Junto & be turned against the gov^t. Our friends want harmony and concert.

From N. Orleans we have rec^d. nothing new or decisive. Jackson is there & active. It may be said that he staid too long on the mobile, but as the Kentuckey & Tennessee militia passd Baton rouge on the 18 ult^o., making about 5000 men & were in good spirits, & the militia of the mississippi territory were rising en masse, we may hope that the enemy would be repulsed. It is said that they were landing 21. miles below the city, at that date.

TO GEORGE HAY.

WASHINGTON, MARCH 2, 1815

DEAR SIR

I have been replac'd in the dept. of State. On my own part I had no desire for it, or solicitude either way. The President remarked that the object which had carried me to the dept. of war had ceas'd by the peace: that the dept. of State would now resume its importance, as we had not a treaty with any power, and had to make them with several. This seemed to be the opinion of all my friends. I had but one objection, which applied to my shifting from one place to another. This, it was said, would be explained, by the causes which produced it.

The enclosed papers may afford to you and Eliza some amusement. It is generally thought that Mr. Dallas's report on our finances, and mine on the military establishment, produc'd a good effect in England. You have probably seen, Cob-bets comments, on the latter. It seems to have been concluded, that we should raise 100,000. men, & march with them, into Canada. It is probable that Ritchie would republish these passages from the two papers which I send you, & consider your offering them to him as an act of kindness, & civility. If you think otherwise return them to me & I will give them to Mr. Gales.

I have been very desirous of procuring some employment for Charles, and had the war continued, should have been able to do it in the army, tho' perhaps not in a grade which he might have desired, & fairly expected. Eliza intimates a hope that he may be plac'd in the family, as Secr^y. of legation, of one of our ministers abroad. This is utterly impracticable. The ministers are generally consulted, as to the person, whom they take with them, & they generally prefer some near connection, or person whom they wish to patronize, or (in the case of those who are sent to the continent) who understands, well, the French language, & can supply their own want of it. In the present instances, the President wishes to break through this rule, & to appoint Mr. Purviance, & Mr. Carroll, who was (the latter) with Mr. Clay, tho' it may be added that there are many officers of rank, who have gained credit by their service in the war, who have solicited these appointments, among them Col: Drayton of S^c. Car: is one. He was at the head of the bar in that State, & rec^d. the last year of his practice, 15,000 dol^{rs}. Even could he gain the appointment, I should think it injudicious to obtain it for him, as he would, at the end of a year or two, return, with perhaps increased habits of expence. Unless he was sure of advancement in that line, which none are, under our gov^t., having his fortune to make, I see no advantage which he could derive from commencing it.

I indulge the hope that we shall, all of us, retire to Albemarle, where we shall be neighbors, and be much together. Colletts farm, or rather Alexanders, will be for sale. He gave 5000 dol^{rs}. for it. A small part of mine added to it, would make a valuable estate, on which I should wish you to settle. Your books with mine would afford us sufficient amusement in that way. The improvement of the farms would give us exercise. My course will be fixed in a couple of years. If an event in which my friends take an interest, & which seems to be favor'd by the good opinion of many of my fellow citizens at this time, should occur, it will doubtless facilitate all measures having this project ultimately in view; and, pending that state of things, afford the means of bringing us much together,

under circumstances every way comfortable & agreeable. If it does not, I shall be at liberty to go home, which I shall do without a moments delay. In either case, I shall avail myself of the first favorable opportunity to sell my land in Loudoun, with a view to promote this arrangement, the first step to which will be the payment of my debts. My advice to you is, to dispose of your property in town, as soon as you can to advantage, and to apply a part of the money to the purchase of an establishment of your son, which I would make as respectable as he ought to expect, & even more so, considering that you own nothing but the fruits of your own industry, & have given him as good an education as you had receiv^d. The rest of your money might be plac'd in a bank, the interest of which you would require to supply the defect of crops &c. If there was a good prospect of great increase of value, in the Chickahomany property I would retain it; otherwise I would sell it, at a proper time. Our families are small, and it becomes daily more our wish to be more together, and I hope that it will be quite practicable. It would give us great pleasure to see you this spring. I have much to do in the dep^t. of State, & must remain chargd with the dep^t. of war till a successor takes my place. Gen^l. Dearborn is nominated, but his confirmation doubted. His duties will be defin'd, limited, & simple, confin'd principally since the peace, to the reduction of the army to a peace establishment, & to arrangments of an œconomical nature, including the completion of the fortifications &c. These require a good head, a good heart, an honest one, & method, rather than great talents. The oldest officer in the army, about to leave it, has no interest in forming a party in it. He possesses too all the knowledge requisite for the duties enjoined on him. If we cannot visit you, you must visit us when the roads are good. Of this we will communicate hereafter.

Your friend

J^A^S. MONROE

If you could come into the congress I should highly approve it; or even into the state assembly; but would nothing without a certainty of success, & support of whole republican party.

TO GEORGE HAY.

WASHINGTON, MARCH 5. 1815

DEAR SIR

I receiv'd yours of the 27th. to day, with one from Eliza to her mother.

I wish you to know every mov'ment that is made here, or that I become acquainted with elsewhere, but you cannot be too much on your guard, against those, who try to excite, for the purpose of drawing from you, your wishes & sentiments on all subjects.

I have known from the commenc'ment of the war, that it formed a crisis, which would try the strength of our government, and which required the greatest exertions & sacrifices from those who had to conduct it. I have been willing to make both. For the former, the public seem disposed to give me some credit. Happily they do not rest, on the presumptive evidence of late success only, but on authentic documents, which will, I think, evince a system, of active and timely measures,

well adapted to their objects, that will do me credit when I am gone. I do not anticipate, that it will be said, should this evidence ever come before the public, that the hasty retreat of the enemy from this river, their repulse at Baltimore, the safety of New York, of our frontiers, in their whole extent, of our coast, and the victory at New Orleans, were merely the effect of good fortune. We had undoubtedly good fortune, but we did something to secure it. My candid opinion is, that all dispassionate men will allow, (knowing facts) that I render'd every essential service to my country, while I held the war dep^t., in the interval between the burning of the publick buildings here, & the peace. When I enter'd the dep^t., every thing was in confusion here, and little done elsewhere, to provide for the pressure which the termination of the war in Europe enabled G Britain to make on us. Our finances were in the utmost derangement. I negotiated with every bank from New York to New Orleans, & procurd money, to supply the troops with provisions, clothing, transportation & partly with pay till Mr. Dallas came to our aid.

I shall take a copy of my correspondence, while in the dept. of war, which will form a vol.; & keep it among my papers. I will give you a view of it, as soon as it is finished. It will shew the extent of the objects, and the variety, to which I had to attend, from the movment of armies, to the smallest details, in every branch of the staff, and to other objects, not within the duties of the dep^t., but which the state of aff^{rs}. forc'd on me.

On the other branch of the subject notic'd in the beginning of this letter I will write you in my next. I will observe only in this, that the principles which have governed me, are well known, and are such, as cannot fail to command the esteem of honorable minds. That, Virg^a., and my friends in Virg^a., are to be useful to me, if the promoting a certain result, is viewd in that light, by leaving things to other states, & taking no part whatever, in what concerns me. The less the state acts, the better the effect in other states; the less my friends act, the better the effect on the state generally. An attack on me by my enemies in Virg^a. (it not being provoked by my friends) would do me more good than harm in other states.

TO GEORGE HAY.

WASHINGTON, JULY 5. 1815

DEAR SIR

I arrived here on sunday by the farm in Loudoun, improv'd in my health, tho' I movd with some rapidity. While in Albemarle, I had the trust for securing the payment of the debt to the bank witnessed, & acknowledged the other deed, before two magistrates of the country, both which instruments are left with Eliza. The last act was perform'd on the morning I left home at Milton, & Captⁿ. Meriwether one of the magistrates before whom the acknowledgment was made, took the deed & promised to send it to M^{rs}. Monroe, so that I conclude it has been receiv'd.

I think that Eliza had improvd in her health, tho' its state was very unsettled & precarious. With great care & attention it may I trust be completely reestablished, but it will require time and a strict observance of the regimen prescribed,

by the eminent phisician, whom, she informs me, she has consulted. Her mother will devote herself to this object, which is so interesting to us, & regulate her movments in future with a view to it, remaining in Albemarle & Loudoun, that is in the upper country, while a residence there will be useful to her. We hope to have her with us here this winter, and we trust that it will not interfere with your engagements to be with us, untill her health is completely restor'd. I have been too short a time here, to decide, when it will be in my power to return to Albemarle. Mr. Dallas has been indisposd, & wishes some indulgence from his present labours, for the recovery of his health. For that purpose he proposes to make a visit to Phil^a., & remain there some weeks; & Mr. Crowninshield wishes to visit Boston. In their absence I ought to be here, or at no great distance from the city, in Loudoun for example, from which place I might return to it on notice, in a few hours ride. The accomo[da]tion in Albemarle is much the best, tho' not in reality bad in Loudoun. What I hope to accomplish is to proceed to Albemarle, in a few weeks, to stay there one week or fortnight, & then for us all to come to Loudoun, & for the family to remain there, untill it be safe for them to come here, which will be after the first frosts. In my absence they will be lonesome, unless you are with them, which I hope you will be as soon as in your power. I shall bring up the business of the dept^t. immediately, & endeavour to stay as long as I may be able in Albemarle, where I have much to attend to, but I am aware that any omission here will expose me to severe attacks, which many are disposed to make.

With Mr. Jefferson I had much friendly intercourse while at Albemarle, and I am convinced of the interest which he takes in my welfare. The day he dind with us, he seemed anxious that his disposition towards me should not be misunderstood, as he expressed such sentiments of my services, in the dept. of war, to others, as left no doubt on that head. Therefore he has been practic'd on by artful persons; but time & facts, the strongest of which has been my undeviating friendly deportment towards him, of which he has perhaps had more correct information of late, have put this in a true light. He is naturally frank & affectionate, and in my judgment, incapable of playing a double part. His enemies are never deceiv'd, by an improper confidence in his friendship. His whole family were kind to mine. It is most gratifying to me to cultivate this relation, since it has so long subsisted & been so sincere on my part. Dr. Everett has been persecuted by a party in the county, the same who persecuted me. He is an honest, & honorable, as well as enlightened man, but he ought to discriminate between the positive injuries, of the connections of Mr. Jefferson and the countenance he necessarily gives them, extended perhaps by misrepresentations made to him, & the excitment thus produced in his mind towards the Doctor, and any fix'd hostile purpose being entertained against him. I do not think that such exists, tho' I am aware that very unfavorable impressions, may have been made on him respecting the Dr^s. conduct even towards himself, which it will require time to remove. To this I will attend, as I will to the conduct of those who have so much annoyd & injurd the Doctor, provided I can be sometime in the county this fall. That persecution must cease, & I will endeavor to put an end to it. The same impression ought to be taken by my brother, & by his immediate connections. My decided opinion is, that an active intrigue is going on at this time against me, under the managment of W.

Nicholas, Giles, & others, and that Giles is now on a visit to New York to promote its objects. Who are the other parties to it, is not so evident, tho it is probable there may be many even at Richmond. Equally probable is it, that these two men prompted by personal ambition, & personal hostility its offspring, may act pretty much by themselves, and that others their quondam associates may now have no connection with them. I suspect none others of active hostility, tho it may exist. It is well to be on ones guard, & attentive to circumstances. Intimations have been given me that Mr. Randolph will come here, with the most hostile purposes towards the admⁿ., & towards me personally. O. Meade has said, to a friend of mine, that my object has been to preserve my relations with those people, that is, the relation of amity, which formerly existed, to keep them quiet, since it had been stated to him as a fact, that I had approv'd the whole political career of M. Randolph, & that there was proof of it. This fact he profess'd to have receivd from W. Leigh, who said that I had written to him to that effect. As this allegation is entirely destitute of foundation; as, on the contrary, I knew nothing of Mr. R's attack on the admⁿ. till after it was made, and never anticipated such a measure; as I regretted it, as soon as I heard of it, and expressed that to him in two letters; as I consider'd his course not only injurious to the republican party & cause, partaking in truth of a species of phrensy, but, so far as he might appear to be connected with me, highly injurious to me, I always deplored his conduct, and endeavor'd with due regard to delicacy to separate myself from him likewise in view of the public. This was not easily done, since he was not disposed, to stand on his own ground, and leave me on mine. You, chancellor Taylor, Mr Mc. Rae, and others, indeed Mr. Leigh himself, are well acquainted with all that took place on this point, & can do me justice. I felt, at all times, that I had just cause of complaint against Mr. Randolph, for his conduct in this respect. I thought, even when we were on the footing of the most friendly intercourse that had ever occur'd between us, that he faild in magnanimity as well as in justice to me, in not placing this affair in its true light before the public. You may recollect that I express'd a wish to Mr. Leigh that it might be done, & shewing him my letters to Mr. Randolph, from London, intimated a desire that he, Mr. R., would give them publicity. Mr. Leigh said that Mr. R. could have no objection to it, but seem'd to decline any agency in promoting it. The sequel I need not detail. The fact is, that I was reduc'd to the necessity by his conduct, either, of letting it be inferr'd & believed, that I had been acquainted with, & a party to his attacks on the admⁿ., while I acted under it, thereby injuring my reputation for morality, which if friendly to me, he ought to have been solicitous to avoid, had he had no other motive for it, and was likewise acquainted with & a party to all his measures & proceedings after my return to this country, while I was at home, & had no knowledge of them, or of his views or intentions, having held no correspondence with him, or of terminating this imputed relation & cooperation, by some degree of force. Let me reappear, on the public theatre when I might, and it was just & proper that I should have a character of my own. I was no appendage to Mr. R. I had not been one to either of our Presidents, as public events & documents prove. I could not be one to this young man with whom I had little acquaintance, & that little of recent date, produc'd by his attentions, while I was in the gov^t. of

Virga^a., and afterwards, by the care which he imposed on me, voluntarily & most willingly, it is true, of his unfortunate nephew.

My feelings towards other members of the admⁿ. at a certain time, and the propriety & even the justice, (to say nothing of the policy as to its effect, on the great republican party & cause) of making an attack on the admⁿ., were two distinct things. I never did contemplate an attack on the admⁿ., and could & did not advise, or in any manner, directly or indirectly, sanction one. My feelings were communicated to Mr. Randolph, Mr. Leigh and others, but they were always treated as forming a personal consideration only, not as affecting the course which ought to be pursued, in regard to the great interests of the nation, with other powers, or that of any members of the republican party, towards a republican admⁿ. In forcing on me, as Mr. Randolph did by his conduct, the necessity of placing myself before the public, on ground entirely independent of him, he has I presume been offended, and we have seen enough of him to apprehend, that disappointment, even in such a case, and resentment, and even revenge are synonymous. Those who have had the most serious conflicts with him think unfavorably of his principles. I have imputed much to the violence of his passions; my acquaintance with him began under an impression in favor of his having magnanimity, & altho' that has yielded, I have reserv'd the liberty of forming a fixed opinion, on the more important trait of character. If he yields to passion in this case, I should not be surprised, to see, an attack from him on me, on the ground of my having prompted his attack on the admⁿ., when he first made it, and known and approv'd it in its subsequent stages, and to see likewise, all the manifestations of feeling, of a personal nature, communicated in confidence, brought forward & relied on as proofs, of the charge. This is not an improbable event, and from the intimation, above mention'd, ought to be look'd for. Whether Mr. Meade is guarded in his remarks, and spoke correctly of what he had heard from Mr. Leigh, I know not. Or whether both, in case he did, indulged the ordinary license used in electioneering contests only, is equally unknown to me. I ought to be prepar'd, for the attack, should it be made. That I shall vindicate myself against it, to the satisfaction of the public, I have no doubt. Knowing what I have stated you will look to the object, & incidentally, call to the memory of our friends, all the facts with which they were acquainted. Towards Mr. Leigh, I have strongly indulged that feeling, and would wish still to do it, if to be done with honor; tho' I am inclin'd to think that he has done much to put it out of my power. With him, of course you will be on your guard. It would be gratifying and useful to have him state in a frank & manly manner, all he knows on this subject; but if he is not the man I supposed him to be, and is the mere creature of Mr. R., looking for the means of injuring me in subservience to his view, any conversation with him, on the subject, will shew your sensibility to it, and may even operate disadvantageously. We have seen Randolph work round, attacking the admⁿ. with increasing violence, praising the federalists & those of the monarchical stamp who were dead, and identifying himself with the acting party, more violent than they, attacking individuals in his course, & breaking off from almost every staunch republican, till it remains only for him to make the last attack on me. Having had to encounter so many attacks heretofore, and so many distressing collisions where there was no

attack, I own that this would give me pain. The management of the reply, which would in fact be of my vindication, would require my greatest care & circumspection. It is in the character of this person, to make his attack with violence, in Congress, without any previous notice, to the party assailed, or connection with the subject under consideration. Personal attacks, can only be met personally, especially of the kind anticipated. It is one which however painful, I shall be far from shunning. Perhaps it is due to my reputation that it should be made. If made, I will do justice to myself in my reply, in all the circumstances, which it necessarily brings into view.

Wishing these circumstances & ideas known to you, I have gone further into them, than I ought to have done, considering my public duties, at this time. I have not however said all that I intended. I shall add the residue hereafter.

Your friend,

JAS. MONROE.

TO GEORGE HAY?

SACKETTS HARBOUR, Aug^t. 5. 1817

DEAR SIR

I wrote you yesterday from Brownville just as I set out for this place. I hoped then that I should be able to sail a few hours after my arrival here, but the wind was a head, & still continues so; we expect however, to get off this evening, or to-morrow morning.

My reception at Watertown, 14 miles from this place, at Brownville, & here, will I fear give much offense to Mr. Ritchie, & bring on me, something more than an implied attack from that quarter. The whole population turn'd out, from the surrounding country, and met me at each village en masse. In crossing a bridge a mile from this town, there were 19. triumphal arches raised over it, one in honor of each State, whose name was inscribed on it, & on the first, was a large Eagle alive, & another on the last. I could not control this movement, more than those which occur'd to the Eastward, and indeed at Baltimore, Phil^a., thro' the whole State of Jersey, & at New York. At night, this place was illuminated &c. of which I knew nothing, till this morning, having gone to bed early, in consequence of much fatigue. The military had nothing to do in this business. It was exclusively the act of the citizens.

Mr. R. notices my attending parties at private houses, at Boston, and mentions the names of some federalists, from which, and particularly, as he omits to mention, like calls, on republicans, I infer that he disapproves my calling on the former, on acct. of their politicks. The truth is, I consider'd before I left home, whether I would call on any one, and my bias was rather against it. In Baltimore, Gen^l. Smith attended me to the battle ground, to the forts &c. in the morning, & on our return, led us, unknowingly to his own door, which we enterd & found a breakfast, prepared for us of which we partook. At Phil^a., I called on Mr. Yard, where my child was sick, & afterwards on Judge McKean, Mr^s. Dallas, & Mr^s. Morris, both of whom cried the whole time I staid, an old Mr. Willing, & perhaps

one or two more. At New York, I called on M^{rs}. Gouverneur, M^r. Knox, old M^r. Rutgers, Gen^l. Marston & several others. I did the same at other places, as I went along, and could not therefore decline doing it at Boston. Before I got there, & indeed from the commenc[']ment, I had disregarded party in that circumstance, and in consequence did so thus. With respect to calling at private houses, in my route, I am satisfied that in so doing, I did right. The hereditary chiefs of the European gov^{ts}. do it; on what principle then, can the representative of a free people, refuse to do it. Wherever I did call, there was some marked circumstance attending it. I call'd, for example, on Gen^l. Dearborn, on the widow of the late M^r. Hancock, and of the late Vice President, on M^r. Gray & on M^r. Adams. M^r. Otis, and M^r. Bigelow (federalists) were of the committee of arrangement, according to my recollection, tho M^r. Lloyd, M^r. Jones, & some others were not; they were highly respectable citizens, & their houses gave commanding view of the town and harbour of Boston, as did that of L^t. Gov^r. Philips. As to the question, whether, I would call on federalists, provided, they came forward, & lost sight of party in regard to me, it appeared to me, that there could be no cause for doubt; that in fact, it was, of the highest importance, to my country, that I should do it. Had I failed to do it, I should have lost all hope, of accomplishing, an union of parties, in the support of our republican gov^t. By repelling them, I should have excited their resentment against me, and thereby tended to confirm them in their former system of conduct. By a generous & liberal conduct towards them, I place them on honorable ground, and facilitate essentially, their union with the republican party. Of the effect of my tour, & of the course of policy which I have pursued, in this respect, the information which I have received, from the best sources, is the most consoling. I am aware, that too implicit confidence, ought not to be plac'd in these assurances; that future good conduct, ought to be receiv'd as the only sure pledge of a change. When I commit error, I may be reproached for it. If I go before the republican party, in committing high trusts, to any of these men, on specious appearances only, thereby wounding the feelings of the republican party, & giving new hopes, & of course new strength, to the federalists as a party, then I shall merit censure, and shew myself unequal, to one of the most important duties of the office I hold. Nothing of this kind can yet be imputed to me, nor does it comport, with my views, or principles, to commit such an error. I wish to bring about an union of the whole population of our country, in support of our republican gov^t., which can be done only, by an union of parties on republican principles. A premature favour, of any leading federalist, would tend to defeat that object, by exciting the resentment of the republicans, at the same time that it cemented the federalists, who would infer that it proceeded from fear of them as a party, whereby the two parties would be kept asunder, and I, by an act of folly, not only, defeat the great object, which I have most at heart, but lose the confidence of those with whom I have always acted, & who possess, in the highest degree, mine.

After the great divisions & collisions, which have existed in our country, I know that there will be much difficulty, in bringing about the union contemplated, & that in attempting it, I expose myself to the attack, if not to the suspicion of meriting it, by a change of principle on my own part, of many in our own party. But

if I act, with a sound discretion, profiting of my long experience in the affairs of mankind, I think that such an attack, will not do me much harm. It will be more likely to injure its authors than me. While I pursue the past principles of our republican gov^t., its friends cannot attack me, with success, on the pretence of a departure from them; and there are very few of them, who will attack me at all. Those of that party, who do attack me, will be found to consist of men, bearing personal hostility to me, from some selfish consideration or other, and I shall be disappointed, if their motive is not soon seen thro, by the public, to their disadvantage. With respect to the incidents of this tour, be assured, that nothing has occur'd, which can be turned to my injury. When I saw so vast a mov'ment, with so great an excitement, thousands, & tens of thousands, on the streets and high roads, many old men, shedding tears, & coming up to me, merely to shake me by the hand & say, "be firm to the cause; I will die, in support, of our free republican gov^t.," & then retiring; when I saw some reading the scriptures, as I pass'd, and not even looking from them, & the whole community agitated, I could not believe it to be a thing of form; or one that I could control, or ought to repress. I soon trac'd the cause, to the highest and most noble motive that can animate the human heart, a profound attachment to our republican institutions, the evidence of which was most strong to the Eastward, because the great body of the people knew that they had held a station & acted a part in the late war, under the influence of circumstances, which they could not control, which had put their principles & character in doubt, & by which they had been humiliated & mortified. When these people saw me come among them, in the highest office of the country, in a spirit of amity & conciliation, & not of censure and reproach, one who had been so much reviled, & which, their leaders now acknowledged that I have not deserved; when they saw me, attentive, to great objects of national concern, & even to those of a local nature, in all of which, they were deeply interested, their noblest feelings were roused, & they rose, and came, in mass, to meet me. I put them at ease, at once, by assuring them, that I took nothing to myself, in all the manifestations of respect & consideration, which I saw; that my humble services gave me no such claim; that I knew that their mov'ment was to be imputed to their devotion to their gov^t.; to the free republican gov^t., which they had instituted, for their common good; that my appearance brought to their recollection, with much sensibility, all the advantages which they enjoyed under that gov^t., & confirmed them in the unalterable purpose of supporting it. In none of my answers will you see, any pretention, set up by me, but an uniform disclaimer of any, in all you will see justice done, to my predecessors, & particularly, the two last, since in their terms only, did any question arise, in the quarters referred to. In this respect, I have gone out of my way, more than once. Attacks on me from such men as Mr. Ritchie, appears to be, by the paper mentioned in my last, or by any men in the spirit of that paper, in relation to my tour or my conduct in it, will I think soon recoil on them, & by the efforts & explanations of many who were spectators, who, were disinterested, & therefore most entitled to credit, as to all the important facts.

Believing that will be interesting to you, & to my whole family, to receive these details, in addition to those heretofore communicated, I have availed myself of this unexpected leisure, to give them.

My health is I think better, in consequence of less fatigue of late. The whole country here, is healthy, & I think I shall derive advantages from being on the lake, in a good brig, where I shall be quiet, & have good air. The ill health of our troops in the late war proceeded, principally, if not altogether, from the want of cloaths, exposure to bad weather, at all seasons, & to bad cooking. I take care to avoid the water, and every other cause, that has been thought dangerous.

Your friend

JAS. MONROE.

In the course of this tour I have been compelled to answer four or five addresses in a day as I have passd forward, not one of which, I had seen, or heard, till read, & in some instances, have had cause to presume, that I had been peculiarly successful. How does this fact, if true, correspond with the dullness, and slowthful operation of faculties, imputed to me by Mr. Wirt. I have been particularly hurt, by that allegation against me, from so respectable a quarter, because I candidly think that if I have any marked feature of character it is that of promptitude in any and all situations in which I have been or may be placd. I have been much mortified to see, that portrait, circulated about, by those who quoted it, in my favour, apparently, at least. The trial of my faculties, and of the prompt command of them, was the greater, from the consideration that my mov'ment was so rapid, that I was seldom more than five or six hours in bed, in any one day of 24.; that the committees of arrangement who met me at the entrance into every town, with numerous escorts who attended me thro' it, kept me always in a crowd; that the heat was great, the dust excessive, and above all, that my health was delicate. I knew that if I failed, or even stopped, on account of fatigue, that reports would get into circulation, respecting my ill health, which would distress my family, and injure my political standing; I therefore continued to make the greatest exertions in my power. My constitution, has, I trust, got the better of all the difficulties, to which I have been exposed.

WILLIAM DAWSON TO JAMES MONROE ON BRITISH WAR PLANS
IN 1814.

Printed from the original manuscript in the New York Public Library.

CONFIDENTIAL

NEW YORK, 2^d June 1814.

THE HON^{BLE} JAMES MONROE,
Secretary of State,
SIR,

Having just arrived from Bermuda, where I remained six weeks, I deem it a duty I owe to my native Country, to make known to the Government some of the views of Admiral Cochrane, against this country. They are first, to put Arms into the hands of the Negroes of the Southern States, for which purpose there are 25,000, stand now at Bermuda, and many more expected; the second is an attack on this City, by land and water; bringing his forces down the sound, on which side he has been assured by a Mr. ———, there are no fortifications (knowing that there ought to be, if there is not, I gave assurances there was a very strong fort at Hurl Gate); the third is an attack on Portsmouth, N. H., to destroy the vessels building there.

It is said that the affairs of Holland, together with the expectation that Peace, will grow out of the negotiations at Gottenburgh, has for the while, suspended the armament of Ships, and troops, intended for the objects I have mentioned, yet he has force enough to do much mischief, and I know he has the disposition to do all he can

Having found all Englishmen, to believe that every Federalist, was heart & hand in their cause, and throughout France, every Frenchman believing that the whole Republican party, from the President down, were devoted to the French Government, my politicks being known to be Federal, will account for the free manner in which a certain Gentleman, who is in the entire confidence of the Admiral, communicated to me his principal points of attack.—I hope they will all recoil with disgrace on the assailants, when attempted

I must observe that it is generally believed Peace will take place, but I do not believe the Admiral disposed to make an Armistice I mention this, because I have heard that he had been applied for that purpose

I make to you Sir, this communication in the fullest confidence of secrecy, for altho' my name should be kept out of sight, a publication of the facts, would as plainly point out the author, as if my name was affixed thereto. That I may know this letter has reached you, I shall be obliged by your acknowledging its reception

With great respect,

I have the honor to be,

Sir,

Your very Hum^{ble} Servant

TO HENRY DEARBORN?

WASHINGTON, 22. April, 1820.

DEAR SIR

The arrival of the Spanish Minister and the renewal of a negotiation reminds me of a debt I have owed you sometime since, tho, in truth so heavy is the pressure on me, during the Session of Congress, that I am forced to rely on the indulgence of my friends, to pardon my neglect of them. This gentleman has opened a communication with Mr. Adams, but as yet we have no grounds on which to conclude that the result will be satisfactory. Our object is to arrange the business with him if it can be done, without a sacrifice of the national rights, interest and honor. If it was the intention of his government to make the arrangements, and he has the necessary powers, which, in that case he must have, it will be done. But I fear that procrastination and evasion are the objects. Should this appear to be the fact, on thorough investigation, the subject must again be brought before Congress to be disposed of finally by them. Another week will give us such an insight into his powers and views, as will dissipate all doubts as to the results. Should the business be settled in any manner whatever to put the U States in possession of Florida, especially if it be in accord with the Spanish Minister, it may be presumed that Congress will authorise the appointment of Commissioners, for the settlement of the claims of individuals on the government of Spain. My object will be to take one from the East, one from the middle, and a third from the Southern States. In making a proper selection from the East, I must ask your aid and that of some other friends there. Mr. Sullivan is desirous of obtaining the trust, and on my own part I should be much gratified to see him employed, provided he be supported by the republican party. I became acquainted with him in Europe, as you know, and under circumstances which interested me in his favor. Our acquaintance has since continued, and been of a very friendly character. He and his Lady, as well as her aunt your Lady, are respected and esteemed by my family and we wish them well. But his employment must depend on the above mentioned circumstance.

The effort of my whole life has been, in support of the republican cause, and it will continue to be the object of my future exertions. But I have known that that cause was to be supported by an adherence to certain great principles, which ought and would rally around its standard, the great body, if not finally the whole of the American people. First we must be true to republican principles, to the sovereignty of the people, in both national and state governments, to the right of elec-

tion and responsibility in the public servants, to the electors, that is to the people. Second, the dominant party which is now happily the republican, must be moderate in the exercise of their power, satisfy all those in the opposite ranks, who were led astray by misrepresentation or prejudice, that they had been ill advised and deceived; and even those who honestly doubted the practicability of the System, that their doubts were unfounded. I have always believed that the number of those in the ranks of federalism, who were attached to monarchy, was small; that they might be counted as individuals only; that the great body of the people of the U. States were decidedly republican. And how can this be doubted? what freeman, in his senses would be willing to become a slave, or to lose his equal right to the highest trust in the community, provided, he had equal merit, and that merit was known to and acknowledged by his fellow citizens? to bring all over to the same standard, the republican party must be moderate; must shew that it is governed by principle; that it looks to the support of a cause, that it has no malignant passions to gratify, no base purposes to promote. If this is done with out risk to the cause, as I have hoped and believe that it might be, passion on the other side would subside, things would be viewed in their true light, and the good sense and integrity of our fellow citizens prevail.

In coming into this station, I have acted to the best of my judgement, on these principles. The republican party have weathered many storms, they have stood firm in the worst of times and triumphed over the greatest difficulties. In the hands of this party, that cause is safe. It is just: it is wise, to cherish it. The person in this station, therefore, must rest on that party and go with it. He cannot go before it, or he exposes himself to dishonorable imputations, and loses the means and opportunity of being useful. All that he can do, is to give an example to his own party, of his moderation and to shew to them the advantage of it, in support of the cause to which they are devoted. While the government in its chief stations, in the heads of departments, in its foreign missions and other high trusts of the kind, is in the hands of republicans, every thing will be safe. To confide to the other party, while it remains such, no trusts at all; to employ its members in no station whatever, however subordinate, would be to persecute and disfranchise it. By pursuing such a course of policy, we form within ourselves two distinct communities, hostile to each other; we foment that hostility and perpetuate it. My idea therefore is that the progress should be gradual but safe; that it should manifest that the door was open to those who wished to enter it on just principles and who sustained such characters as entitled them to confidence.

I have always considered Mr. Sullivan as republican in principle, but having his family to provide for by his profession in Boston, as taking no part after his return from Europe till the late war, when he opposed the Enemy. If this is the case, the employment of him in such a trust might not only be safe, but have a good effect. Still if he is to be brought forward, it must be by the support of the republicans, that if it be in any respect an act of liberality towards the other party, they might have the credit of it. If I brought him forward, without its being known that they supported him, they would not only have no credit from it, for a tolerant and liberal policy, but it would injure them, as well as me, as it might be inferred, that I did it against them. The persons whose support ought to be obtained, in aid of your

own, if you think proper to act in it, you better know than myself. General King, the republican members of Congress here, Mr. Eustis, Mr. Crowninshield &c. occur to me, as those who ought to aid to give credit and effect to the measure.

I have written you a long letter on an interesting subject, in which I have endeavoured to explain fully my views and the principles on which I have acted in the hope of giving the best effect and strongest support to our republican system of government. I shall be glad to receive your sentiments on it, knowing well your devotion to the same cause.

M^{rs}. Monroe and my daughters are always happy to hear from M^{rs}. Dearborn, and to pay all the attention in their power to such of her friends as visit this place. They desire their best regards to her. M^{rs}. M, much oppressed with the duties of her station, thro' the long session of Congress, has been seriously indisposed of late, but is now better

With very sincere regard, I am

Dear Sir, truly yours,

JAMES MONROE

TO SPENCER ROANE.

WASHINGTON JULY 9th 1821

DEAR SIR

I did not receive your kind letter of the 20th of June, until just as I was setting out for this place from Loudon, being called here by public duties, and wishing also, to be present, on the anniversary of our Independence. Indisposed before I set out, the disease has increased by the journey, so that I have been confined, almost exclusively, to my sick room, since I came down. I brought your essays with me, with intention to examine them carefully here, but my state of health has been scarcely equal to the duties of my office—so that, that satisfaction is reserved for another time; for more leisure, at home, whither I propose setting out back tomorrow or next day.

On this subject I will communicate with you, with the freedom which belongs to the friendship, which has so long existed between us, and in the only way in which I can communicate, if I communicate at all, that is with perfect simplicity and candour. You may recollect, that soon after I came into this office, I considered it my duty to take my stand against the power of the General Government, in regard to Internal Improvements; that I declared, in a message to Congress, that I did not think it possessed that power, and that I should be compelled to refuse my assent to any bill, founded on that principle. Expecting to be called on to perform that duty, I turned my attention immediately to the subject, with a view to be prepared to acquit myself in the best manner in my power to the just claims of my country, whenever that call should be made. Proceeding from one step to another, I have written much on the subject, and have endeavoured to the utmost of my ability, to embrace the general scope of our system. It is possible, that I may publish this paper, even while I am in office, believing, that if it does no good, that it cannot possibly do any harm. In this research I have been guided by principle

only, aided by my own experience and observation, and by the lights, which virtuous & enlightened men have shed on it, having before me, in due time, whatever the distinguished citizens, whom you have mentioned, have written on it, in which are included, every thing that has issued from your pen.

I do not know, that on every point, I shall concur with any one, but I shall advance no opinion on any point, which I shall not give the ground of, so that if I am in any instance wrong, it may be easily seen, and shewn.

If I shall be so fortunate, as to enjoy a short leisure, in the country, I shall finish this paper and soon afterwards I shall decide, in what manner to dispose of it. If to publish it, I will immediately forward to you, a copy; if to retain it, while I remain in office, unpublished, I will find an early opportunity of submitting it to your inspection, and free remark.

Standing at this point, & regarding the duty, I may be called on to perform, I have thought for the present, that I ought to say nothing on any particular controversy, which is discussed, before the public. Regarding the office which I hold, I have thought it due to my country, if I appeared at all, to appear, when called on by some obligation, bearing on that office, such as to reject or approve a law, or by a full exposition, founded on general principles, and dictated by a sense of duty, in consequence of the opinion expressed in the message to which I have referred. If I publish this paper, I shall probably do it, before the next meeting of Congress; if I do not publish it before that time, and the subject is not acted on in the next session, it probably will not be, while I remain in office, so that the restraint now imposed on me, will in either event, be of no long continuance.

With great respect & regard &c.

Your friend & servant.

TO JOHN QUINCY ADAMS

DEAR SIR.

OAK HILL, JULY 27th 1821

I have received your letter of the 25th inst. with the papers noticed, in it.

Nothing can be more remote from my object, than that you should state, in your reply to the French Minister, any thing, either of fact or sentiment, with which, your judgement did not accord. I therefore, most readily agree to the omission of the passage noted by you, suggested in my letter to you, relating to Capⁿ. Edon, as I also do of any intimation that the suppression of the adventurers, at Amelia Island, had been approved by the Government of France, or that of other powers. According to my recollection, Mr. D^e. Neuville had complained of the seizure of some French vessels, by cruisers from the Island, with an implication, that as it was so near our Coast, and a part of its resources were derived from us, (though as he knew, against, and in evasion of, our laws) we ought to be responsible for the conduct of the band in possession of it. I think also, that Mr. Bagot made a similar complaint, & hence I inferred, as I never heard, that either had objected to the measure that they had approved it. I think, that Mr. D^e. Neuville proposed the establishment of a cordon of vessels, along our coast, for the protection of the commerce of France, with the U. S. founded, principally, on

piracies, from that Island. However, I readily conceive that any intimation of the kind will be cavilled at, that may be done, with any ground to rest upon.

My idea is, that the affair of Edon, will be pushed to the utmost extent, possibly to produce embarrassment; that it will be likened to a trade with Nice, La Passage &c.; that he, having been an officer in the French navy, is incapable of fraud; the flag struck &c., are circumstances which will be turned to account, in France, as they have been by the Minister, here. The protest of the Captain, & his letter to Mr. Roth, which I had read before, and have now read, with great attention, are calculated to produce an effect of that kind.

Your views of the difference between a circuitous trade with France through Nice, La Passage &c and the trade in which Captain Edon has engaged, is comprehensive & clear, but I suggest it for your consideration, whether you may not go into greater detail of discrimination, with advantage. The circuitous trade, through Nice to Marseilles, though the duties on the direct trade may be avoided, is not an act of smuggling. A trade to the Havannah, and thence to the U. States, is not smuggling, nor do I presume, that a fair trade to St. Augustine—landing & entering the goods there, and sending them, thence, to the U. States (as I presume, in another vessel) would be viewed in that light. It is the pretended entry, there, & then entering a river, under our jurisdiction, & proceeding to a spot beyond it, where there was no town, no port, no settlement, & from whence there could be no trade, except with us, nor with us, except by an evasion of our laws,—which made it smuggling, & subjected the party to seizure, under them. From Nice & La Passage, one may trade elsewhere, which it was impossible to do from St. Joseph's. I merely suggest this, for your consideration, & without a distinct recollection of the contents, in this respect, of your paper.

In favor of Captain Edon, I wish you to admit nothing that you think improper. My impression, in regard to the whole affair, is, as already stated, that the occurrence is very interesting, by its effect here, as well as in France, and we ought to be on our guard to take no step, which may furnish any, the slightest pretext to any who may be so disposed, to say in the event of disagreeable consequences, that if we had not done *this*, these consequences would not have ensued. I do not wish, in pursuing this course, to omit any fact, or any comment, material to our cause.

I am very sincerely &c.

TO LORD HOLLAND.

WASHINGTON, APRIL 24, 1823

I transmitted lately to Mr. Rush a copy of our State papers, to be presented to you, as a[n] acknowledgment on my part, in return for your kind attention to me, that the interesting relation which existed between us, while I was in England, had not been forgotten. You will find among those papers, a copy of the treaty, which we signd, and of all the documents relating to that transaction, including the correspondence between the ministers of the two gov^{ts}., with that of those of the U. States with their own government, on the subject. You will also find, a copy of a letter from me, to the Secretary of State, written after my return home bearing

date on the 28th. of Feby 1808. in which I communicated more at large my own particular views respecting it. I have thought that these documents would not be uninteresting to you, as they give a faithful sketch of the mov'ment of a free people, in their foreign relations, for more than 30 years, and at a very important epoch. Wherever I had occasion to advert to the late Mr. Fox, your uncle, I have not failed to bear testimony to his high merit, and to his fixd attachment & devotion to the cause of liberty in every country.

Europe is again menaced with a war, founded on the principles of that against the French revolution, that is, with a war which puts at issue the question, whether the people derive their rights from their rulers, or their rulers from them. The speech of the king of France, very distinctly & explicitly maintains the 1st. position, with a right, in the reigning family of one nation, to make war on another, in its support. Before this I presume that the armies of France have enterd Spain, on that principle, unless the attitude which may have been assum'd by G. B., or certain interior indications, may have prevented it. I have no doubt that G. B. may prevent it, if she acts with decision & firmness, nor have I that the attempt, even should it fail, would place her in the sequel, on that high ground in favor of human rights, and their improv'ment throughout civilized Europe, to which she ought to aspire, but likewise be the wisest course she could pursue, to preserve the British constitution, in the great outline in its present form. Our distance makes us less an object for legitimate pursuit, but we do not mean to rely on it alone. The U. States will, I think, assume such an attitude for defensive or offensive operations should either be necessary, as will afford them ample security, against any unlawful attempt on them.

It always affords to M^{rs}. Monroe & myself great pleasure to hear from you & Lady Holland, and of your good health, & of whatever else is interesting to you both and to your family. Be so kind as to present our very respectful regards to her. Assure Mr. Allen also of my very friendly recollections of him. I have troubled you with many letters in favor of my young acquaintance, from different States, for which you have not indemnified yourself in a single instance. The fact is, it has become known that a friendly feeling exists between us, & hence it is difficult for me to resist their applications.

WASHINGTON, 31 JULY, 1823.

DEAR SIR

Your letter of May 14, last, affected me very sensibly, as it called to my recollection many interesting occurrences of my past life, while you were present, & to which you were a party, and communicated many details important to yourself, at this time. That I have not written to you often, has not proceeded from a want of regard for you. My duties, since I came here, in the several offices which I have held, including the present one, have been very burdensome. I have seldom written to my friends; indeed that kind of correspondence, which, of all, is the most gratifying, I have been forced to discontinue. My public duties have absorbed so com-

pletely my whole time and labours, that I have scarcely had a moment to attend to my private concerns, on which the well being of my family, so essentially depends, especially should I be taken from them. They have been neglected & in consequence I have suffered a remark which may carry back to the time that we sail'd for France together in 1794.

On my return in 1797, I sold my military claim of 5,000 acres, part in Ohio, opposite Limestone, the other half in Kentucky, & also 1000 acres of land in Loudon held jointly with my relative Judge Jones, to defray my expenses, the time I remained in France after removed from office and back to the United States when I obtained a passage from Bordeaux. On my second mission, my agent, Col. James Lewis, sold my tract of 950 acres of land, on which the university now stands, while I was at Madrid, for \$5. the acre, and which now sells, from 50 to 100. I believe it was the most that he could then get, tho had I not gone, I might, I think, have avoided the sale. When I left the U. States in 1794, I held all the property with that above mentioned, which I now hold, with little exception added since, and did not then owe \$5,000. Had I remained at the bar, & made the exertions which I have made in another, but sacred cause, what would have been the effect? You can well judge. My expenses and those of my family, have always been very moderate, as much so as possible, regarding the stations I held. In every place that I have held, preceding the present, my compensation has been inadequate, and in this the saving that I have been able to make, has done little more than meet the interest arising on the debts thus contracted and for the support of two estates, one in Albemarle & the other in Loudon, which instead of furnishing a handsome profit, have proved a heavy charge to me. The result will be, that the estate in Albemarle, will certainly be swept from me, with the slaves &c, attached to it, and the most that I can hope for, will be to retain that in Loudon, as a retreat & home for my family in our declining years. For my youngest daughter who, was an infant at your house at Marley, I have done nothing. She has married her cousin Sam^l. L. Gouverneur & settled at New York. He is an high minded & estimable young man, well educated at the bar, & likely to rise in his profession. The other, M^{rs}. Hay, I gave a small tract of land on Chichihominy, 8 miles from Richmond, which I bought, the greater part for a trifle, when in the government at Richmond, before my last mission, with intention then to resume the practice of the law. It would not sell for much now.

It was with a hope of keeping my slaves together, who having been long in our possession, have grown up in families, many of them, and of making a profit from their labour, that I entertained thoughts of sending them to the waters of the Mississippi, in Louisiana. But your letter discourages me from that project, and it appears to be so well supported by facts & judicious reasoning that I rather think that I should lose than gain by it. Such is the pressure on me, by those to whom I am indebted, being Banks, in great distress themselves, that I have advertized my lands in Albemarle for sale, by private contract, by applying directly to myself, on the presumption that before I leave this office, I may dispose of them to advantage. Of the slaves I have said nothing, intending in case I sell the lands advantageously, to dispose of them in the country, to the persons to whom they are willing to belong. I am now treating for the sale of it with Mr. Goodwyn, near Petersburg, a son of the late member of Congress from that district. The whole

effort¹ of my life, devoted to that object, has been bestowed on that estate, which is one of the best in Virginia, of good quality for tobacco, wheat, corn, &c, in an excellent neighborhood, in a healthy country, near the university, within $3\frac{1}{2}$ miles of navigable water &c. We have made many improvements on it, and I am very much attached to it, as I am to the neighborhood & country. But the estate in Loudon, altho' I have built a good house on it, for our summer accomodation while here, will not sell for as much money as will pay my debts, if indeed that in Albemarle will, altho' worth fully one third more. I am very sensible of your kind offer of a tract purchased by you, near St. Helena Court House of 1.000 acres, and should most willingly accept it, on the terms mentioned, but for the reasons stated, and particularly from a fear, that by the decline of the price of produce in that country & of slaves, I should make nothing by it; as also from the consideration that I have offered my lands for sale, and had better keep them there, in the expectation of disposing of them, to their own satisfaction, at the same time.

When I go to Albemarle, I shall be happy to see your son with General Cocke, should he call on me, & if in Charlottesville, I will send for him. How would you like him to be placed, at West Point. The Academy enjoys the highest reputation & merits it. The greater part of the expense is borne by the government and he is taught almost every branch of science. If so disposed, write a letter to the Secretary of War, stating his age, acquirements &c, and get Judge Johnson to do the same, or Governor Robertson to do it. Louisiana has not I think her proportion, which will strengthen the claim. He cannot be admitted untill June next & he must be in his minority, & the younger the better. Pursuing this course & intimating it to me, I will attend to it.

If you wish the P. Office at New Orleans, intimate it to the Post Master General, referring him to me for your character. By the law, he makes the appointments, but in important cases he consults me. Get the Judge to address a like letter to the P. M. Genl. with such other support as you think fit from the city. I should prefer however that it corresponded with your views, to settle in Virginia, and after I retire, that you would pass much of your time with me & my family. The details which you give me of a private nature, are very interesting to me. We are all doomed to severe trials in this life and even those who are happiest do not escape much affliction. My family, who have been always with me in every situation in which I have been placed, abroad & at home, have been & are my greatest consolation. They will, all of them submit most cheerfully to any lot, to which my circumstances may subject me, in any the most unfavorable result. My afflictions here proceeded from the hard rubs which I have received in public life, at different periods & in some instances in this station, and from a fear that I may not be able, in retiring from it, to make my wife as comfortable & make such provision for my children, as I and they had reason to expect. I shall however do every thing in my power for them.

In looking back to my public career, many incidents occur, with which you were well acquainted, tho' it is possible in your pursuits since, through such a lapse of time, they or some of them, may have escaped your recollection. You will I presume remember the difficulty I experienced, on my arrival in Paris, to obtain my recognition of the Com: of public safety, & the cause, owing to a jealousy of Mr. Jays mission to England and of mine to Paris. Of my motive, thence arising for

addressing the convention itself & seizing the opportunity of communicating the resolutions of both houses of Congress & of the Executive, expressive of the interest which they took in the French revolution, to put down all suspicion in the french government on that point & bring the two governments closely together. You were then with me & will I think, recollect, that in leaving the house & walking along the Carousal, on our way home, I observed to you, that considering the state of parties at home, I should not be surprised, if the communication of those documents, notwithstanding the urgency of the motive, should produce my recall. You were acquainted with my injunction on Mr. Payne after obtaining his release from prison, when he had written an unfriendly letter to Genl. Washington & committed it to the Consul de la Tombi, to recall it from Rochefort, where the consul had arrived, on his way to the United States, & his compliance therewith; and you cannot well have forgotten when Mr. Paine, after leaving my house & g[o]ing to Turin[?] had engaged in writing another letter to the General, my exertion first through you, then through Mr. Vauhan & then through Doctor Edwards, to divert him from it, by assuring him that I should consider it the best & a very ample return for the services which I had rendered & kindness towards him, if he would desist from and his refusal to accomodate me.

The state of the negotiation on my arrival in Paris in 1803, or rather of the correspondence, for it seemed rather to merit that name, between Mr. Livingston & Mr. Talleyrand, was known to you. We dined together, with him, with my family, including Col. Mercer, the day after, when Mr. Marbois, entered, while we were at the table, and you will recollect, after his having had an interview with Mr. Marbois, that evening, in which M^r. Marbois informed him, that the first consul had decided, on the sunday preceding, the day after he heard of my arrival at Havre, that he would cede the whole Province, in the negotiation about to be opened, & being a treasury affair, would commit the negotiation to him, you will, I say, recollect how much Mr. Livingston was affected by the communication, and how deeply he regretted my arrival, as stated by him, according to recollection, in his conversation with you, immediately afterwards. Whether any negotiation would have taken place, or any cession have been made, had not some special minister arrived to press it, must be matter of conjecture. No person had a better opportunity of forming a correct opinion on this point than you, in consideration of your long residence in France, and thorough knowledge of our relations with that country, through the changes that had taken place in both. No person also can judge better than you, whether my appointment had any effect in consideration of my well known attachment to the French revolution & recall & censure, to which I was subjected, in producing the result.

Mr. Nancrede a French officer, in our revolution, has recently communicated to me an occurrence, which took place between him & Genl. Armstrong, relative to the negotiation with which I was entrusted, with the Spanish government, for Florida, Texas &c, with which he says he informed you at the time. He thinks that I was then at Paris, in which case, it must have been as I returned from Madrid, in the expectation of resuming the negotiation with the French government. He had been known to Genl. Armstrong in our revolutionary war, on which account he says the General intimated to him, a desire to purchase of the Prince of peace, the province of Texas, and to employ him Mr. Nancrede as the agent stating that the

purchase should be made in favor of Mr. Parker, Mr. Cazinove some other third person whom he did not recollect & he Mr. Nancrede, as the fourth. The General he says spoke highly of the value of the territory, the security of the Prince's title, and of the immense profit to be made by it. He assured him, that he would insure him admission to the prince, which he alone could do, & that if he would immediately embark in the undertaking, he had no doubt of success. He said he had two objects in it, the one; profit; the other to defeat a man whom he hated, & who was in town. He asked him who that man was. He replied that it was me. Mr. Nancrede says that having formed a favorable opinion of my integrity & zeal in the service of my country, he was shocked at the proposal, & suppressing his feelings, withdrew and went immediately in pursuit of you, first, to your house, then to Morley, & thence back to your house, with intention to communicate it to you, but not finding you at either place, he left word with your lady expressing a desire that you would dine with him next day. You called on him that night, when he informed you of the occurrence & of which you expressed your utmost abhorrence, advising him to have nothing to do with it, which advice he followed, & he has never spoken with General Armstrong since. He says that you and Mr. Le Grange dined with him next day, between whom, the affair was freely discussed and spoken of in the sense above expressed. Mr. Nancrede is of opinion that the prince of peace was there at Marseilles with the King, but if so, the conversation between him & Gen^l. Armstrong must have occurred after my return to England from Spain through Paris. I left them in Madrid when I left Spain, on the termination of the negotiation. You will probably recollect all the circumstances of the case much better than he, being acquainted as you were, with the general movement and position of all the parties, in every stage of that negotiation.

General Armstrong has lately made a claim on the government, for his services, in settling the claims of all our citizens on the French government, provided for by the treaty of Louisiana, which were not settled by the Commissⁿ. at the end of the year, within which it was stipulated, they should be adjusted. He says that the French government was averse to the delay & the commissioners not desirous of having the time of their service prolonged, and hence the whole business devolved on him, with the duties of the three commissioners, their Clerk, the agent &c. That when the commission terminated, only 8 claims had been settled & that he settled all the rest, which were many hundred. For this he claims as a moderate reward \$4500. He sets up also another claim, for services as a commissioner, joint with Mr. Bowdoin, to treat at Paris, under the auspices of the Emperor, with a minister of Spain for Florida &c, and for which he asks other \$4500. These claims according to the rules of the accounting departments, were submitted to me. I decided that neither of them fell within my cognizance & that it belonged exclusively to Congress to determine them. Whether he will carry them there, I know not. I examined while I had the subject under consideration, the report of the board of commissioners, made at the expiration of their services, which gives a very different view of the whole transaction, from that presented by Gen^l. Armstrong's letters. It plainly imputes improper views and conduct, in Mr. Livingston, in regard to all the claims in which any agency of his was unauthorized by the treaty & implies the same as to his successors, in terminating the commission, &

getting the business out of their hands into his own. With this affair, you are well acquainted, in all its details. How far it may be convenient for, or agreeable to you, should he bring this claim before Congress, to make any representation respecting it, through any of your friends, or in any other mode you will decide. I have apprised you of it, that you may reflect on the subject.

The state in which I found the important concerns intrusted to me, with Spain, on my return from England to Paris in 1804, on my route to Madrid, you will I presume recollect. In passing through Paris, the object was, to obtain the aid, which had been pledged by the French government in the negotiation for Louisiana & promised to me at St. Cloud, by the first Consul, just before my departure for England in 1803, in the negotiation, which I was about to enter on, at Madrid with Mr. Pinkney. Mr. Livingston had nothing to do in the affair, but assist, as mere matter of form in procuring the aid demanded. He knew, that I could give but \$2,000,000 only, & that they must be paid to our citizens for Spanish spoillations, for East Florida. He had nevertheless interfered in the whole business, and as I had reason to believe, encourage the hope in the French government of getting \$12,000,000 or even 14, which tho' to be nominally secured to Spain, would come to France. This interference could not fail to produce a very bad effect. To obviate it, I addressed a letter to Talleyrand, reminding him of the pledge of his government, and intimating that war would probably be the consequence of the failure of the negotiation at Madrid, which letter he would not answer, while I remained at Paris, and answered, in an equivocal manner, after my departure from it. It was impossible to prevail on either government to accept \$2,000,000, not one cent of which they would get, instead of 12 or 14, unless I could make them believe, that the latter prospect was desperate & that in pursuing it, war would ensue & the territory be wrested from them; my whole effort, therefore, was directed to that object, in which I could not hope for success, unless our minister at Paris, cooperated, by his endeavours, to make the same impression. On the departure of Mr. Livingston, the business fell into the hands of General Armstrong, and if he was capable, of the design imputed to him, by Mr. Nancrede, the cause to which the failure of the negotiation, was fairly to be imputed, is explained at once. If instead of threatening war in his conferences with Talleyrand, he had intimated, that in case the negotiation at Madrid should fail, the affair might still be adjusted at Paris, between them, the death blow to the business at Madrid, would be given at once.

In looking towards the termination of my public service, which approaches, my mind, naturally reviews these important occurrences, with deep interest. Justice to our country, seems to require, and especially after I am gone, that they should appear in their true light; and having little to give to my children in point of property, I am the more desirous of leaving in their possession, the evidences of my zeal in the service of my country, and of upright conduct. You are acquainted with most of these transactions, and can state, at your leisure what you recollect of them. I have long intended to write you respecting them, but never had leisure for it before. From our friend, Col. Mercer, I obtained a statement, of what occurred, within his term. He is no more. A more honest man never lived.

With regard, your friend,

JAMES MONROE.

Ganong, a copy of his "Monograph of the Boundaries of the Province of New Brunswick"; from Archer M. Huntington, 5 volumes of facsimile reprints of old Spanish works, namely: *Cartilla para enseñar a leer a los niños* (Pamplona: M. Mares, 1606), *Bias contra fortuna, hecho par coplas por el Marques de Satillana* (Sevilla: Stanislas, 1502), *Glosa a la Obra de Don Jorge Manrique, hecha por Diego Barabona* ([Medina del Campo?] Pedro de Castro, 1541), *Reportorio de todos los caminos de España* . . . por pero Juan Villuga

(Medina del cãpo: Pedro de Castro, 1546), *La Aravcana* de Don Alonso de Erzilla y Gvñiga (Madrid, 1569); from Carl Stoeckel, a copy of volume 1 of the privately printed "Correspondence of John Sedgwick, Major General" (1902); from Miss C. P. Stokes, 5 miscellaneous volumes; from Anson P. Stokes, 1 copy of his "Cruising in the West Indies;" and from the Swedish Central Bureau of Statistics, 23 volumes and 77 pamphlets, publications of the bureau.

The exhibition at the Lenox Branch for the summer is a collection of portraits, caricatures, and reproductions of drawings by and relating to Victor Hugo; and at the Astor, plates from Molinier's "Royal Interiors" and "Das Interieur."

The new picture bulletins at the circulation branches were as follows:—JACKSON SQUARE, Independence Day; ST. AGNES, Alexander Dumas; WASHINGTON HEIGHTS, Venice, its history and art; OTTENDORFER, Birds and nature, New books, Mrs. Alexander; MUHLENBERG, Theodore Roosevelt.

EDWARD HAND TO JASPER YEATES ON THE SIEGE OF YORKTOWN
IN 1781.

Printed from the original manuscript in the Emmet Collection, presented to the
New York Public Library by John S. Kennedy.

CAMP BEFORE YORK, 12th Oct^r. 1781

DEAR YEATES

When I wrote you the 1st Instant I informed you that we had Broken Ground within 8 or 900 yards of the Enemy, this was no more than erecting redoubts to cover our Approaches, and too distant to mount Artill^y—the Sixth at night, our first Parralel was run within 600 yards, the 9th Our batteries opend for the first time to the astonishment of the besieged Soldiers who were taught to believe we had no heavy artill^y we have now 52 pieces of Heavy Ordnance constantly playing on them which affords awfull musick w^{ch} they very faintly return—last night we run our second Parralel within 300 yards of their works undiscoverd as was the first, not a man kild or wounded by the enemy in either of these dangerous & important operations, the American Army has not had 10 men kild since the commencement of the Siege. The Charon of 44 Guns & two Smaler Vessels were set on fire the night before last by hot shot from one of the French Batteries—and burned to the waters edge—many German and a few British deserters come out—but have little important to discover they are still amused with the expectation—as soon as our Batteries on the Second Parallel are compleated I think they will begin to Squeak—no demand of the Town has yet been made—almost every Thicket affords you the Disagreeable prospects of a Wretched Negroes Carcase brought to the earth by disease & famine—the Poor deluded Creatures were either so much afraid of the displeasure of their owner that they voluntarily starved to death or were by disease unable to seek sustenance—it will be hard if before this month is out, our business be not compleated. we were slow in beginning but now go on with great rapidity.

I beg my duty, love and compliments to all with you & am.

DEAR YEATES

Your affectionate

Kinsman

EDW. HAND.

A few days ago Tarleton who is now on the Gloster Side attacked the Duke de Lauzure's ligeon, the Duke routed him, kil'd the commandant of the Infantry, wounded Tarleton, & Dispersed his Party with the loss of upwards of 50 kild & wounded.

Never did greater harmony subsist between two Armies than between the French & American, their only contentions is who shall do most.

JASPER YEATES, ESQ.

CHECK LIST OF AMERICAN FEDERAL DOCUMENTS RELATING TO FINANCE IN THE NEW YORK PUBLIC LIBRARY.

A list of foreign financial documents was printed in the BULLETIN, vol. v, pp. 457 to 486.

** This list includes only (I) collections, compilations, etc., of official documents of the United States relating to finance; (II) serial financial documents, *i. e.*, annual, quarterly, monthly reports, etc.

It does not include single reports on financial subjects, either those issued or bound up separately or those bound in the congressional collected documents.

The single, separate documents are entered in the public index catalogue in the reading-room under the various headings to which they refer, *e. g.* Bank of the U. S., Banks and Banking, Bimetallism, Bonds, Credit, Crises and Panics, Debt (Public), Exchange of Wealth, Finance (U. S.), Finance (Colonial), Gold (Money), Interest, Money, Money market, Revenue, Revenue (Internal), Securities, Silver (Money), Tariff, Taxation, etc., etc., etc.

Reports on finance bound up in the congressional collected documents, of which the library has no separate copies, are not entered in the index-catalogue. For these the reader must have recourse to the various indexes and catalogues described below.

INDEXES AND CATALOGUES. *The American State Papers* [on Finance], 5 vols. F°, may fairly be included here. Very nearly all the documents and reports made to Congress from the first congress to the first session of the twentieth congress (1789-1828) are reprinted in these volumes. Each volume is supplied with a good index.

Poore's *Descriptive Catalogue* covers the period from 1789 to 1881, and comprises, in one chronological arrangement, with an alphabetical subject index, the titles of all documents and reports from the first congress to the close of the forty-sixth congress.

The McKee Indexes to Committee Reports comprise, in a classified arrangement under each committee of both the Senate and House, a reference to all reports of that committee from the date of its organization to 1887 that have appeared in the congressional set.

Hickcox's Monthly Catalogue, 10 vols., 1885-90, issued in monthly parts, with an annual index, comprises in an alphabetical arrangement the titles of all documents published by Congress during the month.

The Comprehensive Index, issued by Dr. Ames, covers the period from 1889 to 1893.

In 1895 the publication, from the newly-organized Office of Superintendent of Documents, of the document and monthly catalogues was begun. The *Monthly Catalogue* has been issued regularly since January, 1895; it comprises all the publications issued by congress and the executive departments since that time. The arrangement is by office of publication. Recently a cumulative index has been added to this series. The *Document catalogue* comprises, in a dictionary arrangement, all publications of Congress and of the executive departments issued during the period covered by the catalogue. Four such catalogues have been issued, covering respectively the years 1893/5, 1895/6, 1896/7 and 1897/99.

In 1902 an *Index to Congressional Documents* was published by the Superintendent of Documents, comprising in a classified arrangement references to all documents issued by Congress from the fifteenth to the fifty-second congress, inclusive (1817-93).

Such congressional documents (exclusive of annual reports) issued from 1815 to 1898 as relate to banking and currency have been collected into volumes and bound. This collection includes: 8 vols. on the Bank of the U. S., *viz.*, 4 vols. of Memorials and Resolutions to Congress from the various states, 1 vol. of Monthly Statements of the Bank of the U. S. (1825-36), 2 vols. of Special Treasury Reports, 1 vol. of Miscellaneous Documents; 2 vols. of a Collection of Documents on National Banks (1815-94); 1 vol. on Deposit Banks (1834-47); 1 vol. on Banks and Banking in the District of Columbia (1816-62); and 1 vol. of Miscellaneous Documents on Banks and Banking. Relating to coinage and currency the collection includes: 2 vols. of Documents relating to the U. S. Mint (1818-93); 1 vol. on Coins and Coinage (1818-98); 1 vol. on Currency (1819-98); and 1 vol. on Monetary Commissions. Each one of these volumes of collected documents is supplied with a manuscript index, and a collective entry for it is filed in the index catalogue.

PERIODICAL REPORTS.

The third executive department to be created by law under the constitution was denominated the Department of the Treasury. The act establishing the department was passed Sept. 2, 1789, and may be found in full in the Rev. Statutes, v. 1. The general laws applicable to the Treasury Department, and the laws defining the duties of the secretary of the treasury, the assistant secretaries, and the heads of bureaus and offices of the department may be found *in extenso* in the Rev. Statutes, ed. 2, 1878, sec. 158–198, and 233–245; Suppl. to Rev. Statutes, ed. 2, 1874–91, and Statutes at Large, v. 27, 1891–93, and the volumes following. A succinct declaration of the duties devolving upon the incumbent of the office of secretary of the

treasury and upon his subordinates is given in each edition of the Congressional Directory.

The offices, bureaus, etc., of the federal government controlling to-day the administration of its financial affairs are in order of organization as follows: offices of secretary of the treasury, of the treasurer, of the comptroller, the auditor and the register, organized in 1789; bureau of the mint, organized 1791; offices of the second comptroller, and of the second to the fifth auditors, organized in 1817; office of the sixth auditor, organized in 1836; office of the commissioner of internal revenue, and bureau of engraving and printing, organized in 1862; divisions of loans and currency and of warrants, estimates and appropriations, organized in 1875.

The federal fiscal year, until 1843, ended September 20. On August 26, 1842, Congress passed a bill changing the commencement of the fiscal year from October 1 to July 1. The bill was introduced by Senator Evans [Me.], June 23, 1842, having been first recommended by Senator Woodbury [N. H.] in 1834, when officiating as Secretary of the Treasury. The bill is printed in full in the Congressional Globe, 25th Cong., p. 675. In Mr. Woodbury's first recommendation for a change in the fiscal year in his annual report of 1834, the closing date is fixed on March 31, which was afterwards changed in the bill to June 30. President Van Buren in his message of Dec. 5, 1837, refers approvingly to the recommendation, saying, "it has been frequently recommended." The annual revenue had heretofore been estimated quarterly on the quarters of the calendar year, and, being presented to congress in accordance with law at the opening of each session, the certified official information was published, it will be seen, almost a year in arrears. The receipts for the current year could definitely be reported only for the first three quarters, for the last quarter an estimate being submitted. Levi Woodbury in Note M appended to his annual report for 1839, urging a change in the fiscal year, says: "The keeping and understanding of our public accounts of receipts and expenditures and of foreign trade and tonnage, would likewise be much simplified if the year for all of them were made to begin at the same time, and to correspond with the calendar year." (Italics compiler's.)

Secretary of the Treasury.

(1789-)

The serials relating to finance issued from the office of the secretary of the treasury are as follows: Annual report on finances, Circulars, Decisions, Synopsis of decisions, Annual report on the condition of banks, and monthly statement of public debt.

[Annual report of the secretary of the treasury on the state of the finances.]

In addition to the House and Senate editions formerly issued of these reports, there are several years for which supplementary reports were made, and years, 1837 and 1841 for instance, in which two reports, not supplementary, were made. It is difficult to account for these reports in other than an itemized check list, which this is not. The "Document Index," recently issued by the Superintendent of Documents, makes individual reference to these reports.

There are of these reports three department editions described below, two preliminary editions, and the final edition, the latter being, in recent years, the report of the secretary with accompanying tables, and reports of chiefs of divisions. This final edition is the only one appearing in the congressional set of documents. The report as it appears in the "Abridgment, etc.," contains selections only from the reports of chiefs of divisions. Reports of the following bureaus, under the Treasury Department, are not now included in the final edition of the annual finance report, viz.: Coast and Geodetic Survey, Freedman's Savings and Trust Company, Immigration Bureau, Life-Saving Service, Light-House Board, Marine Hospital Service, Navigation Bureau, Revenue Cutter Service, Steamboat Inspection Service, Super-vising Architect.

A list of Secretaries of the Treasury from 1789 to 1896 is given in the Senate Manual, edition of 1896.

[Originals.]

Letter from the secretary of the treasury . . . in pursuance of the act, entitled "An Act to establish the Treasury Department" [later, Annual report of the secretary, etc., as above], 1803, 1805, 1807, 1809-1901. *Washington* [1809-]1901. 8°.

— Same. Separate, or preliminary, issue. Edition 1. 1830, 1847, 1860, 1862-72, 1874-83, 1885-97. *Washington* [1839-]97. 8°.

— — — Edition 2. 1870, 1872-84, 1891-92, 1895, 1897. *Washington*, 1870-97. 8°.

The first edition of these separates comprises the secretary's report only, and, as a rule, is paged in roman numerals, the second edition is made up of the secretary's report and accompanying tables, and is paged in roman and arabic numerals, respectively. The first two editions of the secretary's report do not appear in the congressional set of documents.

— Same. Separate, 1825, 1827, 1833, 1842, 1845-49, 1852-53, 1856, 1858, 1860, 1862-63, 1866, 1868-73, 1876-80, 1883-84, 1887. *Washington*, 1825-87. 8°.

From 1797 to 1814 the "Accounts of receipts and expenditures" are bound with the "Estimates of appropriations." In 1815, again in 1819, 1829, 1832, 1837, 1857, a combined statement of receipts and disbursements was printed in the congressional documents. The "Accounts of receipts and expenditures" ceased publication in 1890, and their preparation was discontinued by order of the secretary, pursuant to act of Feb. 9, 1894. The act of July 31, 1894, first required the transmission to Congress of the "Combined statement of receipts and expenditures," prepared in the Division of Book-keeping and Warrants; see below.

Auditor.

(1789- .)

Office created by virtue of act of Sept. 2, 1789. When, in 1817, the creation of the offices of the second to fifth auditors was authorized, the former auditor became first auditor. In 1836 a sixth auditor was authorized. Until Oct. 1, 1894, these officials continued to be the first to sixth auditors, respectively; on that date their titles were changed to include the names of the specific department, the auditing of whose accounts was assigned to them. The change resulted as follows:

First Auditor of the Treasury, 1789-1894; became, Oct. 1, 1894, Auditor for the Treasury Department.
Second Auditor of the Treasury, 1817-1894; became, Oct. 1, 1894, Auditor for the War Department.
Third Auditor of the Treasury, 1817-1894; became, Oct. 1, 1894, Auditor for the Interior Department.
Fourth Auditor of the Treasury, 1817-1894; became, Oct. 1, 1894, Auditor for the Navy Department.
Fifth Auditor of the Treasury, 1817-1894; became, Oct. 1, 1894, Auditor for the State and other Departments.
Sixth Auditor of the Treasury, 1836-1894; became, Oct. 1, 1894, Auditor for the Post Office Department.

CHECK LIST OF UNITED STATES STATE DOCUMENTS IN THE NEW YORK PUBLIC LIBRARY RELATING TO FINANCE.

* * All titles here noted are located in the Astor branch. Collected editions of state documents, as a rule, have been analysed only for serial financial reports. A list of foreign financial documents was printed in the *Bulletin*, December, 1901, volume 5, pages 457 to 486.

Alabama.

Owen's "Bibliography of Alabama," in the annual report of the American Historical Association for 1897 contains a bibliography of the serial and other financial publications of Alabama.

Periodical.

[Report of the auditor.] Biennial report of the controller of public accounts . . . for the years 1858 and 1859, to the General Assembly. *Montgomery*, 1859. 8°.

Title changes to:

Annual report of the state auditor for the fiscal year ending Sept. 30, 1869-1901. *Montgomery*, 1869-1901. 8°.

The office of controller of public accounts was created by the constitution of 1819. The reconstruction constitution, 1868, changed the name of the office to auditor.

The report for 1869 contains appendices comprising the reports of 1867-68.

From 1872-94 the reports of the auditor contain reports on the insurance companies authorized to do business in the state; these reports appear to have been discontinued after 1896.

From 1882-97 auditor's report contains reports on railroad companies, and from 1885-97 on railroad and telegraph companies authorized to do business in the state. These reports appear to have been discontinued after 1897.

Auditor's report for 1898 contains first statement on guarantee companies, and report for 1899 the first statement on mutual aid associations authorized to do business in the state.

The annual reports for 1887 and 1888 are issued under one cover bearing the title, "Biennial report for the fiscal years ending Sept. 30, 1887 and 1888."

— Annual report of the treasurer for the fiscal year ending Sept. 30, 1867-71, 1874, 1876-77, 1880-82, 1884, 1886, 1888-98. *Montgomery*, 1869-98. 8°.

Reports for 1867-69 in one volume.

Non-Periodical.

— An act to establish a branch of the bank of the State of Alabama in the Tennessee valley; and to create a state loan of one million dollars. [Nov. and Dec., 1832.] *New York: J. and J. Harper, prtrs.*, 1833. 8, 11-32 pp. 8°.

Imperfect copy.

Report for 1866 contains an opinion of the Attorney-General of the U. S. on conversion of national banks into state banks, a review of the opinion by the superintendent, and the text of an act passed Apr. 20, 1861, making the conversion possible and amending the banking laws of the state. From 1874 reports contain detailed statements of moneyed corporations other than those previously considered; later reports add building and loan associations, and mortgage companies. Report for 1882 contains text of an act revising the statutes relating to banks, banking and trust companies. From 1884 the superintendent is permitted to make examinations of banks, etc., at any time, instead of waiting for insolvency notice as formerly. Accordingly a system of quarterly examinations was adopted and has since been maintained. In 1885 banks of deposit and discount were subjected to examination by this department, and the reports now contain a list of private banks operating under corporate titles and names of directors of state banks of deposit and discount. Report for 1887 contains text of an act to provide for organization, etc., of trust companies. From 1892 on there is a list of the depositories of lawful money reserve designated by the superintendent pursuant to sec. 44, chap. 689, laws of 1892. The Legislative Manual contains a brief administrative history of the bank department from 1782, with a list of the superintendents from 1851.

Ohio.*Periodical.*

Annual report of the auditor of state to the general assembly for the fiscal year ending Nov. 15, 1836-37, 1839-47, 1851, 1853-54, 1856-97. *Columbus, Cincinnati*, [1828-]97. 8°. (In: Executive documents.)

— Same. Separate, 1835-45, 1850, 1854, 1856-60, 1863-87, 1889-1901. *Columbus, Cincinnati* [1835-]1901. 8°.

Reports before 1836 are to be found in the Senate and House Journals. From 1895 each report contains a list of the auditors since 1803.

— Annual report of the comptroller of the treasury for 1858-65, 1867-76. *n. l. p.* 8°. (In: Executive documents.)

Created by virtue of three separate statutes, viz.: "An Act to further provide for the better regulation of receipts, disbursements and safekeeping of the public revenues;" "An Act to establish the Independent Treasury of the State of Ohio;" and "An Act to provide for the semi-annual collection of taxes," all passed April 12, 1858. The office was abolished pursuant to act of March 25, 1876, the books of the office being transferred to the office of the Auditor of State.

— Annual report of the treasurer for the fiscal year ending Nov. 15, 1836-39, 1841-43, 1845-48, 1851, 1853, 1856-82, 1884-85, 1887-98. *n. l. p.* 8°. (In: Executive documents.)

— Same. Separate, 1835, 1843, 1866, 1868, 1871-72, 1875-80, 1882, 1887-91, 1893-1900. *Columbus, Norwalk*, [1835-]1900. 8°.

Reports before 1836 are in the Senate and House Journals. For 1854 and 1855, in place of annual reports, there is a "Detailed statement of the receipts and disbursements of the public money, etc." The report for 1865 has a digest of the acts establishing the independent treasury. From 1894 the reports have a list of treasurers from 1792.

— Proceedings of the several state boards of equalization assembled under the laws of Ohio previous to and inclusive of 1853, proceedings of the state board of equalization, 1859/60, 1870/1, 1880, 1890, 1900. *Columbus*, 1854-1900. 8°.

A reappraisal of property is made every ten years, and this board equalizes the rates.

The report for 1853 contains copies of the proceedings of the boards of 1826, 1835, 1841, 1846 and 1853. The report for 1890 contains the text of the statute defining the duties of the board.

— Report of the sinking fund commission for 1852-85, 1887, 1889-90. *n. l. p.* 8°. (In: Executive documents.)

— Same. Separate, 1865, 1867-77, 1880-81, 1883-85, 1890. *Columbus*, 1865-90. 8°.

Discontinued. The reports are called "semi-annual . . . for the fiscal year," and contain under one cover the two semi-annual reports, continuously paged. Until 1860 they were made to close with Jan. 20 and July 20, respectively. Beginning with 1860 they close with May 15 and Nov. 15, respectively, in order that account year of this commission may be synchronous with the fiscal year of the state.

Title changes to:

Annual report of the treasurer showing receipts and payments for the fiscal year ending Nov. 30, 1851-53. *n. t. p.* 8°. (*Ibid.*)

Title changes to:

Detailed report on the receipts, etc., for the fiscal year ending Nov. 30, 1853, 1855, 1863-66, 1868, 1870-83. *n. t. p.* 8°. (*Ibid.*)

— Same. Separate, 1825, 1829, 1834, 1838-42. *Harrisburg, Bedford*, 1825-42. 8°.

With the merging of the two sets of the collected documents of Pennsylvania into the one set called "official documents,"

the "detailed report of the treasurer, etc.," and the "Annual report of the treasurer on . . . finances" were merged into one report, with the title, "Annual report of the treasurer, etc." This merging of the two reports took place several years earlier in the separate issues, but, in the absence of a perfect file of both the collected documents and the separate issues it is difficult to make a definite description.

Continued as:

Annual report of the treasurer [with detailed report] for the fiscal year ending Nov. 30, 1884-1887, 1889-97. *n. t. p.*, *Harrisburg*, 1897. 8°. (In: Official documents.)

— Same, separate, 1878-80, 1882-1900. *Harrisburg*, 1879-1901. 8°.

[Annual report of the treasurer.]

Pursuant to act passed March 16, 1832, authorizing the treasurer "to prepare and lay before the General Assembly at the commencement of every session a report on the subject of finance, containing estimates of the public revenue and public expenditures, plans for the support of the public credit, etc."

— Report of the state treasurer on the subject of finance to the legislature for the fiscal year ending Oct. 31, 1834-39, Nov. 30, 1840-41, 1843-49, 1851-52. *n. t. p.* 8°. (In: Senate Jols.)

— Same, 1832, 1835-36, 1838-39, Nov. 30, 1841, 1843-52. *n. t. p.* 8°. (In: House Jols.)

Continued as:

Report of the treasurer on the finances for the fiscal year ending Nov. 30, 1853-56, 1859, 1863-83. *n. t. p.* 8°. (In: Legislative documents.)

— Same. Separate, 1851, 1853, 1859, 1863, 1869, 1875, 1876. *n. t. p.*, *Harrisburg*, 1854-77. 8°.

The earlier issues of these separates have a half title the wording of which varies, being "Financial report, etc.," "Financial statement, etc.," and "Annual report state treasurer, etc."

After 1876 these separate issues were merged with the "Detailed report, etc." For note see above under "Detailed report, etc."

Continued as:

Annual report of the treasurer [with detailed report] for the fiscal year ending Nov. 30.

For collation see above under "Detailed report, etc."

A list of the state treasurers of Pennsylvania from 1777 to date, and the duties appertaining to the office as at present constituted, are given in Smull's *Legislative Hand Book*.

The check list of "Laws, minutes, journals and documents, published by Pennsylvania, 1682-1889," printed in the annual report of the state librarian for 1888/9, would make it appear that the treasurer's and auditor's reports appear regularly as separately-paged appendices in the House or Senate journals. From the fact that the copies of the Senate journals in this library covering the years from 1813/4 to 1824/5 do not contain the financial reports as shown in the check list, it may be safe to assume that there were at least two editions of the journals, or, if not, that the one edition was not made up uniformly. By note, p. 151, *House Journal* of 1844, and elsewhere, it would appear, also, that these journals were sometimes printed in both English and German.

[Annual report of the auditor general on the finances.] Report of the register general on the state of the finances . . . for the year 1798. *Philadelphia: Z. Poulson, Jr.*, 1799. 17 pp. F°.

Pp. 14-25 printed 13-25.

Continued as:

Annual report of the auditor general on the finances for the fiscal year ending Nov. 30, 1844-53, 1863-66, 1868, 1870-97. *Harrisburg*, 1844-98. 8°. (In: Executive and official documents.)

Pennsylvania, cont'd.

— Same. Separate, 1843, 1853-54, 1863, 1868, 1871-75, 1879-1900. *Harrisburg*, 1843-1900. 8°.

The first report of the auditor general is for the year 1800. The "Check list of documents, etc., of Pennsylvania" would have it appear that from this time to 1824 these reports were regularly issued as appendices to the Senate journal. The library copies of the Senate journals lack these appendices. It appears, however, from notes in the journals that during these years and the time when they reappear in the executive documents they were issued as separates on an average in an edition of 600 copies.

A list of the auditors general of Pennsylvania and the powers and duties of the office, as at present constituted, are given in Smull's Legislative Hand Book,

[Annual report of the commissioner of banking.] Returns to the auditor general's office of the several banks [later, and savings institutions, added] for 1814-24, 1828-30, 1832-34, 1836-39, 1841-52. *n. t. p.* 8°. (In: House Jols.)

The earlier bank reports are made in pursuance of act passed March 21, 1814, entitled "An Act regulating banks."

The Banking Department was created by act approved June 8, 1891, and its executive powers were enlarged and extended by act approved Feb. 11, 1895. Duties and obligations of the commissioner, and the rules of practice of the department, as at present constituted, are given in Smull's Legislative Hand Book.

INDIAN AFFAIRS IN 1750-1767.

Printed from the Hardwicke Manuscripts in the New York Public Library.

PETRUS USCAN TO EDWARD BOSCAWEN.

HONOURABLE SIR

I hope this will find your Honour safely arrived in London and in Perfect State of health, which I always wish to hear.

The Esteem which your Honour hath been pleased to honour me with when here, Encourages me to Commend myself to you and altho' I am sensible that your Honour will have a full & particular Account of the State of Affairs of this Coast from Major Lawrence and several other Gentlemen, yet the great regard and Deference I have for you induces me humbly presume to give you a short Account of some Affairs of these parts as far as my knowledge persuades me, that during your Honours stay upon the Coast, The French Hidayet Mohyodean Cawn & Chunda Saheb were very silent in their proceedings, But soon after your Departure, they went out with a great Body of the Country Force, Europeans and a Train of Artillery against some Considerable Polligars in the Country, and offered an Attack to Warriapollum and after having plundered & Harrassed most part of the Country belonging to it, they Distressed the Governour of it, altho' he made all possible Defense and fought with them to the Utmost of his Power, and subdued him to agree the payment of a Tribute of two hundred thousand Rupees.

They afterwards went to Tanjore and after Harrassed and plundered a great part of the Kingdom, laid a strong Siege to the Fort of Tanjore. The King of Tanjore, who was no ways Defective in Courage and Conduct, used his best Endeavours to defend his Metropolis and defeat his enemy's, if possible, but have not been capable to Succeed therein, by reason of the conjunction of the French Force with the Moors and we were Generally of Opinion that had not the English sent some Assistance by sparing Ammunition and lending some of their Gunroom crew to the King, Tanjore would have been taken long before, but as this gave the King a very little Succour in his Desperation he was at Last Compelled to agree the payment of a Tribute of between 30 & 40 hundred thousand Rupees to Hidayet Mohyodean Cawn and the French were soliciting to obtain 100 Villages for themselves towards Carakoll But in the Mean time Nansir Jung arriving at the Frontiers of the Province sent a Body of or about 25000 Morattas to relieve Tanjore; This reinforcement, together with the Force of the King of Tanjore, defeated Hidayet Mohyodean Cawns, and the French, as they had been already tired by the many skirmishes and engagements they had with the Tanjoreens in their frequent Sally's and soon after their approach into the Limits of Pondicherry, Nansir Jung arrived in the Province, which alarmed them to go into the Town & rendered us hopes of seeing some Successful Feat.

Nansir Jung afterwards Moved his Army towards Pondicherry but in his Way

the English sent their Ambassadors with Presents to Compliment him and they were well received by him; when this great Man was Encamped between 15 & 20 Miles Distant Westward from Pondicherry, Hidayet Mohydean Cawn & Chunda Saheb with an Army of Twelve thousand Horse and twenty thousand foot and with the Auxilliary party of the French Force and Artillery, went out to Battle against Nansir Jungs Army which (as I was told) was Consisted of or about Sixty thousand Horse. The two Army's having fought some hours in the Field, and had not the English joined their Force under the Command of Major Lawrence and Captⁿ Cope (The Latter being arrived with all his Men from Tritchenoply in Mahomud Ally Cawn's Company,) with Nansir Jung's, it wou'd have been above Nansir Jung's Capacity to find any Success in this Battle. The Conclusion of which retreated Chunda Saheb and the French into Pondicherry and obliged Hidayet Mohyodean Cawn to offer himself a Prisoner to Nansir Jung. I was informed that Nansir Jung desired Major Laurence & Capt Cope to Assist him in his resolution of Attacking Pondicherry but they excused themselves by reason of its being Detrimental to the Articles of Peace settled between the King of England and that of France and Added that if the French should offer to Engage with him or any party's of his Army in the Field, they cou'd then assist him. Nansir Jung afterwards went to Arcot, where he made Hidayet Mohyodean Cawn a close Prisoner. Major Laurence retired to Fort St David & I was informed that Nansir Jung was something Dissatisfied with the English when Major Departed from him.

Most part of Hidayet Mohyodean Cawns troops that were defeated in the Battle have been Scattered into several parts of the Province, some gott themselves introduced into Nansir Jungs Service and a small part retired to Pondicherry and are with Chunda Saheb and Hidayet Mohyodean Cawns Family there. Hidayet Mohyodean Cawn's Family still remain in Pondicherry, and altho' Nansir Jung Demanded the Delivery of them, yet Mr. Duplex absolutely refused to Comply therewith and as they Voluntarily made choice to live in Pondicherry till they see the End of Affairs he Entertains them with great deal of honor and respect.

The French soon afterwards proclaimed Hidayet Mohyodean Cawn's Son (who is but an Infant) Nabob of Arcot and other provinces and made great Ceremonial Feasts in Pondicherry upon that Occasion and upon this pretence they are fully resolved to make themselves Governours of the whole Coast, having already sent several parties of their Miletary to take possession of sundry Towns and Villages in the Province, where they hoisted their colours but Nansir Jungs Forces never omitt to Disturb them therein which created no little Confusion in the Country & Occasioned many Skirmishes between them, wherein I imagine the French have lost near 1000 white Men and great many Sepahees, Topasses, peons and other Blacks and as far as Mr. Duplex lives upon the Coast, I do not believe there will be any End of these Affairs and troubles in the Country.

I must more particularly acquaint your hon^r that sometime ago the French sent two of their Ships to Metchelepatam and Landed a Party of their Miletary there, who took Possession of that Town, and are now very troublesome to the Country about it. They have soon afterwards prohibited the Dutch from hoisting their Colours in their Factory and stopt their Trade there which obliged the Governour & Council of Negapatam to apply to Mr. Duplex and Council for Permission which was Granted to them.

Nansir Jung, upon hearing the Loss of Metchelepatam ordered a Party of his Force to be sent thither and wrote to the several Nabobs, Zemidars and Polligars to the Northward to join with them in the said Expedition, and I cannot tell what Course the Affairs will take there hereafter.

When Nansir Jung was at Distance it was the Universal Opinion in these parts that Nansir Jung was very Compleat in Courage and Conduct but Since his arrival in the Country, he proved very much on the Contrary: Had he remained in Hyderabad & sent some of his Generals and other Officers with an Army down this way, the French would entertain some Dread of him and wou'd have paid more regard to his Orders in his absence than what they now do in his presence. Thus he has been the Occasion of Diminishing & Despising the Grandeur of the Mogulls Government.

I was likewise informed that Mr. Duplex had sent to Nansir Jung for Solliciting to reinstate Hidayet Mohyodean Cawn upon the Nabobship and make Chund a Saheb Divan and offered his Security for the regular Payment of the rent of the Country, Threatening at the same time, that in case of his refusal therein, he, the said Nansir Jung will shortly see very Disagreeable issues.

When Mahamud Ally Cawn was Encamped near Irewidy very lately, The French sent a Party of their Miletary and Sepahees against him, and I am told there have been a very hott Engagement between them, but the French after Wounding & Killing a great many Moors, Defeated Mahomud Ally Cawn and obtained a Most Successful Victory by making prize of many Elephants, Camels, Horses, and other Cattle as also some Treasure and most Valuable Effects and things of the Camp that were left Behind. But as I am far Distant from the place where these Facts were committed, I cannot pretend to give your Honour more particular Account than what you can expect from Fort St David. When this Unhappy News reached Nansir Jungs Ears he was highly incensed therewith, and is fully Determined to Carry all his Camp and offer a Siege to Pondicherry but some people say that he is Secretly inclined to leave Hidayet Mohyodean Cawn and Chunda Saheb upon the Government of the Country according to Mr. Duplexes Sollicitation and return to Hyderabad.

Mr. Duplex still Entertains a very great Malice for the English and would never omit any opportunity of doing them a prejudice in his power, & I Pity that the English have neither Fortified nor Garrisoned Madras in a proper manner but left it in such a Dangerous Condition that no one can repose any Confidence or hopes of Safety in it.

There is an Ingenier lately arrived in Fort St David with an Orders from the Company to Fortifye Madras, but I am informed that he will only draw a plan at Present to be sent to the Company, and before he knew their pleasure, he cannot commence proceeding to Fortifye the place and I humbly presume to Observe to your Honour that if the Company are not pleased to send proper orders to make as much Inclosure to the Black Town & Pettahs of Madras as the French had done to Pondicherry, Madras will never be populous again and the Company as well as the English and other Inhabitants, will thereby be very great Sufferers sometime or other hereafter as they have been lately, and as your honour was personally here, you will not fail to Sollicit what will be for the General good of Madras.

Your Honour is very Sensible that Fort St David doth not Situate in the

Mouth of the Province as well as Madras, besides which the Inconveniency of the Road &c will not at all Encourage any Merchants to carry their Ships or Vessels there and if the Company are not pleased to make Madras Presidency as before, they will gain Nothing in Fort St David by reasons before mentioned but if they are pleased to make a restitution to Madras, it will be the Only Occasion to promote their Indian Trade; for it had & still has a very great Name through all India and other parts of the World and that all Nabobs, Rajahs, Mansubdars, Zemidars, Polligars, and other Powerful Persons in the Country as well as Natives and Europeans and other Foreigners have a very great dependance upon it and bear no little Affection and Attachment to it, and Notwithstanding it had been plundered and Destroyed and reduced to Poverty, Yet it is far Superior to Fort St David still as well in Riches and Trade, as in other Circumstances and if the Company shou'd please to Examine their Accounts, they will find that the Amount of Customs produced here since the Restoration, is Notoriously above what had been produced in Fort St David for these three Years past.

The Present Circumstance of Madras creates no little Apprehension in my Mind, that if it should happen to broke out War again, (which God forbid) I am apt to Believe the French can easily take it in two days time, as they have once taken it and lived here for three several Years they are Perfectly Acquainted with the State, Situation and Circumstance of the place and then you may be assured that they will destroy it entirely in order to Desparate the English, If Madras should be Fortified, well Garrisoned, and Governed regularly, it will in some respects, take the resemblance of a Royal Metropolis in India and increase the reputation and Dignity of the English Nation in General.

The Company have been at a Considerable Expence and trouble as well for procuring Several Towns & Villages in India as for erecting and Establishing Settlements and Factorys there, But if they do not duely Consider proper means to take care and preserve them, they shall run a very good risque as they have already been.

I believe your Honour cannot be Ignorant of the late Alterations at Fort St David that upon arrival of Ship Lynn from England lately, Mr. Floyer and some other Gentlemen were immediately Turned out Mr. Sauders the late chief of Vizagapatam was ordered to Succeed, but as he was as not yet arrived there, Major Laurence has the Charge of the Direction of Fort St David and that Madras is under Mr. Princes Directions. and as I am very Sensible that your Honour will have a full Account of the Present State of Affairs of Madras from other hands I will not be any ways troublesome to you upon that Purpose but humbly beg leave to Observe to you that the present State of Madras and Circumstances of the Country require a Capable good Governour, that has Courage and Deliberate resolution, worthy and well beloved to Justice, perfectly skilled and Qualified in making use of the Virtues of Patience and Quick Dispositions and thoroughly versed in all other Political Qualities, and if the Company have any Attachment to the Welfare of Madras, and all their other Settlements in India they should be so wise to Sollicit with his Most Sovereign Majesty to lend your Honour for the Administration of their Government and also prevail upon you by making worth your while to accept it and when you are come out with both the Kings and the Companys Commissions. Generally to Administer all Affairs of the English Nation in India

as well as the General of Batavia acts for the Dutch, I make no Doubt but you will be able to Answer the Universal Satisfaction of those in India and Europe, and then it will promote the General Trade and Settle all Affairs of India in a most cheerful Manner and I pray God to settle the English Government in India after the manner aforementioned.

It is not a Complimental Expression that I write this to your Honour but I do assure you that unless it pleases God Almighty to send your Honour down to India once more to settle all its Affairs, nothing will take proper Course in this part of the World and I flatter myself that I, who is of or about seventy years old & who inhabits in Madras these 46 years since, am very much afflicted for the present ill Situation and bad Circumstances of Madras and when I returned to this place from the Country soon after its restoration I was not a little Contented or Satisfied to see the English Colours hoisted here and Expected that by the Encouragement and Chearfulness of the Management of the place we might be so Fortunate to forgett all our Losses and Misfortunes and Comfort ourselves but I am sorry to acquaint your Honour that in these my Latter days I have the misfortune to see the condition of the place and hear the most Greivous Lamentations of the People here and I wish that I may once have the pleasure of seeing the reflourishment and happy state of Madras in the remaining part of my life.

The French have lately taken Chingy from the Moors and are now there Nansir Jung who was enraged & ashamed at hearing this reproachful News Determined to carry his troops against them, and it is above a Fortnight since he left Arcot and is Encamped about four or five Miles from it he has already Summoned some Morattas for his Assistance and expects a great many more.

The French had been so Compleat in their Politicks that they made a very great Interest with Shauh Nevaji Cawn, Nansir Jung's General and Moorapandut his head Minister and Divan. Their design in doing it was to reap no little Advantage by it, in one way or other which is, that the Secret Correspondence and Intimacy between them and the persons before mentioned, might be, (as it had been) of service to them, in Disencouraging the troops and officers from Behaving Courageously in their Engagements and Capacitate them to find speedy success therein, that there may be needless to expose themselves to any further risque, But in Case of Discovery, they were well assured, that it would be the only means of creating no little Confusion in his Camp which might, of Consequence, Persuade Nansir Jung to Distrust all or Most of his Ministers, Companions, officers and attendants to the utter prejudice and hinderance of all his Affairs and proceedings and as the French had gained the Effects of their abovementioned designs they are now perfectly easy in their thoughts.

I am informed that Nansir Jung is now so Great a Enemy to the English as he is to the French and I am very sorry to find the miscarriage of our late Gentleman of Fort St David in obtaining to their Nation, the Enmity and variance of both Nansir Jung and Hidayet Mohyodean Cawn &c, but I do assure your honour that I am entirely Ignorant of the particulars of their Conduct.

As I am the only person Disinterested I desire nothing else further than the honour of continuing myself under y^r protection & Esteem & humbly beg that your Honour will always do me the favour of receiving your Commands

May God in Heavens preserve your Health and prosper all your affairs and undertakings are the repeated heartiest wishes and prayers of

Honourable Sir

Your Honours Most obedient and Most oblijd faithfull

Humble Servant

FORT ST GEORGE

SEPTEMBER 30. 1750

LORD CLIVE TO THE COURT OF DIRECTORS OF THE EAST INDIA COMPANY.

CALCUTTA, 30 SEPTEMBER 1765

GENTLEMEN

1st By the Letter from the Select Committee and Copy of their Proceedings which are transmitted to you by this Conveyance, you will be enabled to form a General Idea of the State of this Settlement on the arrival of the Ship Kent, together with the Measures we thought necessary to pursue in order to settle the Company's affairs in these Provinces, upon an Advantageous and permanent Foundation. You will permit me however to lay before you my own Sentiments in particular concerning those Measures, and to communicate also by this earliest opportunity such others as I wish should be adopted before I quit the Government and which I hope will be not only approved of but likewise so fully confirmed and established by the Court of Directors that the abuses which may otherwise be revived by the Ambition and Avarice of some future Governors or Council may be effectually prevented.

2^d Upon my Arrival I am sorry to say I found your Affairs in a Condition so nearly desperate as would have alarmed any set of Men, whose sense of Honor and Duty to their Employers had not been estranged by the too eager pursuit of their own immediate Advantages. the sudden and among many the unwarrantable Acquisition of Riches had introduced Luxury in every Shape, and in its most pernicious Excess. These two enormous Evils went hand in hand together thro' the whole Presidency, infecting almost every Member of each Department; every Inferior seemed to have grasped at Wealth that he might be enabled to assume that Spirit of Profusion which was now the only Distinction between him and his Superior. Thus all Distinctions ceased and every Rank became in a manner upon an equality. Nor was this the End of the Mischief, for a Contest of such a Nature among your Servants necessarily destroyed all Proportion between their wants and the honest means of satisfying them. In a Country where Money is plenty, where Fear is the Principle of Government, where your Arms are ever victorious, in such a Country, I say, it is no wonder that the Lust of Riches should readily embrace the proffered means of its Gratification or that the Instruments of your Power should avail themselves of their authority and proceed even to Extortion in those Cases where simple Corruption could not keep Pace with their Rapacity. Examples of this sort set by Superiors could not fail of being followed in a proportionate Degrees by Inferiors. The Evil was contagious and spread among both Civic and Military down to the Writer and the Free Merchant.

3rd. The large sums of money acquired by Donation, besides the means I have already mentioned were so publickly known and vindicated that every one thought he had a Right to enrich himself at all Events, with as much Expedition as possible. The Monopoly of Salt, Beetle, Tobacco &c was another Fund of immense profits to the Companys Servants, and likewise to such others as they permitted to enjoy a share while not a Rupee of advantage accrued to the Government and very little to the Company from that Trade. Before I had discovered these various sources of Wealth I was under great Astonishment to find Individuals so suddenly enriched that there was scarce a Gentleman in the Settlement who had not fixed upon a very short Period for his Return to England with affluence; From hence arose that froward Spirit of Independency which in a manner set all your Orders at Defiance, and dictated a total Contempt of them as often as obedience was found incompatible with private Interest. At the time of my arrival, I saw nothing that bore the Form or Appearance of Government, the authority and preheminance were levelled with those of the Councillors, every Councillor was as much a Governor as he who bore the name and Distinction of Rank as I have already observed was no longer to be found in the whole Settlement Notwithstanding a Special Order from the Court of Directors, founded on very wise and very evident Reasons that all Correspondence with the Country Powers should be carried on solely in the Governors name, I found that our whole Correspondence with the Great Mogul, the Seebahs, Nabobs and Rajahs had been of late carried on by and in the name of the whole Board and that every Servant and Free Merchant corresponded with whom they pleased.

4th Your orders for the Execution of the Covenants were positive and expresely mentioned to be the resolution of a General Court of Proprietors. Your Servants at Bengal however absolutely determined to reject them, and had not the select Committee resolved that the Example should be first set by the Council or a Suspension from your Service take place it is certain they would have remained unexecuted to this hour: You will not I imagin be much surprized at this Breach of Duty if you look over the General Letters, where you cannot avoid seeing how many are annually committed and how fast everything was tending to a Contempt of your Authority. From a short Survey of the late Transactions I was convinced that no other Remedy was left than an immediate and vigorous Exertion of the Powers with which the Committee were invested. Happy in my opinion was it for the Company that such Powers were granted, for that the Settlement so conducted could have subsisted another twelvemonth. appears to me an impossibility A great part of the revenues of the country amounting to near four Millions Sterling per annum would have been divided among your Servants, and the acquisition of Fortunes being so sudden a few months must have brought Writers into Council. Seniority must have been admitted as a just claim to a Seat at the Board without the Qualification of Age or Experience because the Rapidity of Succession denied the attainment of either.

5th Nor were these Excesses confined to your Civic Servants alone, the Military Department also had caught the Infection and Riches the Bane of Discipline, were daily promoting the Ruin of your Army. The too little inequality of Rank rendered the advantages of Captains, Lieutenants & Ensigns so nearly upon a Par

and so large that an independent Fortune was no distant prospect even to a Subaltern. If a too quick Succession among those from whom you expect the study of Commerce and Polity is detrimental to your Civic Concerns, how effectually destructive must that Evil prove to your Military operations. The most experienced European Officer when he has entered into the East India Service, altho he may be able in many points to suggest Improvement to others, will nevertheless find that something new remains for himself to learn peculiar to this service which cannot be obtained in a Day. Judge then how the Case must stand then with Youths who are either just sent out from the Academy or which more frequently happens, who have had no Education at all: for to such have we often been reduced to the necessity of granting Commissions. How much must the expectation of your Army be raised, when they are suffered without Controul to take Possession for themselves of the whole Booty—Donation Money and Plunder on the Capture of a City? This I can assure you happened at Benares, and what is more surprizing the then Governour and Council, so far from laying in a Claim to the Moiety which ought to have been reserved for the Company agreeable to those positive Orders from the Court of Directors, of a few years ago, when they were pleased to put their forces upon the same footing as those of His Majesty gave up the whole to the Captors—You have heard of the General Mutiny that happened among your Seapoys, a little before my Arrival—what would have been your Consternation, had you also heard of an unanimous Desertion of your European Soldiery? These were very serious Events indeed and had it not been for one well timed vigorous act of Major Munro and the unwearied Zeal and Military Abilities of General Carnac who totally suppressed the Spirit of Mutiny among the Soldiers your Possessions in India, might at this time have been destitute of a Man to support them and even the Privilege of Commerce irrevocably crushed. Common Justice to the Principles and conduct of General Carnac obliges me farther to add that I found him the only officer of Rank who had resisted the Temptations to which by his Station he was constantly subject of acquiring an immense Fortune; and I question much whether he is not the only Man who has of late years been honoured with the Command of your Forces without acquiring a very large Independency. The Letter from the Great Mogul to the Governor and Council requesting their Permission for him to accept a present of two Laak which his Majesty is desirous of bestowing on him as a Reward for his disinterested Services will corroborate what I have said in his favour, and as this affair agreeable to the Tenor of the Covenants is referred to the Court of Directors, I make no doubt they will readily embrace the opportunity of showing their Regard to such distinguished Merit by consenting to his acceptance of His Majesty's Bounty.

6th If the picture I have drawn be a faithful likeness of this Presidency; and I call upon the most guilty: for guilty there are, to shew that I have aggravated a Feature to what a deplorable condition must your affairs have soon be reduced? Every State (and such now is your Government in India) must be near its Period when the Rage of Luxury and Corruption has seized upon its Leaders and Inhabitants. Can Trade be encouraged for Public Benefit, where the Management unfortunately devolve upon those who make private Interest their Rule of Action. And farther has sudden affluence ever failed from the Infancy of Military Discipline, to the present perfection of it, to corrupt the Principle and destroy the

Spirit of an Army? Independency of Fortune is always averse to those Duties of Subordination which are inseparable from the Life of a Soldier and in this Country, if the acquisition be sudden a Relaxation of Discipline is more immediately the Consequence. I would not be thought by these observations to exclude Riches from the Military: Honour alone is scarcely a sufficient Reward for the toilsome Service of the Field: But the acquisition of Wealth ought to be so gradual, as to admit not a prospect of compleating it till Succession by Merit to the Rank of a Field Officer should have laid a good foundation for the claim. Such is the Idea I entertained of this matter, when I delivered my sentiments to the Court of Directors in my Letter of the 27th April 1764 and I have acted in Conformity thereto by regimenting the Troops in the manner I then proposed. I need not repeat the observations I trouble you with in that Letter. It is sufficient to remark here that the good Effects of the Plan, are already visible, that Subordination is restored, abuses corrected and your Expences of Course already greatly diminished.

7th The War which to my great Concern I found extended above 700 Miles from the Presidency, is now happily concluded and a Peace established upon Terms which promise lasting Tranquility to these Provinces. This Event has I find disappointed the Expectations of many who thought of nothing but a March with the King to Delhi.

My Resolution however was, and my hopes will always be, to confine our Assistance, our Conquests and our Possessions to Bengal, Bahar and Orixá. To go farther is in my opinion a Scheme so extravagantly ambitious and absurd that no Governor and Council in their senses can ever adopt it unless the whole System of the Company's Interest be first entirely new modelled.

8th I forbear troubling you with a Detail of the Negotiations of General Carnac and me with the Country Powers and the particulars of the Treaty of Peace with the Vizier of the Empire as they will be spoken of at large in the Letter from the select Committee, and appear likewise upon the face of our Proceedings, I will however just remark that our restoring to Shuja Doula the whole of his Dominions proceeds more from the Policy of not extending the Company's territorial Possessions than the generous Principle of attaching him forever to our Interest by Gratitude, though this has been the apparent, and is by many thought to be the real motive— Had we ambitiously attempted to retain the Conquered Country, Experience would soon have proved the absurdity and Impracticability of such a Plan. The Establishment of your Army must have been largely increased, a considerable Number of Civil Servants must have been added to your list, and more Chiefships appointed, the Acts of oppression, and innumerable abuses which would have been committed, and which could neither have been prevented nor remedied at so great a distance from the Presidency, must infallibly have laid the Foundations of another War destructive and unsuccessful; our old Privileges and Possessions would have been endangered by every Supply we might have been tempted to afford in support of the New and the Natives must have finally triumphed in our inability to sustain the weight of our own Ambition.

9th To return to the Point from which this Digression has lead me, I must carry you back to the Description above given of the Situation in which I found your Affairs on my arrival.

Two paths were evidently open to me the one smooth and strewn with abun-

dance of rich advantages, that might easily be pickt up; the other untrodden and every Step opposed with Obstacles. I might have taken Charge of the Government upon the same footing on which I found it, that is, I might have enjoyed the name of Governor, and have suffered the Honor, Importance and Dignity of the Post to continue in their state of annihilation. I might have contented myself as others had before Me with being a Cypher or what is little better the first among sixteen Equals, and I might have been allowed this passive Conduct, to be attended with the Usual Douceaur of sharing largely with the rest, of the Gentlemen in all Donations Perquisites &c arising from the absolute Government and Disposal of all places in the Revenues of this opulent Kingdom by which means I might soon have acquired an immense addition to my Fortune, Notwithstanding the obligations in the New Covenants for the Man who can so easily get over the Bar of Conscience as to receive Presents after the Execution of them will not scruple to make use of any Evasion that may protect him from the Consequence. The Settlement in General would thus have been my friends and only the Natives of the Country my Enemies. If you can conceive a Governor in such a Situation it is impossible to form a wrong Judgment of the Inferior Servants, or of the Company's affairs at such a Presidency. An honourable alternative however lay before me. I had the Power within my own breast, to fulfil the duty of my Station, by remaining incorruptible in the midst of numberless Temptations artfully thrown in my way by exposing my character to every Attack which Malice or Resentment are so apt to invest against any man, who attempts Reformation, and by encountering of Course the Odium of the Settlement. I hesitated not a Moment which Choice to make. I took upon my Shoulders a Burden which required Resolution, Perseverance and Constitution to support. Having chosen my part I was determined to exert myself in the attempt happy in the Reflection that the Honour of the Nation, and the very Being of the Company would be maintained by the Success and conscious that if I failed, my Integrity and good Intentions at least must remain unimpeached. The other Members of the Committee joined with me in Opinion that in order to proceed upon Business it was absolutely necessary for us to assume the Powers for which we were invested. We saw plainly that most of the Gentlemen in Council had been too deeply concerned themselves in the Measures which required Amendment, for us to expect any assistance from them, on the contrary we were certain of finding Opposition to every Plan of Innovation and an unanimous attempt to defeat the Intentions of the Proprietors who solicited my Acceptance of the Government: The Committee therefore immediately met, and I had the happiness to find myself supported by Gentlemen whom no temptations could seduce Inconveniencies or Threats of Malice deter. Our Proceedings will convince you that we have dared to act with Firmness and Integrity and will at the same time demonstrate that Temper Unanimity and Dispatch must ever mark the Proceedings of Men unbiassed by private Interest.

10th The Gentlemen in Council of late years in Bengal seem to have been actuated in every Consultation, by a very obstinate and mischievous Spirit The office of Governor has been, in a manner, hunted down, stripped of its Dignity, and then divided into sixteen shares, whether Ambition, Obstinacy, Pride, or Self Interest is usually the road to such a pursuit I will not take upon me to determine, but am sure it can never arise from a just Idea of Government, or a true Sense of the Com-

pany's Interest In my opinion it is the Duty of the Council to make the Power of the President appear as extensive as possible in the eyes of the People that all correspondence with the Country Princes should be carried on through him alone some particular Cases excepted, that the Council should upon all Occasions be unanimous in supporting not in extenuating the Dignity of his Station and that he ought to be considered among the Natives as the sole Manager and Conductor of Political affairs. This should be the outward appearance of Administration though in reality the Council must be allowed a freedom of [jud]gment and when they perceive in the Governor a tendency to absolute or unjustifiable measures it then becomes their Duty to check him. If they at any time have reason to distrust the Rectitude of his Principles, they should not allow him to execute Designs even of the smallest Moment, without previously laying them before the Board and obtaining their approbation. In short the best Governor should not except in cases of Necessity, be suffered to conclude any Points of Importance without the Sanction of the Board. But the Expedient of a Select Committee equally prevents any ill Conduct in the Governor and is besides attended with advantages which can rarely be expected from the whole Body of Councillors. Five Gentlemen well versed in the Company's true Interest of Abilities to Plan and Resolution to execute. Gentlemen whose fortunes are honourably approaching to affluence and whose Integrity has never suffered them to exceed the Bounds of Moderation: A Select Committee composed of such Men will transact more Business in a week than the Council can in a Month. The opinion and Judgment of five Men are as Security to be relied on even in affairs of the utmost Consequence as Sixteen, they are less liable to Dissention and it may be said beyond a Contradiction that their Administration is more distant from Democratic Anarchy. The Council however would not be an useless Body, for whilst the Attention of the Committee was chiefly engaged in watching and repairing the main Springs of Government, the Council would as materially serve the Company, in attending to the many other Movements of the Grand Machine, which are as essentially necessary to the Public Advantage and Security, And that the Committee should not be able to carry their Powers to any dangerous Length, they might be ordered annually, before the Dispatch of the Europe Ships to submit their Proceedings to the Review of the Gentlemen in Council who might transmit their opinions thereupon to the Court of Directors.

Your present Select Committee have from time to time laid most of their Proceedings before Council and we intend to continue the same System of Candour except in any Political Cases of Secrecy when Prudence may require that our Resolutions should be confined to the knowledge of a few.

11th Thus freely I have given you my Opinion on the sort of Government I could wish to see established in this Settlement, nor shall I think my Duty done till I have pointed out every measure that seems to me best calculated to preserve your affairs from Destruction. At Bengal the Rule of Succession among your Servants is perniciously exact: There are frequent occasions where it ought to be set aside, where Experience, Understanding, Integrity, Moderation ought to take place of accidental Seniority. The demerits of most of your Superior Servants, have been so great, as you learn from the Committee Proceedings that one can hardly imagin[e] their future Behaviour will intitle them to further favours than you have hitherto bestowed on. I do not pretend to surmise what Sentence you may pro-

nounce upon the Gentlemen who came under the Censure of the Committee, but whether it be moderate as ours or severe as it deserves, it will not much concern them, since all of them are now in very affluent Circumstances and will probably return to Europe by this or the next years Shipping. Peruse then the List of your Covenanted Servants upon this Establishment: You will find that many of those next in Succession, are not only very young in the Service and consequently unfit for such exalted Stations, but are also Strongly tainted with the Principles of their Superiors. If your Opinion should correspond with mine some Remedy will be judged necessary to be applied, and I confess I see but one. The unhappy Change which within these few years has arisen in the manners and Conduct of your Servants at Bengal is alone sufficient to remove the objections I had to appointments from another Settlement, and the Difficulty which now too plainly appears of filling up Vacancies in Council with the requisite attention to the Company's Honor and Welfare inclines me to wish such appointments more frequent. In the Present State of this Presidency no Measure can I think prove more salutary than to appoint five or six Gentlemen from the Coast to the Bengal Establishment and there to post them agreeable to their Rank and Standing in the Service. Mess^{rs} Russell, Floyer, Aldersay, and Kellsall are among those who would be very well worthy your Attention if this Plan should be adopted. I cannot help farther recommending to your Consideration whether if every other Method should be found ineffectual, the transplanting of a few of the Young Bengal Servants to Madras would not be of signal Service both to themselves and the Company, you will likewise consider whether the Settlement of Bombay is capable of furnishing us with a few meritorious Servants. With regard to Madras the Conduct of the Gentleman upon that Establishment is in general so unexceptionable, that to present Bengal with such Examples of Regularity Discretion and moderation would I think be a Means of restoring it to good order and Government: It is past a Doubt that every attempt at Reformation must fail, unless the Superior Servants be exemplary in their Principles and Conduct. If we see nothing but Rapacity among Councillors, in vain shall we look for Moderation among Writers.

12th The Sources of Tyranny and oppression which have been opened by the European Agents Acting under the Authority of the Company's Servants and the numberless black Agents and Sub Agents acting also under them, will I fear be a lasting reproach to the English name in this Country, It is impossible to enumerate the Complaints that have been laid before me by the unfortunate Inhabitants who had not forgot that I was an Enemy to Oppression. The necessity of securing the Confidence of the Natives is an Idea I have ever maintained and was in hopes would be invariably adopted by others, but Ambition, Success, and Luxury, have I find introduced a new System of Politicks at the severe Expence of English Honor of the Companys faith and even of Common Justice and Humanity. The Orders so frequently issued that no Writer shall have the Privilege of Dustucks, I have strictly obeyed but I am sorry to inform you that all the wish'd for Consequences are not to be expected: the Officers of the Government are so sensitive of our Influence and Authority that they dare not presume to search or stop a Boat protected by the name of a Company's Servant & you may be assured that Frauds of that kind so easy to be practised and so difficult to be protected are but too frequent. I have at last however the Happiness to see the completion of an Event

which in this respect as well as in many others must be productive of advantages hitherto unknown and at the same time prevent abuses that have hitherto had no Remedy. I mean the Dewannee which is the Superintendency of all the hands and the Collection of all the Revenues of the Provinces of Bengal Bahar and Orissa. The assistance which the Great Mogul had received from our Arms and Treasury made him readily bestow the Grant upon the Company and it is done in the most effectual manner you can desire. The allowance for the support of the Nabobs, Dignity and Power and the Tribute to His Majesty must be regularly paid, the Remainder belongs to the Company. Revolutions are now no longer to be apprehended, the means of effecting them will in future be wanting to Ambitious Mussulmen, nor will your Servants Civil or Military be tempted to foment Disturbances from whence can arise no Benefit to themselves. Restitution Donation Money &c &c will be perfectly abolished as the Revenues from whence they used to issue will be possessed by ourselves. The Power of supervising the Provinces, though lodged in us, should not however in my opinion be exerted. Three times the present Number of Civil Servants would be insufficient for the purpose. Whereas if we leave the Management to the old officers of the Government, the Company need not be at the Expence of one Additional Servant, and tho' we may suffer in the Collection, yet we shall always be able to detect and punish any great offenders and shall have some Satisfaction in knowing that the Corruption is not among ourselves. By this means also the abuses inevitably springing from the Exercise of Territorial Authority will be effectually obviated: there will still be a Nabob with an allowance suitable to his Dignity and the Territorial Jurisdiction will still be in the Chiefs of the Country acting under him and the Presidency in Conjunction tho the Revenues will belong to the Company. Besides were the Country's Officers to be the Collectors, Foreign Nations would immediately take umbrage and Complaints preferred to the British Court might be attended with very embarrassing Consequences. Nor can it be supposed that either the French, Dutch or Danes will acknowledge the English Company Nabob of Bengal and pay into the hands of their Servants the Duties upon Trade or the Quit Rents of those Districts which they have for many years possessed by Virtue of the Royal Phirmand or by Grants from former Nabobs.

13th Your Revenues by means of this new Acquisition will as near as I can Judge not fall short for the ensuing year of 250 Lacks of Sicca Rupees including your former Possessions of Burdwan &c hereafter they will at least amount to 20 or 30 Lacks more. Your Civil and Military Expences in time of Peace can never exceed 60 Lacks of Rupees. The Nabobs allowance are already reduced to 42 Lacks, and the Tribute to the King is fixed at 26.— So that there will be remaining a clear gain to the Company of 122 Lack of Sicca Rupees or £1,650,900 Sterling which will defray all the Expence of the Investment, furnish the whole of the China Treasure, answer the Demands of all your other Settlements in India, and have a considerable Ballance in your Treasury besides. In time of War when the Country may be subject to Incursions of Bodies of Cavalry we shall notwithstanding be able to collect a sufficient Sum for our Civil and Military Exigencies, and likewise for our Investments, because a very rich part of the Bengal and Bahar Dominions are situated at the Eastward of the Ganges where we can never be

invaded. What I have given you is a real not an imaginary State of your Revenues and you may be assured they will not fall short of my Computation.

14th Permit me here to have the Honor of laying before you one striking Circumstance which has occurred to me in considering the subject of the Dewannee and the Consequence of your large increase of Revenues. I have already observed that our acquisition will give no umbrage to Foreign Nations with respect to our Territorial Jurisdiction so long as the present appearance of the Nabobs Power is preserved but I am convinced they will ere long entertain Jealousies of our Commercial Superiority. Public Complaints have indeed been already made from both French and Dutch Factories, that the Dread of the English name, added to the Encouragement of your Servants at the different Aurungs has deterred the Weavers from complying with their usual and necessary Demands, and I am persuaded that sooner or later, national Remonstrances will be made on that subject perhaps one half of the Trade being reserved to the English Company and the other divided between the French Dutch and Danes in such proportions as may be settled between their respective Commissions might adjust these Disputers to the mutual Satisfaction of all Parties. Besides as every Nation which Trades to the East Indies constantly brings out Silver for the purchase of Merchandize in return, and as our Revenues will for the future enable us to furnish all our Investments without any Remittance from England it seems necessary that we should in some degree encourage the Trade of others, in order that this Country may be supplied by them with Bullion to replace the Quantity we shall annually send to China or to any other part of the World. It is impossible for me to be a sufficient Judge of the Practicability or Propriety of admitting other Nations to such a proportion of Trade with us in these parts nor will you suspect that I entertain a thought of taking any step without Instructions from you in any affair of such National Importance. I do not even presume to argue on the Subject, I only mention it as a point which has occurred to me and which I think merits your most serious Consideration.

15th Considering the Excesses we have of late years manifested in our Conduct, the Princes of Indostan will not readily imagine us capable of moderation, nor can we expect they will ever be attached to us by any other Motive than Fear—Meer Jaffier, Cassim Ally, the present Nabob, and even Mahomed Ally the Nabob of Arcot, (the best Mussulman I ever knew) have afforded Instances sufficient of their Inclination sufficient to throw off the English Superiority, No opportunity will ever be neglected that seems to favour an Attempt to extirpate us though the Consequences while we keep our Army complete must in the End be more fatal to themselves, This Impatience under the Subjection as I may call it, to Europeans is natural but so great is the Infatuation of the Nations of this Country that they look no farther than the present Moment and will put their all to the Hazard of a single Battle. Even our young Nabob who is the Issue of a Prostitute who has little Abilities and less Education to supply the want of them: mean, weak, and ignorant, as this Man is, he would if left to himself and a few of his artful Flatterers, pursue the Paths of his Predecessors, It is impossible therefore to trust him with Power and be safe. If you mean to maintain your present Possessions and Advantages, the Command of the Army and Receipt of the Revenues must be kept in your own hands; every wish he may express to obtain either, be assured

is an Indication of his desire to reduce you to your original State of Dependency, to which you can never now return without ceasing to exist. If you allow the Nabob to have Forces, he will soon raise money, if you allow him a full Treasury without Forces, he will certainly make use of it to invite the Marattas or other Powers, to invade the Country upon a supposition that we shall not suspect the part he takes, and, that Success will restore him to the full extent of his Sovereignty; for so ignorant is he, even of the Nature of his own Countrymen, that he would never imagin the very Men he had paid to rescue the Dominions from us, would only conquer to seize the Spoil for themselves. Such is he, whom we now call Nabob and such are the faithless Politics of Indostan. We have adopted however a Plan which if strictly adhered to must effectually prevent his involving the Company or himself in any Difficulties. Mahomed Reza Cawn, Roy Dullul and Juggut Seat Men of the most approved Credit and Moderation are appointed jointly to the Management of all his affairs, nor is either of them to act singly in any Measure of Government. The Royal Treasury is under three different Locks and Keys, and each of these Ministers of State has a Key so that no Money can be issued for any Service whatever without the joint knowledge and consent of them all. Our Resident at the Durbar is to inspect the Treasury Accounts from time to time as he or the Governor and Council may think proper: but we are never to interfere in the Appointment or Complaint of any Officer under the Government nor in any particulars relative to the above mentioned Departments unless some extraordinary Conduct of the Ministry should render alterations requisite. This Form of Government I thought proper to recommend in order to purge the Court of a set of Knaves and Parasites by whom the Nabob was surrounded and who were always undermining our influence that they might the more firmly establish their own. So far you will observe we have exerted ourselves in the Arrangement of the Nabobs affairs, but it is a Measure of the utmost Consequence, since it lays the foundation of that Tranquility Moderation and Regularity which will support the Government against any future Attempts to a Revolution, and we are determined to interest ourselves at the City in no other Respects. I need only add that Mr. Sykes for whom we intend the Residency is a Gentleman from whose inflexible Integrity and long experience in the Country Politics we have reason to expect the most exact performance of every Duty in such an important Station.

16th. The Regulation of the Nabobs Ministry the Acquisition of the Dewannee and the Honorable Terms on which we have concluded a Peace with the Vizier of the Empire, have placed the Dignity and Advantages of the English East India Company on a Basis more firm than our most sanguine wishes could a few months ago have suggested. These, however alone will not ensure your Stability. These are but the Outworks which guard you from your Natural Enemies, the Natives of the Country: all is not safe. Danger still subsists from more formidable Enemies within, Luxury Corruption, Avarice, Rapacity, these have Possession of your Principal Posts and are ready to betray your Citadel. These therefore must be extirpated or they will infallibly destroy us: for we cannot expect the same causes which have ruined the greatest Kingdoms should have different Effects on such a State as ours. That sudden growth of Riches from whence those Evils principally arise demands our most serious attention. The affairs of Bengal, however glorious and flourishing the Prospect may be successfully managed by Men whose

Views extend not beyond a year or two and who will set all orders from the Court of Directors at defiance well Knowing they must have acquired an affluent Fortune or at least a comfortable independency before Resentment can reach them. A Competency ought to be allowed to all your Servants from the time of their arrival in India and advantages should gradually increase to each in proportion to his Station, but I would have few of them entertain hopes of returning to their native Country, till they shall have attained the Rank of Councillor, then the prospect would open to them and they should be certain of being enabled to return in a few years with independent fortunes. This Certainty would arise from the Freight Ships, from the Privileges of Trade (the advantages of which you are not unacquainted with) and also from the Profits upon Salt Beetle and Tobacco agreeable to the new Regulation which we have made in order to rectify the abuses that have been so long committed in those Branches of Trade to the great Detriment of the Country Government without view of Benefit to the Company.

17. The Regulation now established for the Salt Trade will I hope be entirely to your satisfaction. I at first intended to propose that the Company and their Servants should be jointly and equally concerned in the Trade itself but upon better consideration I judged that Plan to be rather unbecoming the Dignity of the Company and concluded it would be better that they should give the Trade entirely to their Servants and fix a Duty upon it for themselves equivalent to half the Profits. This Duty we have computed at the rate of 35 per Cent. for the present but I imagin it will be able next year to bear an Increase The articles of Beetle and Tobacco beeing of less consequence and yielding much less advantage, the Duties upon them of course must be less. For farther particulars of these Regulations I beg leave to refer you to the Committee Letter and Proceedings as I would not here trouble you with the Repetition of a Matter which is there so fully laid before you.

18th The advantages proposed for the Governor and Council would undoubtedly appear extremely large to those who are unacquainted with the Riches of Bengal and the numberless opportunities which the Company's Servants have of acquiring Money. But you, who are now perfectly informed of the Revenues of these Kingdoms and the prodigious Emoluments within the reach of Gentlemen high in the Service will I am persuaded agree with me that if some Plan of the nature proposed be not adopted the Governor and Council will not fail to acquire much larger Fortunes by other means in a much shorter time which must always be productive of that quick Succession not only so Detrimental to your Commercial Interest but so totally incompatible with the acquisition of Political Knowledge which ought now to be considered as a very material Qualification in all your Civil as well as Military Servants. To obviate an Objection which may arise that they may possibly proceed in the old way of procuring Money notwithstanding they accept of these Allowances; I would have an Oath tendered to them of as strong and solemn a Nature as can be penned I have drawn out the Form of one agreeably to my Idea of the expedient and have the Honor to inclose it for your consideration^a to this may be annexed a Penalty Bond of £150,000 to be executed by the Governor and of £50,000 to be executed by each of the Council. Thus the Conscience of some will be awakened by the legal Consequences of Perjury and pecuniary Punishment will be a sure Guard over the Honesty of others. Could

the Hearts of Men be Known by their general Character in Society or could their Conduct in a State of Temptation be ascertained from their moderate attentions to Wealth, whilst the sudden acquisition of it was impossible the proposal I make would be an affront to Religion and to Morality: but since that is not the Case in any part of the World, and least of all so in the East, we must for our own Security, impose such Restraints as shall make it impossible even for Hypocrisy to introduce Corruption.

Having thus fully submitted to you my Sentiments on the Civil Department permit me to trouble you with a few Observations on the Military, which deserves a no less serious attention. In the former part of this Letter I have mentioned that Luxury and an abhorrence of Subordination has overspread your Army but that the good Effects of appointing field officers had already become visible. The Committee Letter will inclose a General Return of their Number, and enlarge upon the Necessity of keeping each Regiment complete to the Establishment I therefore avoid saying anything here upon these Subjects. That Letter will also specify the Proportion of Emoluments proposed for the field officers from the new acquired Advantages upon Salt. The same objection may perhaps be made to this, which I supposed was likely to occur with respect to the Plan for the Benefit of the Civil Servants. If so I beg leave to refer you to my Proposal and Remarks upon that subject which are equally proper and applicable to this. These Points then I conclude are sufficiently before you and I proceed to recommend to your Consideration that the Regimenting of the Troops has introduced a much larger number of Officers of Rank than has hitherto been admitted upon your Establishment and that this Regulation beneficial and necessary as it is will notwithstanding be productive of one Dangerous Evil if not constantly guarded against by the authority of the Governor and Council supported and enforced by the higher Powers at home. The Evil I mean to apprize you of is the Encroachment of the Military upon the Civil Jurisdiction and an attempt to be independent of their Authority. A spirit of this kind has always been visible, our utmost vigilance therefore is requisite to suppress it or at least to take care that it shall not actually prevail. I have been at some Pains to inculcate a total Subjection of the Army to the Government: and I doubt not but you will ever maintain that Principle. In the Field in time of Actual Service I could wish to see the Commander of your Forces implicitly relied on for his Plan of Operations. Orders from the Presidency may frequently embarrass him and prejudice the Service. At such a time he is certainly the best Judge of what measures should be pursued and ought therefore to be trusted with Discretionary Powers. But he should by no means be permitted to vary from the fixt general Plan of a Campaign, nor from his own Idea of the Company's Interest to prosecute Operations of Importance, when they are not also of real Utility and Emergency. I dwell not however intirely upon the Conduct of a Commander of the forces as such in the field: He is to understand that upon all occasions a Gentleman in Council is his Superior, unless he also has a Seat at the Board and then he will of course rank as he stands in that Appointment; The whole Army should in like manner be subordinate to the Civil Power and it is the indispensible Duty of the Governor and Council to keep them so. If at any time they should struggle for Superiority the Governor and Council must strenuously exert themselves, ever mindful that they are Trustees for the Company

in this Settlement and the Guardians of Public Property under a civil institution. 20th It would give me Pain to see a Regulation so salutary as that of the Appointment of field officers, attended with any Inconveniences and therefore I would earnestly recommend the following very easy and effectual mode of Prevention. Let the Equality in Civil and Military Rank be immediately settled by the Court of Directors. Were Disputes about Precedure the only Points to be adjusted they would not be worth a moments Reflection, but We are to consider, that Opportunities will some times happen when Military Gentlemen may assume Power and authority from the Rank they hold among the Civic Servants. and perhaps pay no attention to orders issued from their supposed Inferiors. Such Contentions may have disagreeable Consequences, and to prevent them I propose that all the Colonels (the Commander of the Troops excepted who is intitled to the Rank of 3rd in Council) shall be equal in Rank to the Councillors but always the youngest of that Rank. the Lieutenant Colonels should rank with Senior Merchants, the Majors with Junior Merchants, Captains with Factors and Lieutenants and Ensigns with Writers. The Rank of all officers below Colonels and of Civil Servants below Councillors may be considered according to the dates of their Commissions and appointments respectively. When such a Regulation has taken place I think the appointment of field officers cannot be charged with a single Inconvenience.

21st Before I quit the Subject of the Army, I must repeat what, if I mistake not, I mentioned to M^r Rous before I left England the Propriety of appointing Sir Robert Barker to the Command of a Regiment. in case of a vacancy. On the Death of Colonel Knox I hesitated not to appoint Sir Robert to the third Regiment but it met with opposition not only from some of the Gentlemen in Council but afterwards from Sir Robert Fletcher who thought himself aggrieved, tho' at a time when Barker was a Captain, he was only a volunteer in your Service— and besides Sir Robert Barker, must, on all occasions, as the Elder officer have commanded in the field in the absence of General Carnac, and Colonel Smith, even if this appointment had not taken place. If I could imagine that his Seniority in the Service did not sufficiently intitle him to this Preferment, I would urge his Experience which is greater than that of the other Gentlemen and his Disinterestedness which made him accept what is so infinitely inferior in Point of Emoluments to the Command of the Artillery. Lieut Colonel Peach has in like manner been objected to, by the Majors appointed by the Governor and Council, but as it has always been customary to prefer officers of your own appointment to those of the same Rank nominated by the Governor and Council; I need not point out the Propriety of your confirming this Gentlemans Commission. The introducing Lieutenant Colonel Chapman also to that Rank has met with the same objections. With regard to him permit me to acquaint you that he is a very old Major in the Kings Service that he was strongly solicited at Madras to continue there and on very advantageous Terms when his Regiment was ordered home, but that I found him at the Cape in his way to Europe and it was with the utmost Difficulty that Mess^{rs} Sumner and Sykes and Myself could prevail upon him to return to India, next in Rank to Lieutenant Colonel Peach. His Merits on the Coast have been very great and I consider him as a very valuable acquisition to your Service. I therefore most earnestly request you will be pleased to confirm his appointment as Lieutenant Colonel on this Establishment Neither of these three Gentlemen I have here spoken of can be censured for that

Spirit of Licentiousness and Independency which I have pointed out as the great Evils we ought to guard against and the variety as well as length of their services will certainly be of considerable Advantage to Corps like ours I must at the same time confess that I cannot be responsible for that Discipline and Reformation we mean shall take place unless the Field officers are Men I can depend upon. Most of the Captains now in your Service have had so little Experience and are I fear so liable to the General Objections that I could wish to have five or six Captains sent out who have seen Service, who understand Discipline and who are well recommended by their Colonels. If you should think proper to extend this Plan to Majors, it will be so much the better, but there is no occasion to go higher. Among the appointments you may be pleased to make in England I could wish to find a Majority upon this Establishment for Major Pemble, agreeable to the Date of the Brevet given him upon his Arrival at this place That Gentleman has seen much Service both on the Coast of Choromandell at Manilla and at Bengal but being on the Bombay Establishment where the Rise is so very slow he has had the Mortification to see himself constantly superseded by the Coast and Bengal Officers. You may be assured I would not trouble you with this Recommendation if I did not know him to be worthy of your Notice.

22nd The Enquiries I have found myself under the Necessity of promoting, the Regulations which I judge proper should take place without Delay together with those I have here the Honor to propose for your Mature Deliberation will I doubt not meet with that candid Discussion, which the Importance of the Subject requires. You will be pleased upon the whole to observe that the great object of my Labor has been, (and it must also be yours) to stem that Torrent of Luxury, Corruption and Licentiousness, which have nearly overwhelmed the Interest, and I might add the Existence of the Company in these parts, to reduce your Civil Servants to a Sense of Duty to their Employers and Moderation in the pursuit of their own Advantages to introduce Discipline Subordination oeconomy into your Army and to prevent in General that sudden acquisition of Riches which is evidently the Root of almost every other Evil both in the Civil and Military Department.

23^d Is there a Man anxious for the speedy Return of his Son, his Brother, or his Friend, and Sollicitious to see that return accompanied by affluence of Fortune indifferent to the means by which it may have been obtained? Is there who void of all but selfish Feelings can withhold his approbation of any Plan that promises not sudden Riches to those his dearest Connections, who can look with Contempt upon Measures of Moderation, and who can cherish all upstart Greatness, though stigmatized with the Spoils of the Company? If there is such a Man to him all arguments would be vain—to him I speak not—My address is to those who can judge coolly of the Advantages to be desired for their Relations and Friends nor think the Body Corporate wholly unentitled to their Attention. If these should be of opinion that an independent Fortune honourably acquired in a faithful Service of 12 or 15 years, is more compatible with the Interests of the Company than the late Rapidity of Acquisitions, and at the same time satisfactory to the Expectations of Reason, I will venture to assert that the Regulations already made, together with those proposed, will when enforced by the Authority of the Court of Directors ensure to the Company their Commercial and Political Advantages, and

be productive of certain Independency to every Servant who endeavours to deserve it.

24. The general Terms in which I have mentioned the Depravity of this Settlement oblige me to point out to your Attention the Instances, the very few Instances of distinguished Merit among the Superior Servants, To find a Man who in the midst of Luxury and Licentiousness, had retained the true Idea of Commercial Oeconomy, who inferior in Fortune to most of your Civil Servants in the Rank of Councillors was yet superior to all in Moderation and Integrity, whose regard for the Welfare of the Public and for the Reputation of Individuals had made him warn others from falling into the Temptations of Corruption which he saw were approaching and who could actually resist those Temptations himself when a share was allotted him of Money he thought unwarrantably obtained. To find such a Man in such a Settlement would appear incredible to those who are unacquainted with M^r Verelst I have represented this Gentleman to you as I would every one in his real Character, and shall only add, that if you wish to see the measure we are now pursuing supported with Integrity, Abilities and Resolution, you will endeavour to prevail on him to continue in your Service by appointing him to succeed M^r Sumner in the Government. To omit mentioning M^r Cartier would be Injustice as he also stands high in my opinion. His character is clear and his attachment to your Service what it ought to be, unbiassed by any mean attention to his own advantages. I wish sincerely your list of superior Servants would enable me to detain you longer on Subjects of Commendation but I have finished the Picture and I cannot add another Figure that deserves to be distinguished from the Groupe.

25 Having filled so many Pages upon the Subject of public affairs you will indulge me with a few lines upon a Circumstance which concerns myself. M^r Johnstone in his last Minutes in Council has thought proper to throw out some Observations upon the Validity of my Title to the Jaghire insinuating that the Defect which he pretends to have discovered was not known at the time of my Litigation with the Company; as I would not wish that a Point where my Honor is concerned, should pass unnoticed: I must observe that the Kings Sunnud which M^r Johnstone affirms was requisite to be obtained within 6 months from the granting of this Jaghire, for the Confirmation of it, is a matter of Form only, and not understood to be essential, as a proof of this I inclose Translations of various Jaghire Grants properly attested by M^r Vansittart the Persian Translator, as also an attestation of the same Gentleman that the Grant to me was as complete as other Grants of that Nature generally are: but to put this Matter out of Dispute, the Paper of Agreement which M^r Johnstone alludes to is of no more consequence than a piece of blank Paper, since it was never executed by Me or by any Agent or Vaqueel on my account nor was any Agent ever named or thought of by me: Enclosed I transmit you a Translation of the very Paper attested also by M^r Vansittart.

26th Permit me now to remind you that I have a large Family, who stand in need of a Fathers Protection, that I sacrifice my Health and hazard my Fortune with my Life by continuing in this Climate. The first great Purposes of my Appointment are perfectly answered. Peace is restored and my Engagement to procure for the Company the Riversion of my Jaghire is completed in the fullest manner,

since it is not only confirmed by the present Nabob but by the great Mogul. I now only wait to be informed whether my Conduct thus far be approved of and whether the whole or any part of the Regulations I have had the Honor to lay before you are conformable to your Ideas of the Reformation necessary to be established. If they meet with your Approbation I doubt not you will immediately empower Me in Conjunction with the Select Committee to finish the Business so successfully begun which may be easily effected before the End of the ensuing year when I am determined to return to Europe and hope to acquaint you in Person with the accomplishment of every wish you can form for the Prosperity of your affairs in Bengal.

27th I shall conclude this tedious Letter by observing that my anxiety to know whether you approve of my Conduct or not can proceed from no other Motive than my concern for the Public since I continue invariable in the Resolution I formed and expressed in a general Court long before the Covenants were proposed of acquiring no Addition to my Fortune by my Acceptance of the Government and I beg leave also to assure you that in order to obviate all Suspicion of Collusion in this delicate Point I have not permitted either of the Gentlemen of my Family to hold an Employment in your Service, nor to receive presents altho' they are not bound by Covenants to the Contrary. The small congratulatory Nazurs Elephants Horses &c which I have been under a Necessity of receiving, do not I imagine amount to any considerable Sum but whatever it may be not a farthing shall go into my own Pocket I have hitherto been too much engaged in matters of public importance to attend to a particular Valuation but I have caused an exact Account of every even the most trifling Present which at my Return shall be submitted to your Inspection and in the meantime the Amount of the whole shall go towards defraying my extraordinary Expences as Governor. The only Favor I have to solicit for myself is that altho' your Treasury here will for the future be so full as to render it difficult for Individuals to obtain Bills upon the Company payable at home you will be pleased to indulge Me with the usual channel of Remittance of my Jaghire until it reverts to the Company.

I have the Honor to be with the utmost Respect

Gentlemen

Your most obedient and
most humble servant

CLIVE.

To the Honble the Court
of Directors

28 I cannot help requesting your attention to Mr William Wynne, a young Gentleman whom I brought out to India with me and whom I was in hopes of seeing appointed a Writer on the List of that year. I have caused him to handscribe this Letter that you may see he is qualified in Point of Penmanship and as he has lived constantly with Me and acted as Assistant to my Secretary, I can take upon Me to be responsible for his Conduct and abilities in every respect It is therefore my particular Request that you can confer on him the station of a Writer to take Rank from the time of his leaving England.

29. I beg leave also to recommend to your Protection Mr Maddison a Gentleman of a liberal Education and who promised to be a very valuable Servant to the Company from an uncommon Facility in acquiring the Persian Language. As he is 27 years of Age you will not think me unreasonable in soliciting for him the Appointment of a Factor.

REPORT FOR SEPTEMBER.

REFERENCE DEPARTMENT.

During the month of September there were received at the Library, by purchase, 1,244 volumes and 508 pamphlets; by gift, 814 volumes, 2,267 pamphlets, and 43 maps; and by exchange, 37 volumes and 317 pamphlets.

There were catalogued 5,379 volumes and 2,162 pamphlets, for which purpose 9,670 cards and 3,525 slips for the copying machine were written, and 17,989 cards were received from the copying machine.

The following table shows the number of readers, and the number of volumes consulted, in both the Astor and Lenox Branches of the Library, also the number of visitors to the Print Department at the Lenox, during the month:

	LENOX.	ASTOR.
No. of readers and visitors.....	3,549	8,999

The most important gifts received at the Library during the month were:— From the American Agriculturist, 259 volumes of miscellaneous Government reports and agricultural reports; from the Colonial Secretary of the Bahamas, 8 volumes and 6 pamphlets, votes, laws, etc., of the colony; from the Under Secretary to the Government of India, 6 volumes of reports of the Plague Commission for 1898 and 1899; from the Imperial University, Kasan, Russia, 4 volumes issued by the University; from the City of Newburyport, 22 volumes and 18 pamphlets, documents of the City; from the Colonial Secretary, Straits Settlements, Singapore, 38 volumes and 3 pamphlets, including blue books, ordinances, proceedings of the Legislative Council, etc.; from the United States Consul General to the Straits Settlements at Singapore, 51 volumes of the blue book, etc.; from Fr. Voisin, Bey, 3 volumes and 1 pamphlet relative to the Canal Suez, by himself.

The exhibition of Rossetti prints and those relating to Victor Hugo at the Lenox was continued; and at the Astor, the plates from Mollinier's "Royal Interiors" and "Das Interieur."

The new exhibitions in the circulation branches were as follows: BOND STREET, Western Life, Stories of the Woods, Stories of W. D. Howells; OTTENDORFER, Autumn, A few favorite books for children, Some cultivated plants, Emile Zola, Caricatures of a few well-known writers; JACKSON SQUARE, Eggleston's works; HARLEM, Autumn, Books for boys, Books for girls; THIRTY-FOURTH STREET, Martinique; CHATHAM SQUARE, McKinley memorial, Harvest, Edward Eggleston, Jerusalem; ST. AGNES, Fairy tales, Detective stories, Boarding school stories.

The following eight sites for Carnegie Library buildings in the Boroughs of

Manhattan, the Bronx and Richmond have been acquired or contracted for up to this date:

Carnegie Site No. 1, 222-224 East 79th Street. James Brown Lord, architect.

Carnegie Site No. 2, 31-33 East Broadway. McKim, Mead & White, architects.

Carnegie Site No. 4, N. W. Cor. 140th Street and Alexander Avenue. Babb, Cook & Willard, architects.

Carnegie Site No. 6, 224-226 East 125th Street. McKim, Mead & White, architects.

Carnegie Site No. 8, 190-192 Amsterdam Avenue. Carrère & Hastings, architects.

Carnegie Site No. 16, 67th Street near First Avenue. Babb, Cook & Willard, architects.

Carnegie Site No. 19, Port Richmond, S. I. Carrère & Hastings, architects.

Carnegie Site No. 22, Tottenville, S. I. Carrère & Hastings, architects.

The building at Site No. 1, Nos. 222-224 East 79th Street, is nearing completion, and plans have been completed and contracts have been let for the construction of the building at Site No. 2, at 31-33 East Broadway. The front elevation and floor plans of this latter building, which will house the present Chatham Square branch, are given opposite page 379, and on pages 383 to 387.

This new building will stand on a lot 50 by 75 feet on the south side of East Broadway, near Chatham Square.

The street front, which is of Indiana limestone, shows a three-story and basement building, the distinctive features of which, the large arches on the first floor, surmounted by pillars reaching to the cornice, also appeared in the first Carnegie building—that for the Yorkville Branch on East 79th Street—and belong to the general type adopted for all these buildings by the Architectural Commission. The differences between the two fronts, however, are considerable, and give assurance that the adoption of such a general type will not lead to monotony.

The frontage on the street is the full width of the lot—50 feet, and the depth on the basement and ground floors is 67½ feet. On the upper floors the building is five feet shorter than this, owing to a skylight extending across the rear of the ground floor. Except for this skylight and for a smaller one in the roof the building is lighted entirely from front and rear. There are three full stories and a basement, besides a partial fourth story, occupied only by an apartment for the janitor.

The entrance is at the right side, and the main stairways are confined to the adjoining corner of the building, being broken into half-story flights running alternately in opposite directions. The entrance is at the ground level, and from it a half-flight leads directly up to the main floor, while another affords access to the basement.

The principal feature of this basement floor is an assembly room 62 x 29 feet, which will be used for meetings connected with the work of the Library, and possibly also for a newspaper reading-room during part of the day. This is the first branch building containing such a room to be erected in this city. Besides the assembly room the basement contains a receiving and packing room 24 x 10 feet, a boiler-room 16 x 20 feet, a men's lavatory, and a lobby 16 feet square, into

which open a book lift that communicates with all the upper floors and a dumb-waiter that runs only to the janitor's floor. Adjoining this lobby is the men's lavatory.

The main floor is occupied entirely by the children's room, which will be used chiefly for the work of circulation, but also to some extent for reading purposes. The vestibule and stairways take up a space 16 x 25 feet in one corner of the front, and there is also a rear stairway that leads directly to the packing-room, but the entire remainder of the floor, which will be unbroken by partitions, will be available for the children's work.

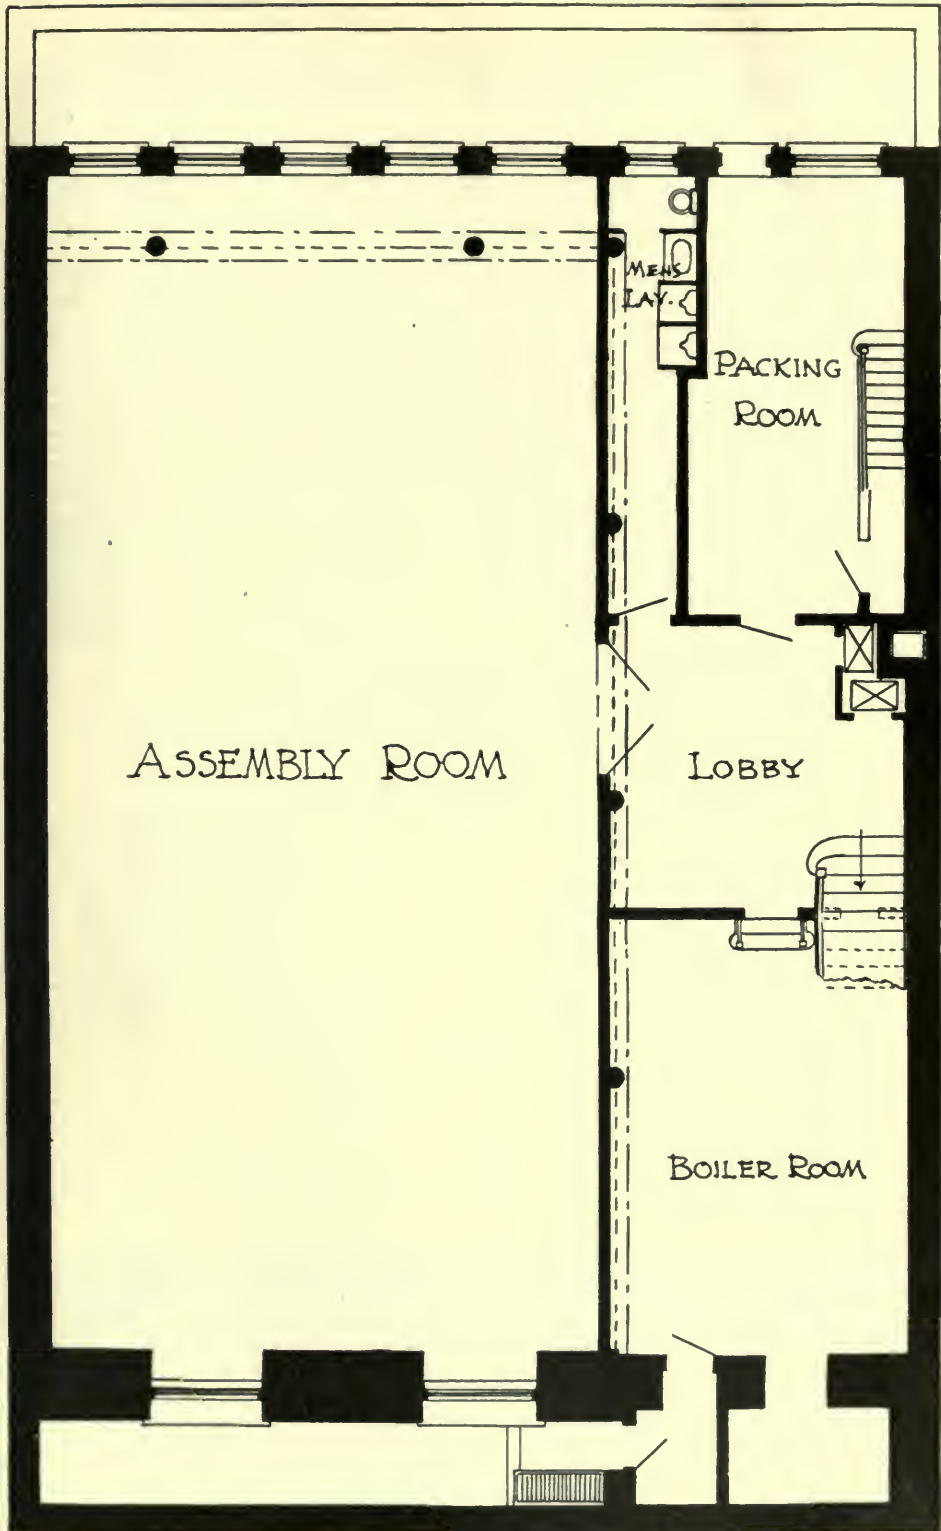

On the second floor is the adult's circulating department, which will also occupy the whole floor, with the exception of the stairways, a women's lavatory 7 x 12 feet, and a projection 6 x 4 feet from one of the side walls, through which run the lifts and flues.

On the third floor is located the general reading-room and also a lunch-room and retiring-room for the library staff, with lavatory. This occupies a space 16 feet square in one of the rear corners of the floor, and adjoining it is the stairway leading to the janitor's apartment.

To these latter is devoted a space 14 feet wide and extending across the rear of the building, with a projection 15 x 16 feet. The whole apartment is practically situated on the roof of the building and will not be visible from the street. It includes three bed-rooms, a sitting-room, kitchen and bath-room.

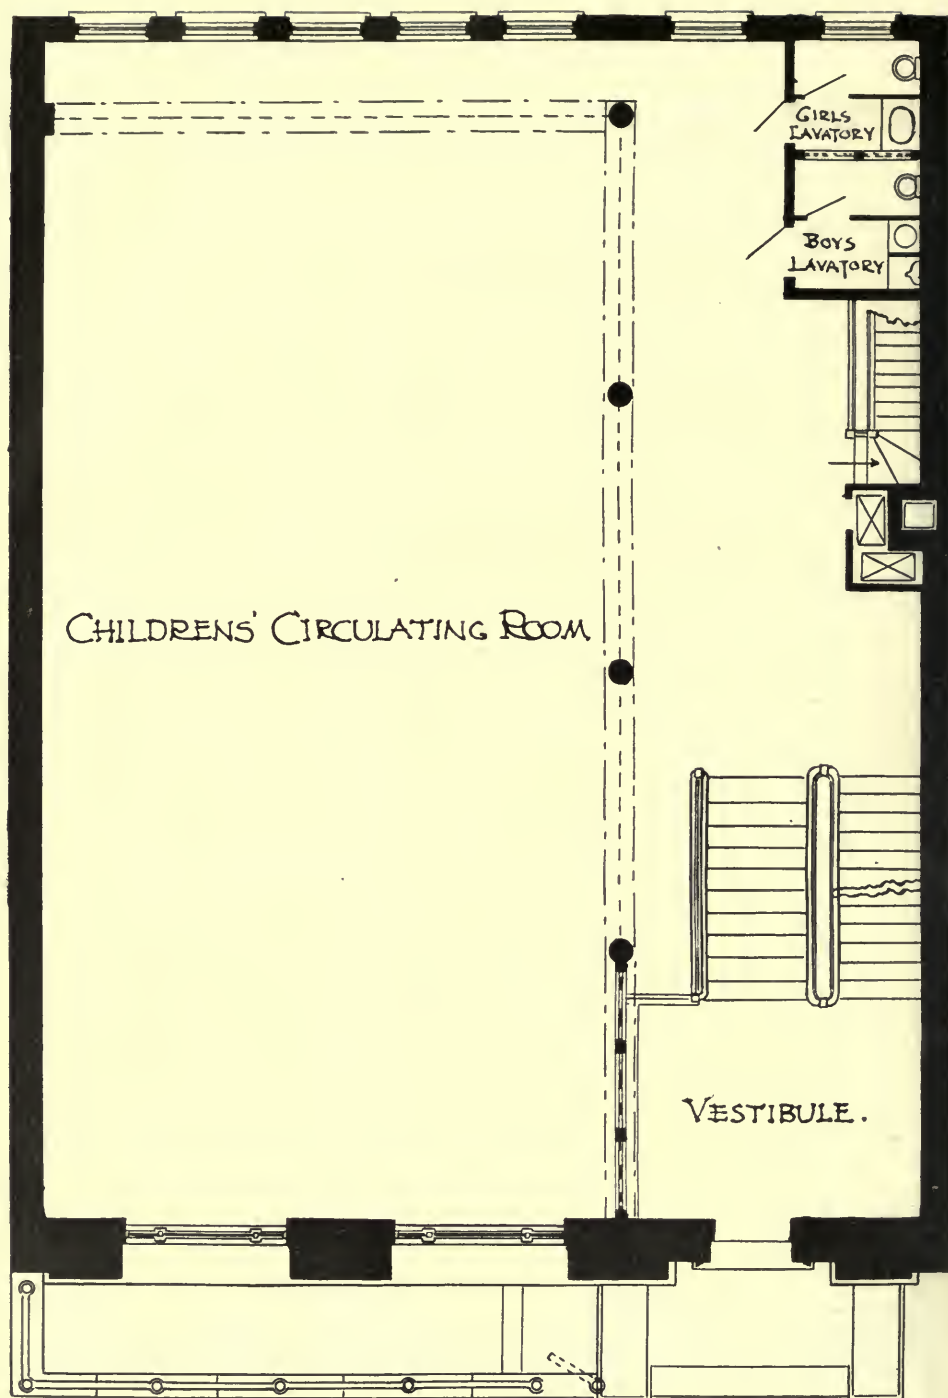

The whole building is of the most substantial and approved fireproof construction. It will be lighted by electricity and heated by hot water on a combination of the direct and indirect systems. Contracts have not yet been made for the equipment of the building, but it is expected that the furniture and fittings will be similar to those of the Yorkville building, and will include the usual charging desks for the circulating work and tables and chairs for reading. The shelving will be confined to the walls as much as possible, and in any case there will be nothing in the nature of a stack-room, as these branch libraries are not to be store-houses for books, but rather depositories for collections of such standard and current literature as is most in demand for home use. By shelving the walls and placing reading-tables in the adjoining open space the reader is brought into more direct contact with the books, greatly to his convenience and comfort.

It will not be necessary to organize a new branch library for this building, as the Chatham Square branch has been doing good work for several years in a rented building nearly opposite the new site, where it was established in 1899. On the completion of the new building, which should be ready in the summer of next year, the staff, and work of the branch will simply be moved across the street, where, it is expected, it will go on with increased usefulness to the locality.

REPORT OF THE DIRECTOR

FOR THE YEAR ENDING JUNE 30, 1902.

July 1, 1902.

HON. JOHN BIGELOW,

President, New York Public Library.

SIR:

I have the honor to submit the following report of the work of this Library for the fiscal year ending June 30, 1902:

By act of the Legislature, approved Feb. 7, 1902 (Chapter 21 of laws of 1902), the number of Trustees was increased from twenty-one to twenty-five, and the Mayor, Comptroller, and President of the Board of Aldermen of the City were made, *ex officio*, members of the Board of Trustees. Mr. Daniel Huntington, one of the trustees of the Lenox Library previous to its incorporation with the New York Public Library, resigned December 11, 1901; and in January, 1902, Mr. Andrew Carnegie was elected a trustee to fill the vacancy thus caused. In April, 1902, Mr. J. Pierpont Morgan was elected as a member of the Board of Trustees. Mr. George L. Rives, having accepted the office of Corporation Counsel of the City, resigned his position as Secretary of the Board, and in January, 1902, Mr. Charles Howland Russell was elected Secretary in his place.

NEW BUILDING.

The contract for the erection of the new building, including mason work, marble, roofing, steel construction and fireproofing was executed by the Municipal authorities with the firm of Norcross Brothers on August 26, 1901, the time limited for completion being three years.

Little was done until the Appellate Division of the Supreme Court acted on the appeal from the decision refusing an injunction against the breaking the contract with Norcross Brothers, which appeal was denied by decision of the Court, Nov. 15, 1901.

Modelling and draughtsmen's sheds were erected on the grounds, and the work of making models on the large scale has made good progress. In May, 1902, a full-sized model of two of the columns on the Fifth Avenue front, with their bases, capitals, etc., was set up in place, to enable the architects to judge as to the proper proportions of the several parts and at the same time to give the public some idea as to the character of the proposed building. The quarrying of the marble to be used has made suf-

ficient progress to show that stone of excellent quality will be produced, but no marble has yet been delivered at the building site. About three million of bricks have been laid on interior walls. The legal complications in connection with contracts have caused a delay of about six months.

CARNEGIE LIBRARY BUILDINGS.

The contract with the City providing for the acquisition by the City of sites for Carnegie Library Buildings having been duly executed on July 17th, 1901, the Trustees requested three prominent architects in the City, namely, Messrs. Charles F. McKim, Walter Cook, and John M. Carrère to act as an advisory committee on the question of procuring plans. On September 30th, 1901, this committee recommended that the branch libraries should be built on a distinctive type with as much uniformity in the design, materials, and general character as is consistent with such variations as are bound to exist. They recommended that a Board of Architects be selected by the Trustees, to consist of not less than two, and in any case not more than five, architects, and that the designing of the buildings and the supervision of their construction be entrusted by allotment to the individual members of this Board. In accordance with these recommendations, on November 7th, 1901, an agreement was made with three firms of architects in New York—namely, Babb, Cook & Willard; Carrère & Hastings, and McKim, Mead & White—whereby the said firms were employed to prepare plans and specifications for the branch library buildings on sites to be provided or approved by the City of New York, to be erected and equipped at the expense of Mr. Andrew Carnegie.

In this agreement it was provided that the designing of each of these buildings shall be separately entrusted by allotment to one of the three firms of architects, and that the architects shall act in collaboration and as an Advisory Board to the Trustees in all matters pertaining to the erection of any of the branch library buildings, and that the plans for any or all of the buildings are to be approved in writing by a majority of the Advisory Board. The first Carnegie Library Building, on East Seventy-ninth Street, between Second and Third Avenues, was erected on a plot of ground belonging to the Library, and approved as a proper site by the Board of Estimate and Apportionment. The plans and designs for this building were made by Mr. James Brown Lord, who had had the work in hand before the New York Free Circulating Library was consolidated with the New York Public Library. Mr. Lord consulted with the Advisory Board of Architects with regard to the design of the building, which was finally completed in accordance with the general scheme of design approved by

the Advisory Board, and the contract with Isaac A. Hopper & Son for its construction, in accordance with the approved plans and specifications, was signed on the 15th February, 1902.

The Committee on Circulation having reported on the suitability of certain sites for branch libraries, and the Executive Committee having approved of the sites proposed, on November 4th, 1901, a communication was addressed to the Mayor of the City of New York stating the urgent need that certain sites be determined upon, and recommending certain general locations and three definite sites which should be obtained at once for these buildings.

It was impossible to secure consideration of the question of Library sites during the final days of the last administration, and when the new administration came into office, in 1902, other matters seemed of more importance. On February 10th, 1902, a letter was addressed to the Mayor, calling attention to the agreement in respect to these sites and to the communications already addressed to the City recommending certain sites. On March 7th, 1902, the Board of Estimate and Apportionment took up the question of sites, giving public hearings in regard to this matter. A report of the City Engineer, dated November 29th, 1901, was thereupon for the first time made public, in which the sites previously recommended were criticised and the prices asked considered excessive. The whole question was then referred to a Committee of the Board of Estimate and Apportionment, consisting of the following, namely:

President of the Board of Aldermen, Mr. Fornes;

President of the Borough of Manhattan, Mr. Cantor;

President of the Borough of The Bronx, Mr. Haffen;

and the Executive Committee appointed a sub-committee to confer with them in regard to the subject.

The question of sites in the Borough of Richmond having been brought up, the Board of Trustees on December 11th, 1901, invited the following residents of the Borough:

Messrs. GEORGE CROMWELL (President of the Borough),
JOHN M. CARRÈRE,
GUGY Æ. IRVING,
A. K. JOHNSON,
WALTER C. KERR,
IRA K. MORRIS,
DE WITT STAFFORD,

to act as an Advisory Committee to consider and report upon the situation in Richmond, and especially as to the recommendation of the Committee

on Circulation to arrange for additional branch libraries in the Borough of Richmond.

On February 7th, the report of the Advisory Committee on Richmond was received, in which it was recommended that one large library at St. George and five smaller libraries in localities mentioned be obtained in the Borough of Richmond. This report was generally approved, and steps were taken to secure the consent of Mr. Carnegie and the City Authorities to an increase in the number of sites under the contract.

On March 26th, 1902, an amendatory agreement was entered into by the Trustees and the City of New York by which the number of sites permitted to be selected for Carnegie Libraries was increased from not to exceed 42 to not to exceed 50, in order to provide for additional libraries in the Borough of Richmond and in the Bronx, and this was approved by Mr. Carnegie.

On May 23rd, 1902, action was taken by the Board of Estimate and Apportionment, authorizing the purchase of Site No. 4 at 140th street and Alexander avenue in the Bronx. The Comptroller was given power to negotiate for the purchase of sites at 176th street and Washington avenue and 190-192 Amsterdam avenue, and condemnation proceedings were authorized for property at Amsterdam avenue, between 84th and 85th streets, and at Nos. 224-6 East 125th street. On June 6th, 1902, the Board of Estimate and Apportionment approved the purchase of site Nos. 31-33 East Broadway at a price which had finally been agreed upon, and at that time the general localities for sites Nos. 2 to 18 inclusive (excepting those sites to be located in Richmond) were approved. It was referred to the Comptroller to purchase such properties in each locality as might be recommended to him by the Board of Trustees.

On June 6, 1902, the Board authorized an issue of bonds for \$250,000.00, to be used for the purchase of library sites, about \$200,000.00 of which might be made available for the purchase of sites in the Boroughs of Manhattan, The Bronx, and Richmond.

It will be seen from this that at the end of the fiscal year the only site which had actually been obtained was that on 79th street for the Yorkville branch; but the purchase of two others had been authorized, eight sites had been agreed upon, ten other sites had been approximately selected, and plans were in course of preparation.

CIRCULATION DEPARTMENT.

During the year two libraries have consolidated with this Library under the provisions of Chapter 57 of the Laws of 1901 of the State of New York, viz.: the St. Agnes Free Library, now our St. Agnes branch, on

August 1st, 1901, and the Washington Heights Free Library, now our Washington Heights branch, on December 1, 1901. The St. Agnes library added 10,027 volumes, and the Washington Heights library 19,425 volumes, to the stock of the Department; and the latter also brought with it a fine building erected a few years ago. The working staffs of these libraries were continued, and but slight change in their methods was required to secure uniformity.

The four reading rooms that had been opened in public school buildings as stated in my last report, were closed at the end of the year 1901, owing to lack of funds by which the Board of Education could continue their support. The books and periodicals in these reading rooms—being the property of the Library—were distributed among the branch libraries for circulation.

The employees of the Department were re-classified in April, and are now divided into six grades, of which the highest consists of librarians-in-charge of branch libraries and the lowest of unpaid apprentices. The number in each grade, except the two lowest, is limited. Passage of an examination is necessary for promotion and confers eligibility; but the promotion itself is conditioned on the existence of a vacancy in the higher grade. Examinations under these new rules were held in May, 1902. Two classes of apprentices, to serve six months each, were admitted by examination during the year, one on October 8, 1901, and one on March 25, 1902. The former graduated fourteen members unconditionally and six conditionally. In the second, which is still serving, there are nine members. Beginning with October next, the term of apprenticeship is to be lengthened to nine months, or practically a school year.

The work done by the Department shows an increase over that of last year, as will be seen by the statistical tables. In these tables the circulation of the new branches is taken into account only since the respective dates of consolidation. If the year's work of all our present branches be considered, it will be found to include a home use of 2,014,653, as against 1,862,968 for the preceding year—an increase of 151,685. Of this increase 99,920 is due to the Travelling Libraries alone, which circulated 248,791 volumes. The number of distributing agencies this year was 202, as against 156 last year. Their diversity can be appreciated only by glancing at the list of them printed on another page. As our work will soon be extended to the Boroughs of the Bronx and Richmond, where the territory is too large to be thickly covered with regular branch libraries, it is believed that considerable parts of those Boroughs must be served through travelling libraries.

The number of books lost by theft during the year in the Circulation

Department is very large, as is the case in all open-shelf libraries. The total number reported missing at the monthly partial inventories during the year at the fourteen branches was 3,480. A large number of these missing books are only replaced or mislaid, but this report doubtless represents a permanent loss of at least 2,000. Thus the annual loss from theft is one per cent. of the total number of volumes on the shelves and one-tenth of one per cent. of those circulated. Of the total expenditures of the Department, about 1.3 per cent. is for replacement of stolen books, and nearly 12 per cent. of the book appropriation is so expended.

The total number of books now in the Department, including missing books in course of replacement, is 218,818, of which 15,986 volumes, new in their respective branches, were added during the year. The titles in each branch duplicate those in the others to a considerable extent; thus, the whole number of titles in the Department is only 43,000. Of the thirteen branch libraries now included in the Department, six occupy their own buildings, while seven are in rented quarters. In all cases but one the leases for these have been renewed during the year. The Riverside Branch was obliged, in December, 1901, to leave its quarters at 261 West 69th Street owing to the sale of the building, and removed to 230 Amsterdam Avenue. This building was torn down in the following March, which necessitated a second removal, this time to 116 West 65th Street. As this building was incomplete, the branch was closed for a month, and the new rooms were not occupied until April, circulation being resumed on May 12th.

CENTRAL REFERENCE LIBRARY.

SHELF DEPARTMENT.

During the fiscal year the number of volumes received by the Shelf Department, entered on the accession catalogue, and placed on the shelves, was 32,224, of which 15,760 were purchases and 16,464 gifts. The number of pamphlets accessioned during the same period was 24,317, of which 6,754 were purchases and 17,563 gifts.

The number of volumes and pamphlets actually received at the Library during the year was as follows: 33,741 volumes, of which 12,951 were purchases, 18,178 were gifts, and 2,612 were exchanges; pamphlets, 128,270, of which 5,969 were purchases, 54,070 were gifts, and 68,231 were exchanges. During the year 2,834 volumes and 15,126 pamphlets—duplicates—were sent out in exchange, and over 2,000 volumes and 2,000 pamphlets—United States documents—were returned to the Superintendent of Documents.

The total number of volumes on the shelves and available for use at the end of June, 1902, was 571,081, and of pamphlets 206,687.

19,631 volumes and 2,812 pamphlets were reclassified, the following sections being finished: astronomy, classical literature, general geography, African history and geography, art, applied art, costume, numismatics, etc., history of the Netherlands, Scandinavia, Switzerland, genealogy, Egyptology, occult science; work was begun or continued on the following: theology, Church history, etc., philology, Sanskrit, bibliography, law (at the Lenox branch). 6,844 bookseller's catalogues were arranged and grouped according to the sellers' names, besides the many catalogues sent to the shelves for the bibliography of various subjects.

There were bound for the Library 6,634 volumes (including 885 volumes repaired outside of the Library, not including about 1,000 volumes bound abroad before importation); and the Library bindery repaired 938 volumes, mounted 30 maps, and made 1 portfolio. 4,171 volumes were tied up in manila paper and 7,187 volumes were lettered and labelled, of which 1,206 were lettered by apprentices; 2,549 pamphlets were stapled or sewed to hold stiff paper covers. New shelving was added to the amount of 4,258 feet.

CATALOGUE DEPARTMENT.

During the year there were catalogued 46,788 volumes and 27,474 pamphlets, for which purpose there were written 111,149 cards and 8,964 slips for the printer, from each of which slips five cards on an average were obtained. Also 23,564 card-slips were written for the copying machine, from which 110,326 cards were run off. At the end of June, 1902, the index catalogue contained about 675,250 cards. The separate catalogues contain cards as follows: General, 237,715; Documents, 130,000; Serial, 38,265; Report, 18,675; Railroad, 6,915; Hebrew, 18,750; Oriental, 4,520; Russian, 6,420. The card catalogues in the two reading rooms at the Lenox Building contained 207,970 cards (132,710 in the general reading room, 43,700 in the music catalogue, and 31,560 in the catalogue of genealogies and local histories); in addition to the above, the catalogue of manuscripts contains 24,200 cards, of maps 23,870 cards, of Americana 29,410 cards, of prints 8,276 cards.

Revision of the index catalogue in the reading room was continued, the following groups with their related subjects having been taken up: astronomy, geodesy, time, etc.; dairies and dairying; electricity; geography; government, political science, and constitutional law; India; insurance; lighting; marriage and divorce; municipal government; photography; pottery; prices; shorthand; statistics; taxation; tobacco; George Washington; wages.

There remained unsearched and uncatalogued in the Astor Building 600 volumes, 33,000 pamphlets, 400 pamphlet volumes, mostly of religious matter.

In the Lenox Building the cataloguing of the following topics was taken up and finished: English literature, French history, fine arts, and constitutional and international law. There remain in the Lenox Building to be catalogued: sociology and economics, 5,300 volumes; religion, 5,700; science and technology, 3,500; European histories, with the exception of English, French, and ancient histories, 858; general literature, 1,500.

The number of periodicals indexed is 1,240, an increase of 115 in the year; in addition 37 periodicals are indexed for the A. L. A. co-operative work. The total number of cards written for the New York Public Library indexing was 18,214; the total number of titles written for co-operative indexing, 775, two printed cards being received for each title; and the total number of index cards added to the catalogue was 19,764.

READERS' DEPARTMENT.

During the year the number of readers and visitors who visited the two reference library buildings was 165,011, the Astor having received 111,199, and the Lenox 53,812. This is an increase of about 21,039 readers over the previous year, the increase being 9,510 at the Astor Branch, and 11,529 at the Lenox. The daily average of readers was 451, or 358 at the Astor and 93 at the Lenox. The largest number in any one month was in March and the smallest in July, as has been the case in previous years.

The total number of volumes and periodicals issued to readers in both buildings during the twelve months, not including the use made of the open reference shelves, was 411,883. The figures for this item in 1900-01 were 605,487; the apparent decrease is due, however, to a change in the methods of keeping statistics in the Astor Branch. Of the 351,228 volumes called for at the Astor, the largest number, 60,309, or 17 per cent., belonged to English literature; 56,847, or 16 per cent., belonged to applied science; 45,290, or 12 per cent., belonged to law, economics, sociology, and education; 37,372, or 10.6 per cent., related to the literature of Europe. The total number of volumes given out at the Lenox Building was 60,655, of which 33,366 related to genealogy and 5,382 to music. Tables are appended showing in detail by months the statistics of readers and the character of the books called for at the Astor and the Lenox Buildings.

PERIODICAL DEPARTMENT.

The total number of readers of current periodicals in the periodical department during the fiscal year was 23,640, being a daily average of 76. In addition to the journals contained on the open reference shelves, 226,396 numbers of current periodicals were called for, being a daily average of 730. The total number of periodicals received at this date is 4,495, of which

941 are gifts, and 158 exchanges for the *Bulletin*. In addition to these the Library received by purchase 621 annual publications, and by gift 5,495 annual publications. The average of separate numbers of periodicals (excluding annuals) received daily is 280, the total number for the year being 86,800. This includes 58 daily papers, 600 weeklies, 154 semi-monthlies, 1,254 monthlies, 163 bi-monthlies, 517 quarterlies, 71 semi-annuals, and 909 of irregular period of publication. In addition, 925 document serials (421 foreign and 504 domestic) are included in the report of the document department. In exchange for the *Bulletin* the Library receives a total of 395 periodicals, an increase of 41 for the year; of these 164 are American annual publications and 73 foreign annuals, and 126 American and 32 foreign periodicals of greater frequency of publication than annually. A table (III) is appended giving the statistics of periodicals received by countries. 2,865 volumes of old periodicals were added to the Library during the year, completing important files.

DOCUMENT DEPARTMENT.

During the year there were received of public documents 10,829 volumes, 4,392 pamphlets, 25,668 pieces of serials; there were catalogued 16,850 volumes, 5,400 pamphlets, for which were written 6,891 cards, and 6,666 slips for the printer or the copying machine. The most extensive additions were made to the collection of American municipal documents; sets of collected modern documents of several American States were completed, notably those of Maine, Massachusetts, New Jersey, Indiana, and Pennsylvania. In foreign documents the additions to the official newspapers and government handbooks, and the proceedings of Australasian countries, of Italy, and of France have been considerable; documents of the latter country, secured from the library of the late Jules Simon, included important financial reports and reports of special inquiry commissions.

Preliminary work on the index to United States documents relating to foreign affairs has been completed, a total number of 45,000 cards having been written to cover the period from 1810 to 1896. This preliminary work is now in process of revision in preparation for printing.

SEMITIC DEPARTMENT.

The accessions to this department during the year amounted to 950 volumes and 350 pamphlets, the great majority of which were the gift of Mr. Jacob H. Schiff. The Hebrew section of this department now contains over 11,000 books and pamphlets, including books in the Hebrew language and in the various Jewish dialects on all subjects, and also works relating to Jewish history in all languages. Over three-fourths of this

collection has been presented by Mr. Schiff. It includes a valuable collection of over 1,000 volumes of Jewish periodicals, a list of which has been printed in the *Bulletin*, and its special catalogue contains over 16,000 cards. The collection is much used, about 30,000 volumes and pamphlets from it having been called for by readers during the year.

SLAVONIC DEPARTMENT.

The accessions amounted to 1,560 volumes, bringing the total in the department to 4,721 volumes. The number of volumes catalogued was 1,598, for which 5,919 cards were written, the catalogue of the department now containing 6,420 cards. The number of readers averaged 231 per month.

Among the important gifts were a collection of the publications of the "Society for the promotion of culture among the Jews of Russia," and many publications of B. D. Grinchenko of Chernigov, Russia. By purchase important additions were made to the files of the Russian periodicals "Vvestnik Yevropy," "Otechestvennyya Zapiski," "Russki Vvestnik," "Mysl" and others.

BULLETIN.

Volume V. of the *Bulletin*, for 1901, contained 490 pages, an increase of 74 pages over 1900. Of the check lists printed between July, 1901, and June, 1902, worthy of special note, were the list of manuscript collections in the Library (July); lists of American county and state histories (November); list of foreign government documents on finance (December); a series of lists of works relating to Brooklyn similar in plan and scope to those relating to New York City printed in January-December, 1901, comprising general municipal documents, newspapers (January), finance and commerce, churches, libraries, schools, clubs, charities and missions, hospitals (February), history of Brooklyn, maps, directories, cemeteries, public health, parks, fire department, water supply (March); a series of lists of works on prices (April), value, wages, corn laws (May); a list of Russian and other Slavonic periodicals (June). The issue for August, 1901, contained the text of an interesting letter from Robert Fulton to Bonaparte, dated May 1, 1798, urging the adoption by France of a system of canals and a general policy of free trade; further selections of letters of James Monroe were given in September and November, 1901, and June, 1902; nine letters from Edgar Allan Poe to E. A. Duyckinck in 1845-49 were printed in January, 1902, and in the same issue was printed a calendar of the Barbour papers relating to national and Virginia politics between 1811 and 1841.

EXCHANGES.

During the year there were received by the Library on exchange account 2,612 volumes and 68,231 pamphlets, and there were sent out duplicates in exchange to the number of 2,834 volumes and 15,126 pamphlets. In exchange for the *Bulletin* there were received 126 American and 32 foreign periodicals (total, 158), and in addition 164 American and 73 foreign (total, 237) annual publications, and 124 separate volumes, all of which latter have been credited as gifts in the statistics of volumes and pamphlets actually received during the year.

PRINT DEPARTMENT.

The number of prints accessioned during the year was 12,612. The print room was visited by 801 persons for the purpose of consulting prints; the visitors to picture galleries numbered 33,240, of whom 13,294 examined the prints in the exhibition cases. 108 letters were written in answer to queries from readers, 34 volumes were sent to the general reading room for the use of readers, 25 volumes were catalogued, 83 cards and 82 slips were written, and 246 cards schapirographed, 104 prints were mounted in the library, and about 6,700 newspaper clippings were distributed in their proper groups, if of interest in connection with the department, or were turned over to the general library. Through the courtesy of Mr. Avery 255 mat openings were cut by an outside workman.

In July "A handbook of the S. P. Avery collection of prints and art books in the New York Public Library" was printed and placed on sale at the price of fifty cents. This is a volume of 84 pages, containing, after an "introductory statement," the rules of the print room, a catalogue of the etchings, lithographs, photographs, miscellaneous prints, arranged alphabetically according to the engraver's name, and showing the number of prints by each. The catalogue of books in the collection is divided into five sections: art and artists in general, prints in general, etching, lithography, individual artists and their works; it is accompanied by two half-tone cuts of the print room and the exhibition gallery.

Exhibitions at the Lenox branch were as follows: July to September, portraits chosen primarily for their artistic quality; October to December, a loan exhibition of the work of Rembrandt, from the J. Pierpont Morgan collection; January to March 17, engravings by Fantin-Latour and by Egusquiza; from March 18, work of Dante Gabriel Rossetti; during the year a portion of the Japanese prints has remained on exhibition. At the Astor branch the art-forms in nature were partially replaced in July by photographs of views in the Philippine Islands; in October part of the

artistic portraits were sent down from the Lenox exhibit just closed; in January were shown plates from Migeon's "Treasures and masterpieces of art at the Paris Exposition" of 1900, given by Mrs. Henry Draper, and Chinese prints of the Boxer uprising given by Dr. J. O. Skinner; these gave place in March to a selection of the Fantin-Latour and Egusquiza prints, and the latter in turn were replaced in May by plates from Hirth's "Formenschatz." In November and February wood engravings and etchings by Haden from the Avery collection were loaned for exhibitions at the Grolier Club.

Mr. Avery continued his gifts through the year; particular mention should be made of his additions to the Turner, Whistler, Rossetti material, of two volumes of etchings by Goya, of 33 volumes of engravings by Chodowiecki, of 300 plates of F. Lippman's phototype reproductions of "Original drawings by Rembrandt." Mr. Charles Sedelmeyer, of Paris, gave the five volumes already published of Wilhelm Bode and C. Hofstede de Groot's "Complete work of Rembrandt," with the promise of future volumes as issued, to be credited to the Avery collection. R. Swain Gifford gave seven etchings by himself, L. M. Yale 34 of his etchings, Dr. J. O. Skinner 5 Chinese wood engravings; in addition to those above noted there were, of course, other gifts from various sources.

IMPORTANT GIFTS.

Mr. Avery has continued his gifts of prints and of books of a general nature, Mr. Cadwalader has made important accessions to the sports collection, and Mr. Maitland to the Americana. In addition to the many general works given by Mrs. Henry Draper, mention should be made of her gift of Goupil's "Treasures and masterpieces of art at the Paris Universal Exposition" of 1900, and of some 500 volumes of American, English and Continental literary annuals.

Important gifts have been received from the *New York Times*, *Tribune*, *Evening Post*, *Sun*, daily newspapers; and from the *Churchman*, *Christian Herald*, *Literary Digest*, *American Agriculturist*, weekly newspapers; and from the Methodist Library through Rev. J. C. Thomas, its librarian. From Cooper Union have been received broken files of over forty daily and weekly newspapers published in this country and abroad.

Official publications of interest have been sent in from the Argentine Republic, Australia, Barbados, Boulogne, Bordeaux, Cuba, Denmark, Dresden, Gold Coast Colony, India, Italy, Jamaica, Japan, Lisbon, Madagascar, Moscow, Newfoundland, Nova Scotia, Netherlands, Peru, Russia, Trieste and elsewhere. Major S. T. Armstrong, the Century Association,

the Earl of Crawford and Balcarres, Mr. Worthington C. Ford, B. D. Grinchenko, of Chernigov, Russia, the Long Island Historical Society, the Duc de Loubat, Mr. Eliot Norton, Mrs. Penfield, Messrs. H. V. and H. W. Poor, Mr. Leonard E. Opdyke, Mr. E. Schernikow, Mr. Charles Sedelmeyer, of Paris, should be mentioned as givers of works of particular interest.

In December the George W. Curtis Memorial Association presented a bronze bust of George William Curtis by J. Q. A. Ward. A valuable collection of reports relating to the African colonization of American negroes was given by the New York Colonization Society in March; and nearly 300 volumes of historical fiction in German were given by Mr. George Fischer in January.

The two largest collections received by gift during the year are the Sterne collection, consisting of 2,375 volumes and 2,442 pamphlets, relating mainly to economics, from the library of the late Simon Sterne; and the Library Americana given by Mr. Henry Baldwin, of New Haven, Connecticut, including about 1,000 bound volumes, 5,000 pamphlets and a large quantity of odd numbers of magazines and newspapers, a series of scrap-books relating to such matters as the Chile-Peru war, the Presidential election of 1884, the Spanish-American war, and much material in the form of manuscript letters, pamphlets, clippings, etc., relating to the various nativistic orders and organizations that have from time to time been formed in this country.

As stated in my last report, the fund available for purchase of books for the reference department is not more than half the amount required to keep it up to date, and the selection for purchase has continued to be made in accordance with the rules stated in that report. The most urgent demands upon the library are for works in applied science, in political science, and the industrial arts, in American and English history, and for public records and documents, and serials of all kinds, and these demands have been met as far as possible. Special endowments for the departments of Art, Music, Education, and European History and Literature are much needed; at present our accessions in these departments are very few in number.

The Library staff have done good work throughout the year, and I take great pleasure in acknowledging the cordial co-operation of the chiefs of the several departments to secure the best results.

Very respectfully,

J. S. BILLINGS,

Director.

NOVEMBER, 1902.

No. 11.

REPORT FOR OCTOBER.

REFERENCE DEPARTMENT.

During the month of October there were received at the Library, by purchase, 1,149 volumes and 355 pamphlets; by gift, 1,155 volumes, 2,024 pamphlets, and 32 maps; and by exchange, 105 volumes and 112 pamphlets.

There were catalogued 4,468 volumes and 4,690 pamphlets, for which purpose 11,157 cards and 3,685 slips for the copying machine were written, and 18,572 cards were received from the copying machine.

The following table shows the number of readers, and the number of volumes consulted, in both the Astor and Lenox Branches of the Library, also the number of visitors to the Print Department at the Lenox, during the month:

	LENOX.	ASTOR.
No. of readers and visitors.....	4,960	9,782
No. of readers.....	2,745	9,782
No. of readers, desk applicants.....	1,398	8,499
No. of volumes consulted by desk applicants.	5,727	28,349
Daily average of readers.....	102	362
Number of visitors to Print Exhibit, etc....	2,672	

CIRCULATION DEPARTMENT.

The most popular books of the month were (in non-fiction): Hemstreet's "When Old New York Was Young," Munson's "Art of Phonography," and James's "Talks to Teachers on Psychology;" (adult fiction) Wister's "The Virginian," Wilson's "The Speckled Bird," and Chambers's "Maid-at-Arms;" (juvenile fiction) Hegan's "Mrs. Wiggs of the Cabbage Patch," Alcott's "Little Women," Clemens's "Tom Sawyer."

The more important gifts of the month were: From S. P. Avery, 80 prints, chiefly modern French and German lithographs; from the Oriental Public Library at Bankipur, a copy of its catalogue in Hindustani; from Mrs. R. G. Beardslee, an addition to her gift of educational publications, 171 volumes, 34 pamphlets, and 2 maps; from Mrs. B. F. Stevens and members of the Whittingham family, through Henry J. Brown, 65 volumes and 9 pamphlets, including some scarce early publications, and works of the Chiswick Press, founded by the Whittingham family; from several departments of the Canadian Government, 50 volumes and 2 pamphlets, all public documents; from Mrs. Henry Draper, 71 volumes and 30 pamphlets, including literary annuals and 6 numbers of the *Almanach des Dames*; from the Colonial Secretary of the Falkland Islands, 7 numbers of the *Government Gazette* and the report of the Census of 1901; from Worthington C. and Paul L. Ford, 11 pamphlets, 13 broadsides, and 6 manuscripts and 1 land grant; from the Viceroy of India, 1 volume on the *Trigonometrical Survey of India, 1901*; from the Adjutant General of India, 7 pamphlets; from General Horatio C. King, 4 volumes and 11 pamphlets, chiefly his own writings; from Thomas W. Lawson, a copy of his *History of the America's Cup*; from George A. Lucas, 23 prints; from Johann Meyer, Kiel, 7 volumes and 15 pamphlets, chiefly his own works; from the *Publishers' Weekly*, 98 volumes and 52 pamphlets; from John Robinson, 6 literary annuals; from Charles Scribner's Sons, 135 prints, nearly all Japan proofs; through the Colonial Secretary of the Straits Settlements, 13 numbers of the *Pahang Government Gazette* and 1 of the *Perak Gazette*; from Thomas G. Sugden, 34 prints and 16 wood blocks in various stages; and from S. A. Yefremov, Kiev, "*Vik*," a Ukrainian anthology, 1798-1898, in 3 volumes.

The exhibition relating to Victor Hugo at the Lenox was replaced by a collection of American wood engravings. Many of the Hugo drawings, etc., were put up in the Astor stands in place of the plates from Molinier.

The new picture bulletins in the circulation branches were as follows: OTTENDORFER, Grapes, Harvest, Rapid transit subway, Insects, Mascagni, Émil Zola, New books; BRUCE, The labor question, Naval heroes, Sea stories; JACKSON SQUARE, Indoor games and amusements; HARLEM, Autumn leaves, Columbus, Illustrations from some good books for adults, Labor, capital and coal, Charles Dickens, George Eliot, Alfred Tennyson; MUHLENBERG, New books; BLOOMINGDALE, Bard of Avon, Masters of Music, Legal novels, Cotton; CHATHAM SQUARE, Sports, Arctic discoveries, Among the miners in the coal strike region, Edmund Clarence Stedman, George W. Cable, San Francisco, Animals, Election day; ST. AGNES, Covers of popular juvenile books, Covers of popular adult fiction; WASHINGTON HEIGHTS, Hallowe'en.

LIST OF WORKS ON ELECTRICITY IN THE NEW YORK PUBLIC LIBRARY.

Part I—General Works and Production.

* * All works here noted are located in the Astor branch. The list does not include titles in magnetism, animal or physiological electricity, electrotherapeutics, electrohorticulture, electric traction, telegraphy, or telephony. Index entries for periodical articles include only important recent papers. As will be seen from the following synoptical table the titles are grouped into the five broad divisions of General Works, Production, Transmission, Applications, Electro-optics and magneto-optics.

The most important gifts received at the Library during the month were from Mr. Alexander Maitland and Mrs. Henry Draper. Mr. Maitland gave an interesting volume of 17th and 18th century tracts (1680-1791), many of them Boston imprints, some of the most important titles of which are "The True Protestant (Domestick) Intelligence, or News both from City and Country" (London, 1680, Nos. 1-7); "Rules for the Society of Negroes, 1693" ([Boston, 1693?], 1 page); Question: Are we obliged in this Government of the Massachusetts, by Charter, to Settle a Salary upon the Governor?" ([Boston, 1729] 2 pp.); "The Articles for the Boston Presbyterian Society, Erected September 21st, 1736" (2 pp.); New Hampshire—Journal of the House of Representatives, Jan.-May, 1745 ([Boston, 1745], 45 pp.); Same, Jan.-Feb., 1762 ([Boston, 1762] 13 pp.); "Letters to . . . Earl of Hillsborough, from Gov. Bernard, Gen. Gage," etc. (Boston: Edes & Gill, 1769, 83 pp.); "By the King, A Proclamation for Suppressing Rebellion and Sedition, 23 Aug., 1775," with nine other Revolutionary Proclamations; Quebec, Ordinances, 1777 (132 pp. F°, French and English); Déclaration adressée au nom du Roi à tous les anciens françois de l'Amerique septentrional" [By Count d'Estaing, printed in 1778 on board his flag ship Languedoc, urging French Canadians to rise], 3 pp.; "Proceedings of a General Court Martial . . . For the Trial of Major-General Howe, Dec. 7, 1781" (Philadelphia: Hall & Sellers, 1782, 31 pp. F°); "An Address to the . . . Inhabitants of . . . Maine" (1791, 3 pp., urging statehood); Report of the Secretary of the Treasury, 9 Jan., 1790; and the Report of the Secretary of State, 8 Nov., 1791. Mrs. Draper's gift consisted of a collection of over 2,000 French illustrated almanacks, comprising some 300 titles, ranging in date from 1800 to 1898, bound in 442 volumes, from the library of Sir

William Augustus Fraser, and of 58 additional volumes to the collections of literary annuals and *Almanach des Dames* presented by her some months ago.

Other important gifts were: from S. P. Avery, 7 volumes, including 2 volumes of the Wallace collection of paintings at Hertford, 9 pamphlets and 19 prints; from Abraham Cahan, 45 volumes, chiefly sociological works; from the Disconto Gesellschaft, Berlin, its jubilee history; The "Mariner's Magazine" (London, 1684); W. B[rown's] Book of Entries (1671); "Plusieurs très bons cases" . . . par Jean Latch (1661), etc.; from Major Clarence Ewen, 4 volumes in all; from the R. Istituto de Studi Superiori, Firenze, 4 volumes and 4 pamphlets, publications of the Institute; from the Minister of Public Instruction, France, 3 volumes, including "Inventaire général des richesses d'art de la France"; from the Préfet de la Seine, France, 8 volumes and 2 pamphlets; from Funk & Wagnalls, a copy of volume 2 of the Jewish Encyclopædia, together with a complete set of proofs of the "Ark of the Law," illustrating the process of printing a lithographic plate in sixteen colors; from the Harvard Club, 17 volumes and 39 pamphlets, reports of clubs, etc.; from the Kurskaya Gubernskaya Zemskaya Uprava, Kursk, 6 volumes and 7 pamphlets; from George Austin Morrison, Jr., 12 volumes and 34 pamphlets, vocal and piano scores of operas, etc.; from Charles K. Needham, New Albany, Indiana, 14 pieces of paper money, notes of southern and western banks between 1836 and 1855, a Confederate five-dollar note, 4 bills of sale or hire of slaves, a travel permit for a slave, a copy of papers found on a slave sold away from his family in 1844, and a letter of Salmon P. Chase, dated 21 April, 1845, urging attendance at the Southern and Western Liberty Convention at Cincinnati, June 11, 1845; from the Civil Governor of the Philippine Islands, 11 volumes and 218 pamphlets, chiefly general orders, decisions, etc., of the Customs Division; from John Robinson, 16 literary annuals; from George W. Smith, a copy of the Index of Wills, office of the Secretary of State of New Jersey; from the Supreme Court of Australia, a copy of the Catalogue of its Library; from William C. Whitney, a copy of "The Hermitage-Zoar Note Book and Journal of Travel of Alexander Gunn" (New York, 1902); and from the Yorkshire Philosophical Society, 2 volumes and 68 pamphlets, reports and proceedings of the society.

The exhibitions of American wood engravings at the Lenox and of drawings and caricatures of and by Victor Hugo at the Astor were continued during the month.

The new picture bulletins in the circulation branches were as follows: BOND STREET, Fires and firemen; OTTENDORFER, Thanksgiving day, Some interesting books, Music and musicians, Opera; BRUCE, Thanksgiving day, Animals, Christmas, New books; JACKSON SQUARE, Thanksgiving day; HARLEM, Browning, Bryant, Henty, Longfellow, Stevenson, Whittier; MUHLENBERG, College stories, Thanksgiving day, G. A. Henty, New books; BLOOMINGDALE, Thanksgiving day, Henty; THIRTY-FOURTH STREET, Thanksgiving day; CHATHAM SQUARE, Indians, Thanksgiving day, G. A. Henty, Popular authors; ST AGNES, Thanksgiving day, Fairy tales, New books, Boarding school stories; WASHINGTON HEIGHTS, Thanksgiving day.

The cornerstone of the new building was laid November 10th by Mayor Seth Low, addresses being delivered by Hon. John Bigelow, president of the Board of Trustees, and by the Mayor, and prayers being offered by Rev. William R. Hunt-

ington and the Most Rev. Archbishop Farley. In the cornerstone were placed the following documents: Annual reports of the Astor Library for 1850 and 1894; annual reports of the Lenox Library for 1870 and 1894; vol. 1, no. 1, vol. 2, nos. 1, 2, 4, 10, vol. 3, nos. 1, 3, 10, vol. 4, nos. 1, 10, vol. 5, nos. 1, 3, 6, 7, 10, vol. 6, nos. 1, 10 of the Bulletin of the New York Public Library; Handbook of the New York Public Library, 1900; Catalogue of paintings in the Lenox gallery; Catalogue of paintings in the Robert L. Stuart collection; Handbook of the S. P. Avery collection of prints and art books, 1901; Book of charters, wills, deeds, and consolidation, 1895; By-laws, Nov., 1895, Feb., 1901, of the New York Public Library; Rules, December, 1896; Preliminary competition for the new building, May 21, 1897 (containing Act of Legislature, Chapter 556, Laws of 1897, authorizing the construction of the building at a cost of \$2,500,000.00); Circulars 1, 2, 3, 4, and letter of the secretary, July 31, 1897; Terms of competition, Aug. 2, 1897; Resolutions of Board of Estimate and Apportionment, Contract between City and Library trustees, Resolutions of Department of Public Parks, and Contract between City (by Dept. of Parks) and Architects, Dec., 1897; Supplementary Act of Legislature, Chapter 627, Laws of 1900, removing the limit of cost of new building; Correspondence relating to consolidation of free circulating libraries with the New York Public Library, 1900; Agreement of consolidation of the New York Public Library and the New York Free Circulating Library, Jan. 11, 1901; Agreement with the City relative to the gift of Andrew Carnegie, July 17, 1901; Monthly Bulletin of the New York Free Circulating Library, vol. 2, no. 10; vol. 1, no. 2, vol. 2, no. 6 of the "Monthly list of additions" of the Circulation Department of the New York Public Library; 21st and final Report of the New York Free Circulating Library; volume of Minutes of the Park Board containing action of Department with regard to the Library; copy of contract and specifications for removal of the Reservoir; copy of contract and specifications for Library building proper; copy of invitation to cornerstone ceremonies; list of Commissioners and officers of the Park Board; photographs of Reservoir, drawings of Library, and site of the building; historical description of Library building; and newspapers of the day.

SIR RALPH WINWOOD TO EARL SALISBURY ON THE ASSASSINATION OF HENRY IV., IN 1610.

(Printed from the Hardwicke manuscripts in the New York Public Library.)

HAGUE, 8th MAY 1610

I write not at this time to advertise your L^t of that most wretched & damnable Massacre, perpetrated on Friday last, between the Hours of 4 & 5 in the Evening, upon the Person of the French King, in Paris, (the particulars whereof, before these were written, are come to your L^t's knowledge) but out of my Duty to His Majesty's Service, humbly to crave your L^t's Directions, upon this unhappy & unreasonable Accident; which being of that important consequence, cannot but stagger all present Revolutions; & necessarily will produce strange Alterations, if not miserable Confusions in these Parts of the World. That which doth give no respite for deliberation, but doth press & cry for Execution, is the Affair of the Princes, for their Establishment in the Possession of Cleves & Juliers; Which Cause, unless His Majesty shall be pleased, out of his princely care for the maintenance of Justice, & the defence of Religion, to embrace with a strong & powerful Resolution, will fall to the ground. How much, the Greatness of the House of Austria, will be thereby reinforced, which never was brought to so low an ebb, & what courage the Pope & his Prelates will recover, who now are aux derniers abboye & gasp for breath, it were vanity for me to discourse to your L^t. This Morning, upon the first bruit of this Disaster, which came hither by the Mouth of a Messenger, who only delivereth the Fact, without Circumstance, I spake together with the C. Maurice & M. Barnevelt, They jointly acknowledge, what the truth is, that the subsistence of the Realm of France, that by a Relapse into Civil & Internal Dissensions, it become not to be Cantoned, & so Morsel after Morsel, to be devoured by Spain. That the Union of the Provinces remain forever indissoluble & undivided: That the Princes be established in their rightful Possessions of Cleves & Juliers; in Sum, that Europe become not a Prey to the Tyranny of the House of Austria, wholly dependeth upon the magnanimous Resolutions His Majesty will be pleased now to take; to whom the Providence of God, by this Occasion, doth minister a most spacious Field, wherein to exercise his royal virtues of magnanimity, of Piety, of Mercy, & Justice, wherewith he is so richly endowed. I find by them, they love no Cowage; Principes mortales, Respublica est immortalis. What His Majesty shall be pleased to resolve, direct & advise therein, They will join, & that They will precisely follow; even above the Power & Strength of their means. Untill We shall receive Letters from your L^p., which shall take notice of this unhappiness, notwithstanding any Directions which We presume are now on the way, all Things here shall stand at a stay; only, the States General will write to the Princes, to have care of their affairs, with promise of assistance from Themselves, & continuance of His Majesty's gracious Favor to their Cause.

The Princes have given a second blow to Leopold, by the defeat of 700 Foot, which lately were overthrown by a Count of Solmes.

Tho the Marquis Spinola hath an Army on foot, We do not think that suddenly he will engage himself for Leopold, but rather will lie aux escortes, to see what Party in France, will declare for the Prince of Conde; to whose Assistance perhaps he will come.

The States Embr on Sunday last returned out of France, only Mons^r Walderec is yet in Zealand.

By a Dispatch the States General send now, the Emb^{rs}. in England have Order to make an Account to His Majesty; what hath been treated in France. Upon a late advertisement I have received, I charged this day Mons^r Barnevelt, that their Emb^{rs}. in France, had there contracted to break with the Archduke, & had par-tagged the Wolf's Skin yet being alive. But he constantly affirmed the information to be ill grounded.
